

## Project Q & A's 09/26/19

Letting: 10/03/19

Project: RMC 634690001

CCSJ # 6346 90 001

Highway: IH20

County: Ector

1. Item 6000-6041 Replace Luminaire Fixture (LED). According to section 5.10 of the Special Specification 6000 the description only shows replacing the fixture. What about the wire in the pole and the fuseholders? **This item is to replace the fixture only, if wire and fuseholders are needed they will be paid for separately by the respective items.**
2. Item 6000-6052 Replace Electrical Service. The Specification says to install per Item 628 which would include a new foundation and steel pole. Is that how you interpret this item? **If a new foundation is needed, the new foundation will be paid under drill shaft, and the pole will be provided by TxDOT as needed.**
3. Item 6185-6002 TMA. It is our understanding if more than one TMA is required for the operation location, each TMA would be paid on the daily basis. Is that how you interpret this item? **Each TMA used will be paid on a daily basis.**
4. There is not a bid item for monthly inspections, so we're assuming TxDOT will furnish a list of items to be worked on each month. Correct? **TxDOT will provide a list of items to be worked.**
5. As it was explained to us, we can expect to receive a list of repairs around the 1st of each month to be completed in a timely manner, and then receive another list the next month in order to allow us time to work on our other construction projects. Is this correct? **TxDOT will provide a work order monthly and give approximately 1 month to complete the work order.**
