Chapter 1

Introduction

This page left blank intentionally.

Chapter 1 — Introduction

Purpose

The 2006-2008 Transportation Improvement Program (TIP) is a cooperatively developed three-year program of transportation investments in public transit, highways, traffic management, and other transportation and air quality related activities. It is formulated for the Houston-Galveston Transportation Management Area (TMA) which is comprised of eight counties: Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, and Waller. The Environmental Protection Agency (EPA) has designated all eight counties as ‘non-attainment’ for the pollutant ozone. Therefore, the transportation improvements contained in the 2006-2008 TIP must comply with air quality regulations for vehicle emissions that contribute to the formation of ground-level ozone.

The TIP is compiled every two years by the Houston-Galveston Area Council (H-GAC) in its role as the metropolitan planning organization (MPO) for transportation planning in the eight county TMA. This document is prepared under the guidance of the Transportation Policy Council (TPC) for the Houston-Galveston TMA. The TIP is the product of the collaborative efforts of local governments, local transportation agencies and the Texas Department of Transportation (TxDOT). The TIP is incorporated into a Statewide Transportation Improvement Program (STIP) with the approval of the Texas Transportation Commission (TTC), the Federal Transit Administration (FTA), and the Federal Highway Administration (FHWA).

The 2006-2008 TIP identifies priority roadway and transit projects scheduled for implementation between September 1, 2005 and August 31, 2008. All roadway and transit projects funded under Title 23 and Title 49 by the U.S. Department of Transportation are required to be listed in the TIP.¹ In addition, locally funded transportation improvements of regional significance are inventoried and included in the TIP for the conformity analysis requirements of the Clean Air Act Amendments of 1990 (CAAA).²

¹ All projects in this document proposed for federal funding were initiated in a manner consistent with the federal guidelines in Section 450.204, Subpart B, of Title 23 of the Code of Federal Regulations and Section 613.200, Subpart B, of Title 49 of the Code of Federal Regulations.

² The “Guidance for Determining Conformity of Transportation Plans, Programs and Projects with Clean Air Act Implementation Plans during Phase 1 of the Interim Period” was issued jointly by the U.S. Department of Transportation and the U.S. Environmental Protection Agency. Section 5.3.3 of this guidance maintains that a precondition to the conformity determination is a showing of emissions reductions between the baseline transportation system and the system that results by adding federally funded projects and non-federally funded projects required in the TIP. The baseline transportation system includes existing facilities and locally funded projects.

MPO Structure

In accordance with federal law, H-GAC has been designated by the Governor of Texas as the MPO for transportation planning for the Houston-Galveston TMA. The MPO designation is made through an agreement between the H-GAC Board of Directors and the Governor of the State of Texas. The initial MPO designation by the Governor was in April of 1974. The Governor's most recent MPO designation was made in 1988. As the MPO, H-GAC is responsible for ensuring the successful regional coordination and integration of federal, state and local transportation planning efforts taking place within the region, as well as developing transportation programs and plans for the urbanized areas of the Houston-Galveston TMA.

Transportation Policy Council (TPC)

The Transportation Policy Council (TPC) consists of 24 members representing cities, counties, TxDOT, the Metropolitan Transit Authority of Harris County (METRO) and three at-large members appointed by the H-GAC Board of Directors see **Appendix K** for a listing of members. The TPC was established to provide policy guidance and overall coordination of the multimodal planning activities within the region. TPC approval is required for the use of federal funds for transportation projects and services within the eight-county TMA.

Technical Advisory Committee (TAC)

The Technical Advisory Committee (TAC), appointed by the TPC, is comprised of representatives of member governments and special citizen interest groups with expertise in transportation planning see **Appendix K** for a listing of members. The TAC assists the TPC in coordinating the TIP, the Regional Transportation Plan (RTP) and other intermodal planning activities. The TAC reviews and evaluates H-GAC's regional transportation plans and the TIP, and provides its recommendations to the TPC. The TAC's TIP Subcommittee also plays a critical role in this process. The TIP Subcommittee is appointed by the full TAC on an ad-hoc basis to develop recommendations regarding TIP development.

