

## PROSPECTIVE BIDDER'S INQUIRIES

CSJ: 6365-02-001

Bid Opening Date: 8/5/2020

No.	Question	Date Received	Response
1	Spraying a tack coat on the sides of the repairs is common. What's the reason for spraying the bottom? That usually leads to a messy operation.	8/3/2020	The application of the tack coat is to provide an adequate bond between the old material left in place and the repair material. Depending on the type of material left beneath the repair area, using the proper tack coat material will be required to provide an adequate bond.
