

Table of Contents

	<u>Page</u>
Chapter 1 – Introduction	1-1
Study Purpose	1-1
Study Area	1-2
Project Development Process	1-3
Goals and Objectives	1-5
Study Development and Coordination.....	1-8
Study Technical Memoranda	1-8
Chapter 2 – Public Involvement	2-1
Steering Committee	2-1
Steering Committee Meeting One, June 9 th , 2003	2-2
Steering Committee Meeting Two, April 26 th , 2004	2-2
Steering Committee Meeting Three, November 17 th , 2004.....	2-2
Corridor Stakeholder Meetings.....	2-3
Transportation Issues	2-3
Engineering Issues	2-4
Environmental/Social Issues.....	2-4
Public Meetings	2-4
Series One, September 16 th to 18 th , 2003.....	2-4
Series Two, May 4 th to 6 th , 2004.....	2-5
Series Three, November 30 th to December 2 nd , 2004	2-5
Newsletters.....	2-5
Website	2-6
Chapter 3 – Existing Conditions	3-1
Major Area Highways.....	3-1
SH 288	3-1
FM 521 (Alameda Road).....	3-2
Business SH 288	3-2
Planned Area Improvements.....	3-3
Highway Characteristics	3-3
Right-of-Way	3-4
Horizontal Alignment	3-4
Vertical Alignment and Clearance.....	3-4
Typical Cross Sections.....	3-5
Intersections	3-6
Transit Facilities.....	3-7
Intermodal Facilities	3-9
Utilities and Railroads.....	3-9

Table of Contents

Major Traffic Generators	3-10
Traffic Volumes	3-10
Level-of-Service (LOS)	3-13
Accident History	3-14
Existing Land Use.....	3-15
Demographics and Social Conditions.....	3-16
Age.....	3-17
Race and Ethnicity	3-17
Family Characteristics	3-17
Household, Incomes, and Poverty	3-17
Incomes.....	3-18
Housing Estimates and Projections.....	3-19
Home Values.....	3-19
Employment Estimates and Projections.....	3-20
Occupations and Workforce	3-20
Population Mobility	3-20
Existing Environmental Conditions.....	3-20
Biological Resources	3-22
Wetlands and Water Resources	3-23
Geology, Soils, and Farmlands	3-25
Air Quality and Noise	3-26
Hazardous Materials	3-27
Cultural Resources.....	3-27
Visual Quality and Aesthetics.....	3-28
Chapter 4 – Initial Alternatives.....	4-1
Description of Initial Alternatives	4-1
Initial Alternative One: No Build	4-1
Initial Alternative Two: TSM/TDM/ITS Improvements	4-2
Initial Alternative Three: General Purpose/Single Occupancy Vehicle Lanes.....	4-3
Initial Alternative Four: High Occupancy Vehicle (HOV) Lanes	4-3
Initial Alternative Five: Managed Lanes	4-4
Initial Alternative Six: Express Toll Lanes.....	4-4
Initial Alternative Seven: Light Rail.....	4-5
Initial Alternative Eight: Commuter Rail	4-6
Initial Alternative Nine: Truck Lane.....	4-6
Additional Improvements	4-7
Evaluation of Initial Alternatives.....	4-7
Traffic and Mobility Impacts.....	4-8
Environmental and Socioeconomic Impacts.....	4-13

Table of Contents

Engineering and Cost Considerations.....	4-16
Summary of Initial Evaluation Results	4-20
Chapter 5 – Viable Alternatives	5-1
Description of Viable Alternatives	5-1
Detailed Evaluation of Viable Alternatives	5-7
Traffic and Mobility Impacts	5-10
Economic Impacts	5-17
Social and Environmental Impacts.....	5-23
Engineering and Costs.....	5-29
Rail Alternatives.....	5-37
Public Acceptance	5-40
Summary of Detailed Evaluation Results	5-42
Chapter 6 – Most Feasible Alternative	6-1
Selection of Most Feasible Alternative.....	6-1
Characteristics of Most Feasible Alternative.....	6-2
Major Highway Improvements	6-2
Transit Improvements.....	6-3
Other Improvements.....	6-4
Impacts of Most Feasible Alternative	6-6
Traffic/Mobility Impacts	6-7
Economic Feasibility	6-8
Environmental/Socioeconomic Impacts.....	6-9
Engineering	6-11
Public Acceptance	6-14
Rationale for Selecting Most Feasible Alternative	6-14
Conformance with Study Goals	6-14
Consistency with Area Transportation Plans	6-16
Remaining Project Development Activities.....	6-19
Appendix A – Conceptual Plan and Profile for Most Feasible Alternative	
Appendix B – H-GAC Approval for Congestion Mitigation Analysis