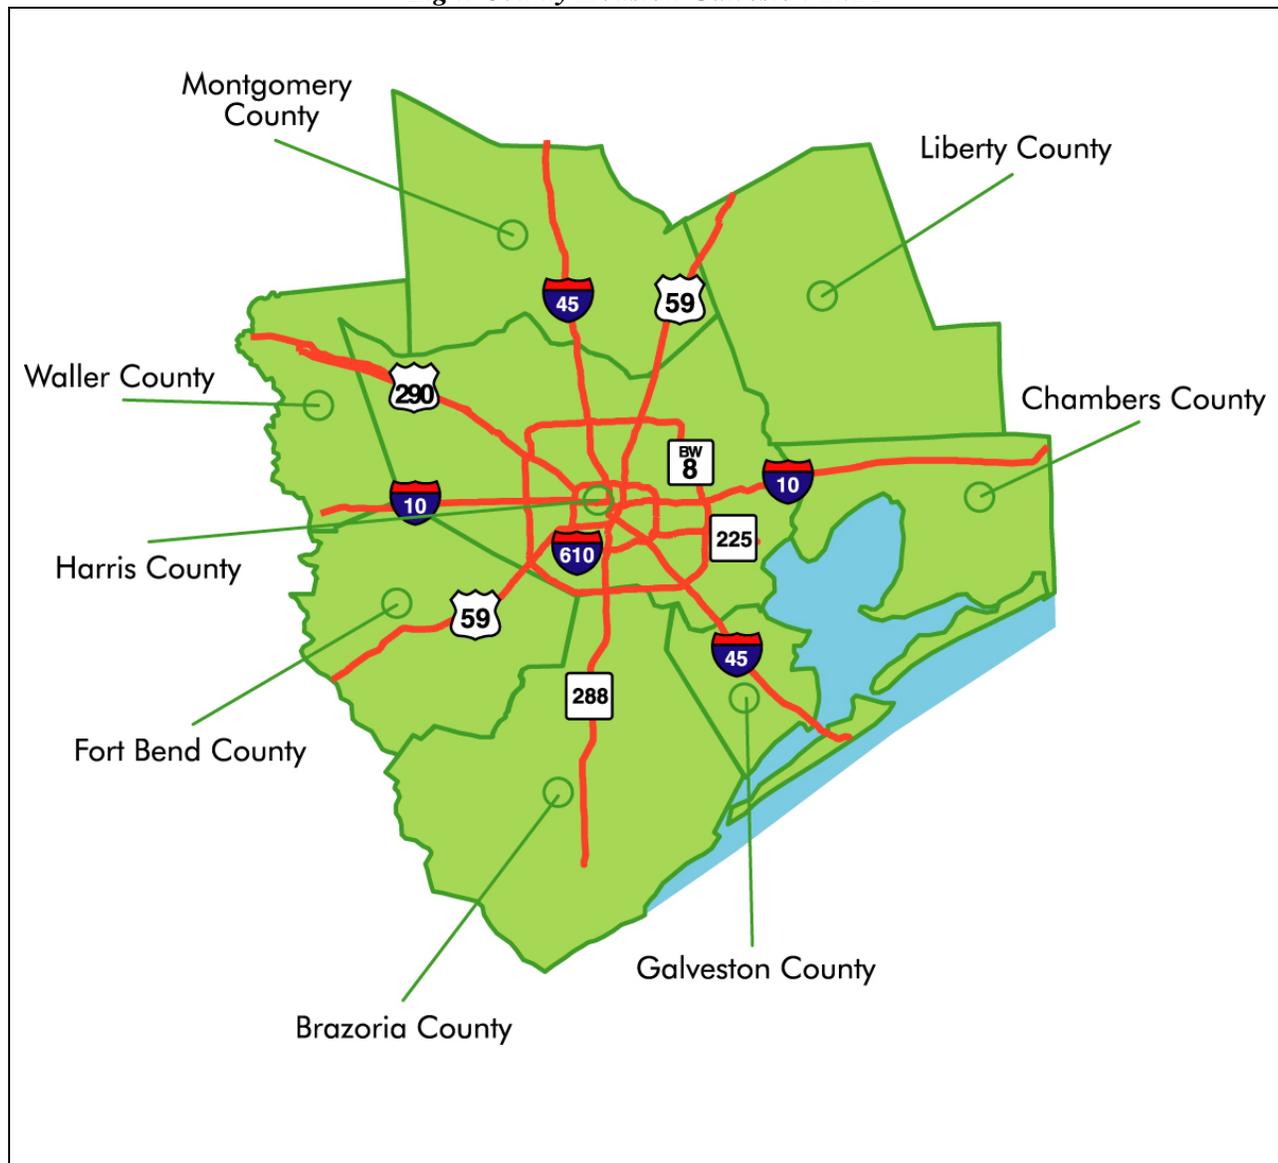

H-GAC Board of Directors

The H-GAC Board of Directors membership consists of local elected officials representing county governments, cities, school districts and conservation districts. The Board of Directors and the TPC have complementary transportation planning roles. The Board of Directors establishes the overall policy for comprehensive planning and coordination for the region. The TPC, on the other hand, is responsible for providing specific policy guidance for the multimodal transportation planning and development initiatives within the region.

Houston-Galveston Transportation Management Area (TMA)

The boundaries of the Houston-Galveston TMA have been endorsed by elected officials from the across the region and by the TPC. The urbanized areas within the TMA are subject to revision following each census. **Figure 1-1** shows the Houston-Galveston TMA. The TMA coincides with the eight-county ozone non-attainment area, which includes Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, and Waller counties.

Figure 1-1
Eight-County Houston-Galveston TMA

Transportation Equity Act for the 21st Century (TEA-21)

As the region's MPO, H-GAC has a significant role in the transportation and air quality planning process, which in turn determine the future allocation of transportation funds. The Transportation Equity Act for the 21st Century (TEA-21) authorized the Federal surface transportation programs for highways, highway safety and transit for the 6-year period from 1998 through 2003.

TEA-21 consolidated the sixteen planning factors previously established under ISTEA into seven broad "areas" to be considered in the planning process, which include:

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency; and
- Increase the safety and security of the transportation system for motorized and non-motorized users; and
- Increase the accessibility and mobility options available to people and for freight; and
- Protect and enhance the environment, promote energy conservation, and improve quality of life; and
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight; and
- Promote efficient system management and operation; and
- Emphasize the preservation of the existing transportation system.

The former U.S. Secretary of Transportation sums up these goals by stating:

"TEA-21 will shape America's future by ensuring accessible, integrated, and efficient transportation. It will advance America's economic growth and competitiveness, domestically and internationally, and it will protect and enhance communities and the natural environment. It expands opportunity through a continued strong disadvantaged business enterprise program and a new program to help those making the transition from welfare rolls to payrolls. It establishes border crossing and trade corridor programs crucial for international commerce".

Rodney Slater, Former U.S. Secretary of Transportation

Surface Transportation Extension Act of 2004

The 2006-2008 TIP was developed under an extension of TEA-21 referred to as STEA04 part V. This extension approved by the President on September 30, 2004 continues the components of the Federal-aid Highway Program for 8 months. Documentation in this extension emphasizes that no Federal-aid highway program obligations may be made after May 31, 2005. The 2006-2008 TIP is contingent upon approval of new legislation.

Development of the FY 2006-2008 TIP

Scope

The 2006-2008 TIP has been developed in accordance with the requirements of TEA-21 and STEA04-V guidance received from FHWA and FTA. Specific requirements of the TIP and a brief discussion of how H-GAC met the requirements are outlined below:

- **The TIP must include a priority list of projects to be implemented during the three-year TIP period.**

The 2006-2008 TIP contains a list of priority roadway and transit projects to be implemented over the next three years. To ensure that high priority, cost-effective projects were selected; all proposed projects were reviewed and adopted by the TPC.

Each year was financially constrained to funding availability. Together, this ensures that the most cost-effective projects are given top priority and implemented at the earliest possible opportunity given the funding and construction constraints.

- **The TIP must include a financial plan which shows the source of funding for the projects contained therein.**

H-GAC, TxDOT and METRO other transportation agencies in the region have worked to identify the amount of funding available annually for highway and transit transportation improvements. The 2006-2008 TIP includes a separate financial plan for highway and transit elements, which documents these amounts.

- **Projects identified in the TIP must be consistent with the Regional Transportation Plan.**

The method used to select projects for the 2006-2008 TIP is consistent with H-GAC's regional transportation planning process. The same planning process and principles have been used to update the 2025 RTP, and conform to the requirements of the CAAA. The 2006-2008 TIP is endorsed by the TPC, subject to the condition that projects selected for the TIP be included in a conforming metropolitan transportation plan.

