12/8/2020		Item 275 general notes states that additional embankment material will be provided by txdot at a certain location, but do you have a quantity that will be needed to be brought in from that pile ?	Per General Note: The Contractor is required to use TxDOT owned, "reclaim material," to bring embankment to grades proposed in sheet 10 to produce positive drainage. This quantity is to be determined in the field by the Contractor and shall be subsidiary to Item 275. In addition, "The Contractor is to visit the site(s), and make his/her own examination of the site(s) where work is to be performed."
