Pre-bid Questions Log

Question 1: Appears almost all the striping in Webb County is to be TY C material.
Is this correct??

- **Yes.**

Question 2: Does any of the existing stripe need to be eliminated prior to placing sealer?

- **No, as per manufacturer I spoke to, only surface prep is required, and any existing striping will serve as a "sealer" for the prefab to adhere to. Sealer will only be required where no existing striping exists.**
