DATE	QUESTION	ANSWER
1 4/18/2019	Will TxDOT allow the use of spray patch trucks using material provided by TxDOT? (CRS-2 and Type "D" hot mix aggregate)	We do not currently have the capability to house CRS-2, Denton does so they would have to get it in Denton. We are working on getting a second tank that will allow us to house CRS2-P but it is not in place and not expected to be in place for several months.
2 4/18/2019	The plans call for 30 callouts, In determining the cost of the TMA's by the each, will there be 30 callouts so we can determine the daily cost of the TMA's.	Historically our contractors work 6-7 hours a night/day. We generally use all of the call outs and qty's. We estimate that they are working 75%-85% of the time during the life of the contract.
3 4/25/2019	In regards to RMC project #6342-18-001, we respectfully suggest that the bid item for TMA (Stationary) be modified by addenda from a unit of Each (EA) to being paid for by the DAY. It is extremely difficult to bid long-term oncall type of work with the EACH unit. This item has been under great scrutiny by the AGC and is creating many issues across multiple districts within the state.	We acknowledge this question and are looking into it. Please bid the project per the final advertised bid plans