- **There must be reasonable opportunity for public comment prior to approval of the TIP.**

To ensure adequate public involvement in the 2006-2008 TIP development process, H-GAC has a Technical Advisory Committee (TAC) consisting of public and private sector representatives. This Committee represents the Houston-Galveston metropolitan area and is responsible for recommending projects to the TPC for inclusion in the TIP.

In addition, a thirty-day public comment period will be observed prior to approval of the final document.

- **The TIP must cover the entire metropolitan area, including the designated non-attainment area.**

All projects in the eight-county TMA selected for federal-aid are included in the TIP. Federal formula transit funding for each urbanized area is included within the boundaries of the TMA and in the TIP.

- **The TIP must show progress in implementing projects from the previous TIP periods.**

The 2004-2006 TIP identifies priority roadway and transit projects scheduled for implementation between September 1, 2003 and August 31, 2006. **Appendix A** includes the major Highway and CMAQ projects that have been let for construction within the 2004-2006 TIP timeframe.

Project Selection for Inclusion in the TIP

H-GAC, as the MPO for the Houston-Galveston TMA, has project-level programming responsibilities for Surface Transportation Programs-Metropolitan Mobility (STP-MM) funds, Congestion Mitigation/Air Quality Improvement (CMAQ) funds and Transit Program Formula funds in the urbanized area. The TPC, in its role as the policy-making body of the MPO, is responsible for the selection of projects funded through the above categories in consultation with TxDOT and the relevant transportation agencies. In addition, projects selected by TxDOT as part of the National Highway System (NHS), STP Enhancement, and STP Safety projects also require the endorsement of the MPO prior to inclusion in the TIP.

The projects programmed for STP-MM, CMAQ and transit funds are selected based on a fully competitive process. Public and local elected officials' involvement is integral to this process. The TPC has previously approved the following project selection procedures:

- The approved TIP shall be utilized for programming projects within the urban area.
- Any project listed in the first year of the approved TIP shall be considered in the first priority and may be implemented as soon as plans are completed and funds are appropriated.
- Procedures used to evaluate, prioritize, and select projects funded under STP-MM, CMAQ, and FTA Section 5307 are described in **Appendix B** of the 2006-2008 TIP.
- Implementing agencies are authorized to proceed with projects whose actual costs do not exceed their estimated costs by more than 25%, subject to funding availability and assurance that cost overruns will not delay implementation of other selected projects.
- The MPO must be notified by the appropriate implementing agency of any project programmed in the first year whose implementation must be delayed beyond the first year.

The project selection procedure was developed cooperatively between the TxDOT and the MPO.

Public Involvement

The TIP process began in January 2004 with the meetings of the TIP Subcommittee to the TAC. Workshops and a project open house were held through the development process to educate the public regarding the project selection process and to provide an opportunity for comment. In accordance with the Transportation Public Involvement Plan (TPIP), a thirty-day public comment period will be observed prior to final adoption of the TIP. A public meeting will be held in February 2005 at the Houston-Galveston Area Council to solicit comments from the public. A record of the public comments and H-GAC's response will be included in **Appendix G**.

TIP Approval

The Draft 2006-2008 TIP will be submitted to the Texas Department of Transportation – Transportation Planning & Programming Division (TxDOT-TPP) in March 2005. A thirty-day public comment period will be observed prior to final adoption of the TIP in April 2004.

The Projects Review Committee will also review the TIP. The Projects Review Committee is one of 10 standing committees of the H-GAC Board of Directors. H-GAC has been designated by the Governor's Office as the "Regional Review Agency" responsible for conducting the Texas Review and Comments System (TRACS) process³. The TRACS process constitutes additional coordination to assure that all projects included in the TIP are consistent with regional transportation plans and policies. The Projects Review Committee is critical to the TRACS process and is responsible for reviewing TIP projects and recommending action to the H-GAC Board of Directors.

Final action by the H-GAC Board of Directors serves as the endorsement by the MPO that the projects in the TIP are consistent with local plans and that local governments have been satisfactorily involved in the development of those projects. Following its completion, the TIP is submitted to TxDOT in Austin, as well as the FHWA and FTA for federal review. TxDOT will then merge the document with TIPs from other regions in the State of Texas to form a STIP. The 2006-2008 STIP will be adopted by the Texas Transportation Commission in July of 2005.

Amending the TIP

The TPC may amend the TIP, as long as proposed amendments are consistent with the RTP, the expected availability of federal, state and local funds and the RTP's finding of air quality conformance. If the TIP should require a major amendment, a public meeting and an additional thirty-day public comment period will be observed to discuss the proposed action(s). A major amendment is classified as the addition or deletion of a project with an implementation cost over \$5 million (excluding rehabilitation, maintenance and safety projects). Public comment on project additions or deletions of less than \$5 million may be sought at the discretion of the TPC. As long as a project's description, scope or expected environmental impact has not materially changed, the TPC may approve changes to project funding without benefit of a separate public meeting.

Amendments Requiring TPC Approval

The TPC must approve all changes to the TIP, unless there is an "Emergency Action" deemed necessary by the applicable federal agency or, in the case of State funded actions, by the Governor of Texas. In addition, minor changes to the TIP may be approved through administrative action as described below.

³ The new review and comment system was developed pursuant to Executive Order 12372 (as amended by Executive Order 12416), issued in July 1982, and following public laws: Section 204 of Demonstration Cities and Metropolitan Development Act of 1966, Intergovernmental Cooperation Act of 1968, and National Environmental Policy Act of 1969.

MPO Director Approval of Administrative Amendments

In its adoption of the TIP, the TPC authorized the MPO Director to approve certain “administrative changes” to the TIP at the request of or with the concurrence of the TxDOT. This policy was adopted to facilitate approvals for minor project cost changes, changes in funding source, clarification of the project scope and movement of projects within the three programming years of the TIP. In the course of implementing TIP projects, these changes may be required because of the differences between cost estimates contained in the TIP and actual contract cost, unexpected delay in project implementation, the opportunity to advance project implementation due to actual funding levels which were higher than expected, etc.

