

## Contractor Questions

- 1) *I noticed there was no specific equipment listed that must be used such as blades loaders or telescopic grader or number of flagger or crews that you must have? Please elaborate*

We do not determine the means and/or methods to do the work specified in the contract.

- 2) *It also speaks of Culvert cleaning as a subsidiary to item 760 quantities, Culvert is not listed as a bid item so are there any on this project? And if so what quantities are they? If not, how are you separating the culvert pricing from The Cleaning & shaping prices?*

We are not expecting to clean the entire length of cross drainage or parallel drainage. We will expect the ends of all drainage pipes and culverts to be cleaned, and this be considered subsidiary.

- 3) *Is this a call out project or is there a start date to finish for the 77 days straight?*

This is a start to finish contract and time charges will begin once the work authorization is approved.

- 4) *Are these 7 areas correct and the quantities exact measurements? (FM 8, FM 914, FM 988, US 67, US281, FM 51, FM 56.)*

Locations are correct, but quantities could vary and the contractor will be compensated.
