

Notes:

1. The Wire Outlet, Balance Adjuster, and Span Wire Clamp is a typical design labeling specific items required. Other Wire Outlets, Balance Adjusters, and Span Wire Clamps of similar design providing the items labeled will be acceptable.
2. Allen Set Screws and other types of locking or set screws will not be permitted in hex nuts, nor will holes be permitted for these screws.
3. Either provide a Rubber Gasket or "O" Ring which fits into Serrated Locking Ring or a Rubber Gasket and metal washer which fits inside the housing.
4. The bolts shall be stainless steel, heavy zinc electroplated on steel Type GS of ASTM-A164, or of a metal of adequate strength that will not rust.

Serrated Locking Ring-Detail

* It would be acceptable for a threaded nipple to be welded to the Wire Outlet.

SPAN WIRE CLAMP, BALANCE ADJUSTER, AND WIRE OUTLET

Combination Assembly for

Vertical Span Wire Mounted Traffic Signal and Flashing Beacon Heads