The MPO Director may approve the following administrative changes, with the concurrence of the TxDOT:

- Project cost overruns not exceeding 25% of total project cost or less than \$500,000. Should cost overruns require delay of one or more projects to a latter implementation year, TPC review and approval will be required.
- Changes to project funding category.
- Changes in project priority within the three funding years of the TIP.
- Changes in priority to non-State sponsored projects must also have the concurrence of the project sponsor.
- Clarification of project scope. Minor changes to project limits, description or scope, which does not materially change the project’s function, cost or environmental impact, may be approved by the MPO Director.

Revisions to the STIP

TxDOT merges TIPs from other regions in the State of Texas to form a Statewide Transportation Improvement Plan (STIP). TxDOT revises the STIP, as necessary, on a quarterly basis (November, February, May, August). Major amendments to the TIP are incorporated into the STIP on this quarterly cycle. The addition or deletion of a new project to the TIP is an example of a TIP amendment that would require a STIP revision. Minor revisions, such as clarification of project scope or changes in funding category would not require STIP inclusion.

The 2006-2008 TIP incorporates the use of “statewide programs”. In concurrence with the Federal Highway Administration (FHWA) and TxDOT, the MPO will implement the use of statewide programs to maximize the provisions for grouping projects that are not deemed to be regionally significant as one line item, as allowed for in Title 23 USC Section 135 Statewide Planning. The incorporation of statewide programs in the TIP will reduce the number of formal TIP/STIP revisions required. See **Appendix J** for statewide programs individual projects.

Environmental Issues

National Environmental Policy Act (NEPA) of 1969

Environmental factors can have a major impact on regional development patterns and the resulting transportation system. Environmental considerations can affect the location, type and design of new facilities, as well as the redevelopment of old ones. Individual projects are subject to environmental assessments or impact statements. The National Environmental Policy Act (NEPA) of 1969 requires an Environmental Assessment (EA) on any federally funded or permitted project with the potential to impact the natural environment. An EA results in either a Finding of No Significant Impact (FONSI) or an indication of the potential for significant environmental impacts. If potentially significant environmental impacts are ascertained, an Environmental Impact Statement (EIS) must be prepared. An EIS requires documentation of adverse and positive environmental effects, the evaluation of alternatives, and an assessment of the relationships between short-term uses of the impacted environmental resource as opposed to its long-term productivity. The EIS may result in a Record of Decision (ROD) that allows the project to proceed with mitigation strategies. If there are no feasible and/or effective mitigation strategies or alternatives, the project may not proceed.

Under the Final Conformity Rule for air quality, certain highway and transit projects are exempt from the requirement that an air quality conformity determination be made. NEPA projects that are not covered by the conformity exempt list must be included in the TIP and RTP. All projects currently undergoing NEPA determination with an implementation time frame beyond the 3-year horizon of the TIP are included in **Appendix D**.

Air Quality Conformity

With the signing of the Clean Air Act Amendments of 1990 (CAAA) into law, the Houston-Galveston region was designated non-attainment for exceeding the 1-hour National Ambient Air Quality Standard (NAAQS) for the pollutant ozone. On a scale ranging from marginal to extreme, the Houston-Galveston region was labeled as "Severe-II" and given until the year 2007 to attain the ozone standard. The CAAA requires each state to submit a state implementation plan (SIP) to the U.S. Environmental Protection Agency (EPA). The SIP is a legally binding document that defines the structure through which emissions will be reduced and the ozone standard will be attained. As the central focus of the air quality planning process, the SIP ties in transportation planning through the conformity provisions in the CAAA. These provisions verify that federal actions on transportation projects are consistent with the air quality objectives contained in the SIP. In many cases, transportation-related control measures identified in the SIP are contained and funded in the Regional Transportation Plan (RTP) and the Transportation Improvement Program (TIP).

The CAAA requires the EPA to make rules regarding conformity determinations for transportation plans and programs. In response to this requirement, the EPA published its Criteria and Procedures for Determining Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Funded Under Title 23 U.S.C. in the Federal Register on November 24, 1993. This conformity rule requires metropolitan planning organizations (MPOs) and the U.S. Department of Transportation to make conformity determinations on metropolitan transportation plans and transportation improvement programs before they are adopted, approved, or accepted in air quality non-attainment areas.

The final conformity rule requires MPOs in air quality non-attainment areas to conduct conformity determinations on their plans and TIPs. In order for highway and transit projects to be federally funded, the projects must be part of a conforming RTP and TIP. The MPO may not adopt a non-conforming RTP or TIP. The MPO must submit a conforming RTP and TIP to FHWA for its approval. The final conformity rule emphasizes the emissions analysis of the RTP. The regulation states that a TIP, which is a subset of a conforming RTP is, by definition, a conforming TIP. The final conformity rule also shifts the emissions analyses from the TIP to the RTP. The regulation states that if the TIP is a subset of a conforming RTP, then the conformity determination for the plan may also be used for the TIP.

The conformity rule requires that conformity analyses adhere to a number of requirements:

- The analysis process must use the most recent planning assumptions in force at the time of the conformity determination and employ the latest available and approved emissions model.
- The transportation plan and TIP must provide for the timely implementation of transportation control measures (TCMs) from the applicable SIP.
- A regional emissions analysis must be conducted for significant air quality milestone years and the RTP horizon years.
- Volatile organic compounds (VOCs) and nitrogen oxide (NO_x) emissions from each analysis year must be less than the motor vehicle emissions budget (MVEB) established in the applicable SIP.
- Emissions from each analysis year must be less than 1990 baseline emissions levels.

The EPA has put into place a new 8-hour ozone standard. On a scale ranging from marginal to extreme. The Houston-Galveston region was designated as “Moderate” and given until the year 2010 to attain the ozone standard. Accompanying this new standard, the EPA published a new conformity rule on July 1, 2004. This rule outlines how conformities are to be conducted for areas designated as non-attainment of the 8-hour standard.

The last conformity was approved on June 4 2002. The current conformity must be approved by the Federal Highway administration by June 4, 2005 to avoid a lapse. The 2006-2008 TIP projects either come from the conforming RTP or they are exempt from the air quality conformity determination. As a subset of the RTP, the 2006-2008 TIP therefore conforms to the air quality conformity requirements established by the CAAAs. Further detail on the 2025 RTP conformity analysis is found in **Appendix H**.

