

# **FISCAL YEAR 2011**

## **One Year Letting Schedule By District**

**September 2010 Through August 2011**

**EXHIBIT A**

# FOREWORD \*

This document contains projects authorized by the Commission which have been identified as ready for letting or obligation of funds in fiscal year 2011 by TxDOT districts.

There are three sections to this document:

1. Projects that are scheduled to let through the statewide letting process in Austin
2. Projects that are approved by the TxDOT administration to let by a local entity such as a city or county
3. Other financial obligations that do not go through a letting process

Projects and other financial obligations are funded by various funding sources, the details of which are provided on the following page. The State Highway Fund is TxDOT's traditional method of project funding and in recent years the department has received additional financial tools from the Legislature to advance projects.

The projects and financial obligations in this schedule are based on the current estimated construction costs of the projects and the current forecast of available funds for fiscal year 2011. Changing conditions may result in projects being removed or added to this Letting Schedule. These changes could include financial issues such as receiving more or less revenues than forecasted, adjustments to fit within obligation limits, the execution of funding agreements, bids on projects being higher or lower than the project estimates, and increasing or decreasing cost on existing contracts through change orders or quantity overruns just to name a few. Likewise, some projects and financial obligations may move out of or into this Letting Schedule due to project development issues associated with receiving environmental clearance or the required right of way for some projects, changes in project priorities at the local or statewide level, or conflicts with ongoing construction or maintenance work that must be avoided.

\*The following list includes projects known at the time of publication based on input from the districts and regions and may allow for change orders, final project close outs, and over/underruns from the previous fiscal year.
