1	Also on that US 69 section where would this 30,344 worth of 0" to 2" milling take place. There is only one tie-in I can assume to concrete on the south end of the job. Nothing I see in the plans show me where this planning is to take place. I could just be overseeing something in the plans.	12/28/2022	The intent of the 0-2" is to make corrections as directed in the existing surface prior to the placement of the new surface.