Congestion Management System (CMS)

The Transportation Policy Council (TPC) adopted the Congestion Management System (CMS) Plan in October 1997. The CMS Plan defines the episodic procedure for monitoring added-capacity and Transportation Control Measure (TCM) projects being implemented. The CMS document was revised in December 1997, May 1998, March 1999 and most recently December 2004. These revisions further defined the CMS Significant Roadway Network roadways which are functionally classified as major arterials and above in urban areas, and minor arterials and above in rural areas. The CMS plan stipulates that all Federal and State funded added capacity projects are subject to project-level Congestion Mitigation Analysis (CMA).

The Congestion Management System (CMS) requires the application of cost-effective demand and system management measures as the first component of all congestion reduction strategies. Added capacity roadway projects are justified only if available cost-effective demand management and system management strategies fail to reduce vehicular congestion to acceptable levels. Where demand or system management projects are feasible and cost-effective, project sponsors, or relevant implementing agencies, and the MPO must commit to their implementation or incorporation into a proposed added-capacity project as a pre-condition to federal funding assistance. Project design, concept, and scope must also be consistent with any selected management strategies. As the MPO, H-GAC is responsible for implementing the CMS in the TMA. **Figure 1-2** depicts the CMS analysis process.

Added-Capacity projects with current Findings of No Significance (FONSI) or Records of Decision (ROD) as of the adoption of the CMS Plan are considered “grandfathered” and exempt from CMA. The cut-off date for these “grandfathered” projects was April 1993. In addition, added-capacity projects within the precincts of Major Investment Studies (MIS) shall be the responsibility of the implementing agencies and their consultants, although the CMA shall be reviewed by the MPO.

H-GAC CMS Implementation Efforts

The CMS implementation serves as a response to the long range planning expectations identified in ISTEA, the FHWA/FTA Final Guidance on ISTEA Metropolitan planning and Management Systems, and the FHWA/FTA Rules on Metropolitan Transportation Plans. The evaluation process began with a detailed assessment of transportation improvements, including congestion mitigation strategies, bikeway and pedestrian facilities, rail facilities, high-occupancy vehicle lanes, and toll road facilities. The CMS Plan is an integral part of, and consistent with the long-range regional transportation plan.

