Question 1:

Will the Iteris RVDS system be allowed or does it have to be wavetronics?

Response 1:

The Iteris Vantage Vector system that has advanced detection with radar and stop bar detection with video would be accepted.

Question 2:

What is included in bid item 6003-6001 its support Equipment?

Response 2:

This equipment is described under ITEM 680 in the General Notes. The contractor shall provide the hardware and setup required to route all of the IP addressable hardware (traffic signal controller, MMU, detection, PTZ camera, and BBU) to the TxDOT business network via the installation of two 5.8 GHz broadband radios (One at the traffic signal and one at the CCTV camera pole at SH40 and WDF).