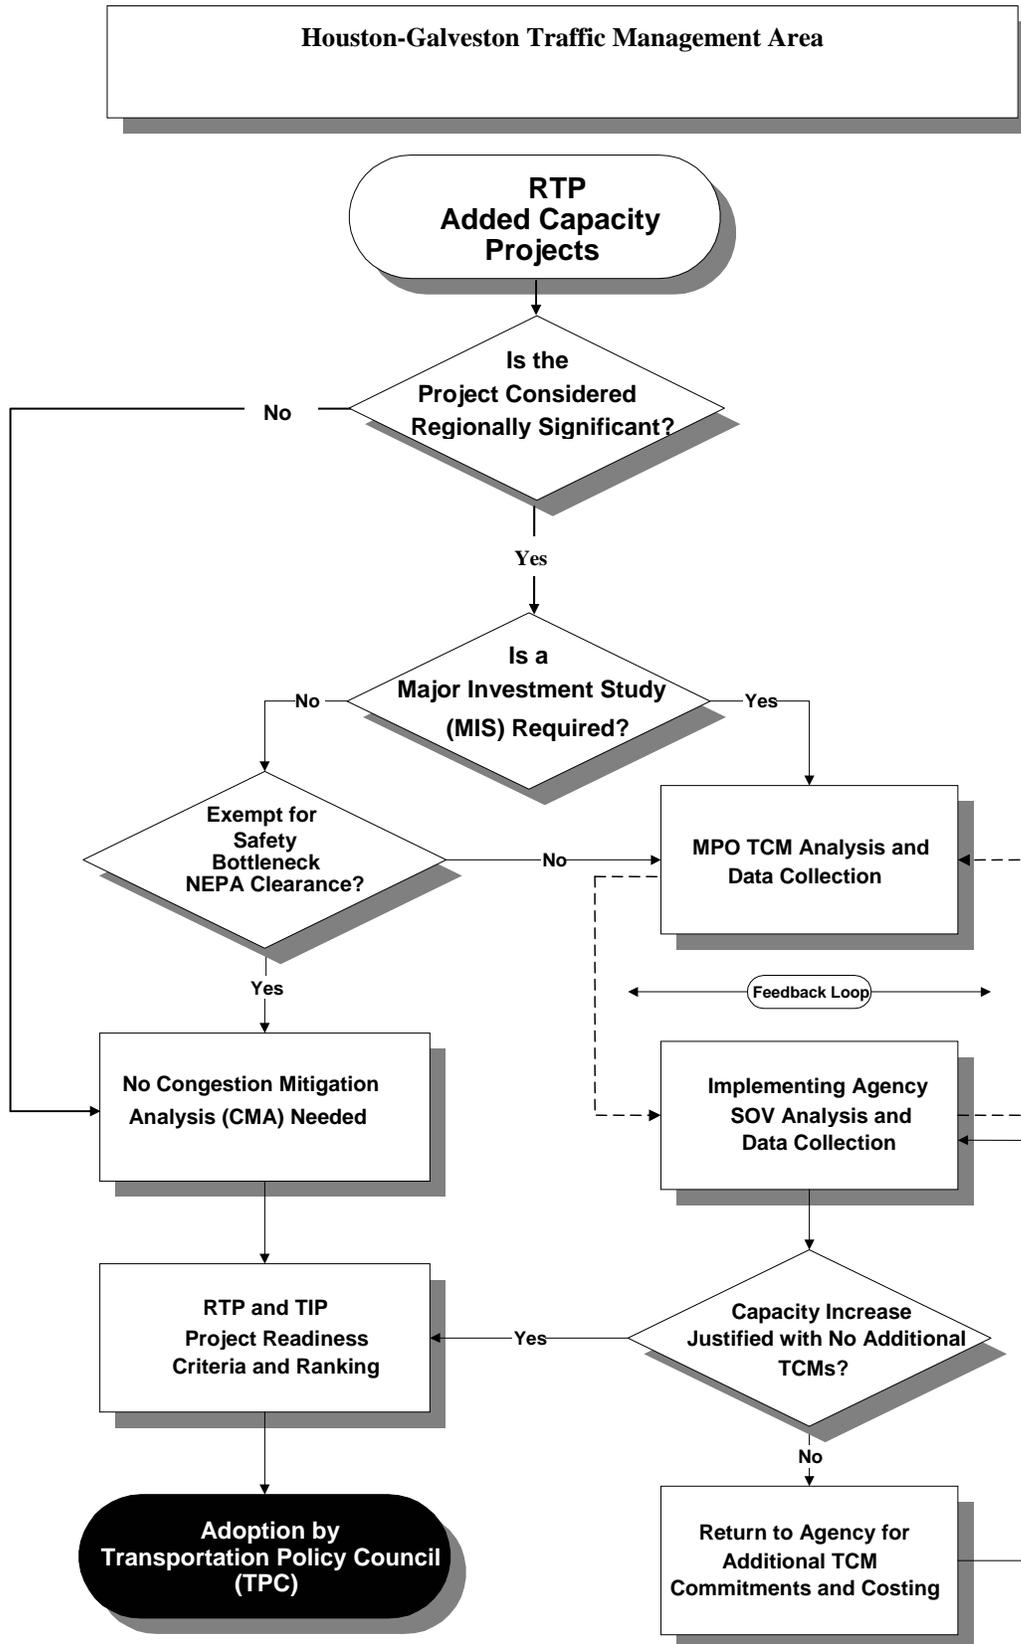

Setting mobility standards for the CMS provides a quantitative tool to benchmark system performance and congestion and to analyze the impacts of any change. If actual performance falls below the standard, actions may be warranted to restore or improve the level of mobility. H-GAC chose to use the Level of Mobility performance measure as its initial congestion mitigation standard. Level of Mobility (LOM), which is a ratio of roadway capacity and traffic volume, is based upon directional 24 hour per lane volumes for existing and committed roadways. Most of the Transportation Control Measure (TCM) strategies that are included in the CMS are considered to be relatively low cost solutions to congestion problems, as compared to the traditional capital-intensive solution of solving operational and travel demand problems by adding single-occupant vehicle (SOV) capacity.

Added capacity projects included in the 2025 RTP were reviewed for alternative mitigating TCMs by evaluating probable LOM impacts of each identified TCM; this process is called Congestion Mitigation Analysis (CMA) and is described in the next section. There are no additional TCMs that preclude the need for added-capacity in these selected projects. However, there are TCMs, such as signalization and intersection improvements, which the implementing agency should consider during preliminary engineering of these projects. The CMS plan provides a methodology to address all of the proposed added-capacity projects, regardless of status at the time the CMS plan was implemented. The logistics of the CMS process provides a method for sharing the best available project information, tools, and expertise between H-GAC and the implementing agencies.

Congestion Mitigation Analysis (CMA) Efforts

Four Levels of Mobility (LOM) are used to define congestion as adopted by the TPC. These levels are: Tolerable, Moderate, Serious and Severe. Roadway segments, which fall above the Tolerable Level, (i.e. LOM or Volume/Capacity Ratio ≥ 0.85) are considered congested and added-capacity for the roadways are considered to be justified. It must be remembered that no added capacity project could be included in the TIP until a CMA is performed.

Chapter 2 —Highway Projects

Federal and State Funding Categories

This chapter of the 2006-2008 TIP contains projects to be funded using a federal or state funding source. These projects are grouped under the funding categories set by TEA-21 and the TxDOT Unified Transportation Plan (UTP) as shown in the detailed listing on the following pages. In 2002, TxDOT revised the funding categories for the UTP. This revision reduced the number of funding categories to 12 instead of 16. **Appendix C** shows a detailed description of the funding categories including programming authority and funding breakdowns. Table 2-1 shows a brief look at the funding categories.

TABLE 2-1
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
FEDERAL AND STATE FUNDING CATEGORIES

	CATEGORY
1	Preventative Maintenance & Rehabilitation
2	Metropolitan Area (TMA) Corridor Projects
3	Urban Area (Non TMA) Corridor Projects
4	Statewide Connectivity Corridor Projects
5	Congestion Mitigation Air Quality Improvement (CMAQ)
6	Structures Replacement & Rehabilitation
7	Metropolitan Mobility/Rehabilitation (STP-MM)
8	Safety
9	Transportation Enhancements
10	Miscellaneous
11	District Discretionary
12	Strategic Priority
ROW	Right-of-Way

Organization of this Chapter

Chapter 2 of the 2006-2008 TIP contains the individual projects funded for the TIP. This project listing is separated by each program year in which the project is estimated to let to contract in. The projects are then sorted by the funding category, street name, and project limits. The details of each project are explained in **Table 2-2**.

TABLE 2-2
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
CHAPTER 2 ORGANIZATION

Fiscal Year	The program/fiscal year where the project is estimated to let to contract.
District	The district where the project is located.
County	The county where the project is located.
CSJ Number	Control Section Job Number is a number given to projects that are implemented by TxDOT.
Notes	Specific notes regarding the project. e.g., if the project is a TCM SIP Commitment, 3-year construction cycle, carryover from 2004-2006 Appendix I etc.
Let Date	Estimated date for project to be let to contract.
MPO ID	Sequential number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
Project Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
Street/Highway	Street/Highway where project is located. If project is not located on a specific street then VA or N/A is listed for street.
Limits From	Beginning limit of the project.
Limits To	Ending limit of the project.
Project Description	Scope of work or description of project as submitted by the sponsor.
Sponsor Proj ID	Number sponsor assigns their projects such as a CIP number.
Phases	This is the code(s) to indicate the project's phase(s) in the TIP/STIP. C=Construction, E=Preliminary Engineering, R=Right-of-way and T=Transfer of Funds
Length	Length of the project in miles.
Lanes	Existing and Proposed lanes for added capacity projects
Funding Category	The funding category or categories the project is funded in. See Appendix C for detailed descriptions of funding categories.
Latest Est Cost	Latest estimated cost of project.
Federal Cost	Federal funds programmed for project. (from Authorized Amount)
State Cost	State funds programmed for project. (from Authorized Amount)
Local Cost	Local funds programmed for project. (from Authorized Amount)
Authorized Amount	Amount programmed for the project.

Chapter 3

Transit Projects

This page left blank intentionally.

Chapter 3 — Transit Projects

This chapter of the TIP contains projects funded through Federal Transit Administration (FTA) and the State Public Transportation Fund (PTF). The following table lists the United States Code section reference number and describes the activity for the transit grant programs funded through the FTA and PTF:

*Table 3-1
Transit Funding Categories*

49 U.S.C. Section	Description
3037	Job Access and Reverse Commute (JARC)
5303	MPO Planning
5307	Urbanized Program
5309	Discretionary
5310	Elderly/Disabled
5311	Rural/Nonurbanized
5313	State Planning
5327	Security

Transit Providers

Five public transit agencies serve the Houston-Galveston TMA: the Harris County Metropolitan Transit Authority (METRO), The District (formerly Brazos Transit System), Island Transit, and Connect Transportation. METRO and Island Transit are public transit agencies providing fixed route and ADA paratransit services. Connect Transportation provides demand-response service in Brazoria County under the rural transit program and the Texas City-LaMarque urbanized area of Galveston County. Most trips provide for medical and social service needs for the elderly and disabled. The District provides service for Montgomery and Liberty Counties. Its commuter service, using the HOV lane on IH 45 North, connects Montgomery County to three major activity centers in Houston: the CBD, the Texas Medical Center, and Greenway Plaza. Colorado Valley Transit provides demand-response service.

METRO is the largest public transit agency in the region, covering a 1,281 square mile service area comprising most of Harris County and small portions of Fort Bend and Montgomery Counties. There are 15 cities in METRO's service boundaries, the largest being the City of Houston. METRO provides the most comprehensive transit service in the region, serving about forty percent of its service area with fixed routes and complementary paratransit service.

Urban Areas and Formula Funds

Large urbanized areas are defined as those with populations greater than 200,000. Small-urbanized areas have populations between 50,000 and 200,000. The Houston Transportation Management Area (TMA) currently consists of the large Houston Urbanized Area (UZA) and two small-urbanized areas, Texas City/LaMarque and Galveston. The 2000 U.S. Census created two new small-urbanized areas, The Woodlands and Lake Jackson/Angleton. The 2000 Census also extended the boundaries of the Houston UZA into parts of Brazoria, Fort Bend, Galveston and Montgomery counties.

The changes in the urbanized area boundaries are significant to the TIP because it impacts the allocation of Section 5307 transit funds. Section 5307 is a formula transit fund with funding apportioned to urbanized areas on the basis of legislative formulas. For small-urbanized areas, the formula is based on population and population density. For large urbanized areas, the formula is based on a combination of bus revenue vehicle miles, bus passenger miles, fixed guideway revenue vehicle miles, and fixed guideway route miles as well as population and population density.

Several jurisdictions are looking into the possibility of creating new transit service or expanding existing service that will utilize Section 5307 funds. Fort Bend County officials are working to establish a countywide transit service that would utilize Section 5307 funds in the urban area of the county to supplement commuter service from Fort Bend County into the City of Houston. The City of Baytown and its partner cities are exploring the option of a transit service in eastern Harris County. The Gulf Coast Center is working with representatives from the Lake Jackson/Angleton urban area to expand its demand response service in that area. The District hopes to utilize Section 5307 funds to operate its commuter service from The Woodlands to the Houston central business district.

Organization of this Chapter

Chapter 3 of the 2006-2008 TIP contains the project listing that identifies individual projects for the transit programs in the TIP. This project listing is separated by each statewide program then sorted by the program year in which the project is estimated to let to contract in. The projects are then sorted by the street name, and project limits. The details of each project are explained in **Table 3-2**.

TABLE 3-2
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
CHAPTER 3 ORGANIZATION

TxDOT District	Number for the State TxDOT District
Project Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
MPO Project ID	Sequential number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
Project Contract Date	The date the project is estimated to let to contract.
Location	Location of project.
Project Description	Scope of work or description of project as submitted by the sponsor.
Fiscal Year	Year the project is estimated to let to contract in.
Funding Category	The funding category or categories the project is funded in.
Federal Cost	Federal cost of the project.
State Cost	State cost of the project.
Local Cost	Local cost of the project.
Total Cost	Current estimated cost of project.

Chapter 4

Locally Funded Regionally Significant Projects

This page left blank intentionally.

Chapter 4 — Locally Funded Regionally Significant Projects

Locally funded regionally significant projects are those projects which should be considered regionally significant, and should be considered to have a significant change in design concept and scope from the effective Regional Transportation Plan (RTP) and Transportation Improvement Program (TIP). Regionally significant projects include, at a minimum, all facilities classified as principal arterial or higher, or fixed guideway systems or extensions that offer an alternative to regional highway travel. Also, these projects include minor arterials that are included in the travel demand modeling process which serve significant inter-regional and intra-regional travel, by connecting rural population centers not already served by a principal arterial, or by connecting with intermodal transportation terminals not already served by a principal arterial. A significant change in design concept and scope is defined as a revision of a project in the RTP or TIP that would significantly affect model speeds, vehicle miles traveled, or network connections. In addition to new facilities, other examples of locally funded regionally significant projects may include: changes in the number of through lanes or length of project (more than one mile); access control; the addition of major intermodal terminal facilities (such as new international bridges, park-and-ride lots, and transfer terminals); and the addition/deletion of interchanges or changing between free and toll facilities.

The following pages list projects considered as locally funded regionally significant projects for the Houston-Galveston TMA.

Organization of this Chapter

Chapter 4 of the 2006-2008 TIP contains the locally funded regionally significant projects. This project listing is sorted by the street name, and project limits. See **Table 4-1** for project details

TABLE 4-1
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
CHAPTER 4 ORGANIZATION

County	The county where the project is located.
MPO Project ID	Sequential number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
Sponsor Project ID	Number sponsor assigns their projects such as a CIP number.
Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
Street	Street/Highway where project is located. If project is not located on a specific street then VA or N/A is listed for street.
From Limit	Beginning limit of the project.
To Limit	Ending limit of the project.
Project Description	Scope of work or description of project as submitted by the sponsor.
Length	Length of the project in miles.
Est Let Date	Estimated date for project to be let to contract.
Total Cost	Current estimated cost of project.

Chapter 5

Financial Plan

This page left blank intentionally.

Chapter 5 — Financial Plan

The TIP contains cost estimates for all capital projects, roadway, transit, bike/pedestrian, air quality improvements, etc., to be implemented in the Houston-Galveston TMA over a three-year period. Projects include those from TxDOT's Unified Transportation Plan (UTP) for the three years covered by the TIP, as well as those submitted by transit agencies based upon their anticipated 2006-2008 grant applications. Like the UTP, the TIP contains only aggregate costs.

TEA-21 requires that the MPO identify all sources of funding that can be reasonably assumed to be available for programming. Projected transportation apportionment totals were obtained from TxDOT federal and state apportionment estimates and updates for the region for FY 2006-2008 and from FTA estimated apportionments published in the Federal Register. However, apportionments remain uncertain until Congress approves a reauthorization bill for transportation.

Apportionment and programmed totals for the 2006-2008 TIP are shown for all eight counties of the TMA on the following pages. This includes Liberty and Chambers counties, which are in TxDOT's Beaumont District. These results indicate that the 2006-2008 TIP is financially constrained.

Self Certification and

Compliance

This page left blank intentionally.

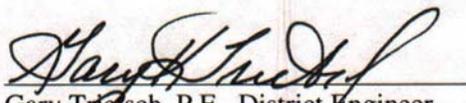

Resolution

WHEREAS, In accordance with 23 CFR 450.334, the TEXAS DEPARTMENT OF TRANSPORTATION, and the Houston-Galveston Area Council Metropolitan Planning Organization for the Houston, Galveston, Texas City, La Marque, Lake Jackson, and Woodlands urbanized areas hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- (1) 23 U.S.C. Sections 134 and 135, 49 U.S.C. Section 5323(l), 23 CFR Part 450.220, and 49 CFR Part 613 (Federal Register, October 28, 1993);
- (2) Title VI of the Civil Rights Act of 1964 and the Title VI assurance executed by each State under 23 U.S.C. 324 and 29 U.S.C. 794;
- (3) Section 1101(b) of the Transportation Equity Act for the 21st Century (Pub. L. 105-178) regarding the involvement of Disadvantaged Business Enterprises in FHWA and FTA funded planning projects (Sec. 105(f), Pub. L. 97-424, 96 Stat. 2100; 49 CFR, Subtitle A., Part 26);
- (4) The provisions of the Americans with Disabilities Act of 1990 (Pub. L. 101-336, 104 Stat. 327, as amended) and U. S. DOT implementing regulations "Transportation for Individuals with Disabilities" (49 CFR Parts 27, 37, and 38)
- (5) The provision of 49 CFR Part 20 regarding restrictions on influencing certain activities; and
- (6) Sections 174 and 176(c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506(c) and (d))

Witness these signatures this 22th day of April, 2005.

 Gary Trietsch, P.E., District Engineer
 Texas Department of Transportation
 Houston District

 Robert Eckels, Chairman
 Transportation Policy Council for the Houston-
 Galveston Transportation Management Area

Chapter 6 —Self Certification and Compliance

MPO Self Certification Compliance

Metropolitan Planning Organizations must certify annually their compliance with federal, state, environmental and civil rights regulations. This document summarizes the H-GAC MPO's compliance with these regulations. The 2025 Metropolitan Transportation Plan Update, the 2006-2008 Transportation Improvement Program, and the 2004-05 Unified Planning Work Program were developed in accordance with DBE, ADA, and CAA requirements. In addition, these plans met all federal requirements prohibiting lobbying, payment or influence of federal employees regarding the award of federal contracts, grants, loans or cooperative agreements.

Metropolitan Planning

The State and the MPO shall annually certify to FHWA and FTA that the planning process is addressing major issues facing their area and is being conducted in accordance with all applicable transportation planning requirements. The planning process will undergo joint review and evaluation by FHWA, FTA and TxDOT to determine if the process meets requirements. The Federal administrators will take the appropriate action for each TMA to either issue certification action, or deny certification if the TMA planning process fails to substantially meet requirements. If FHWA and FTA jointly determine that the transportation planning process in a TMA does not substantially meet the requirements, they may withhold, in whole or in part, the apportionment attributed to the relevant metropolitan planning area or withhold approval of all or certain categories of projects. Upon full, joint certification by FHWA and FTA, all funds withheld will be restored to the metropolitan area, unless they have lapsed. For non-TMA areas TxDOT will determine whether a MPO's transportation planning process substantially meets requirements and act accordingly. (23 CFR 450.334; 49 CFR 613; USC Title 23, Sec. 134; and USC Title 49, Ch. 53, Sec's 5303 – 5306)

H-GAC MPO Response: The 2006-2008 TIP and the 2004-05 UPWP includes the MPO Self Certification, which certifies that in accordance with 23 CFR 450.334, TxDOT and the MPO for the Houston-Galveston, Texas City, La Marque, Lake Jackson and Woodlands urbanized areas have been conducted in accordance with 23 CFR 450.334; 49 CFR 613; USC Title 23, Sec. 134; and USC Title 49, Ch. 53, Sec's 5303 – 5306. In 1997, 2001 and most recently in March of 2004, H-GAC hosted a certification review by officials from FHWA, FTA and TxDOT. Final comments from the first two reviews were received and no significant problems were encountered with the MPO planning process during the desktop review or interviews with MPO staff, TxDOT, TPC officers, or transit providers. Each of the five areas of concern was addressed during 2002. Verbal comments on the 2004 review indicated satisfaction but no formal review letter has been received for the March 2004 Certification Review.

Statewide Planning

The process for developing the transportation plans and programs shall provide for consideration of all modes of transportation and shall be continuing, cooperative, and comprehensive to the degree appropriate, based on the complexity of the transportation problems to be addressed. The State shall coordinate transportation planning activities for metropolitan areas of the State, and shall carry out its responsibilities for the development of the transportation portion of the State implementation plan (STIP) to the extent required by the Clean Air Act. The State will carry out the long range planning processes and the STIP in cooperation and consultation with designated metropolitan planning organizations, affected local transportation officials and affected tribal governments. Transportation improvement programs should include financial plans that demonstrate how the programs can be implemented, indicates resources from public and private sources reasonably expected to be made available for carrying out the programs, and recommend any additional financing strategies for needed projects. (23 CFR 450.220; USC Title 23, Sec. 135; and USC Title 49, Ch. 53, Sec's 5307 – 5311, 5323(l))

H-GAC MPO Response: The 2004-05 Unified Planning Work Program (UPWP), the Regional Transportation Plan (RTP) [UPWP Subtask 4.1], and the Transportation Improvement Program (TIP) [UPWP Subtask 3.1] have been developed in accordance with the consideration of all modes of transportation and shall be continuing, cooperative, and comprehensive to the degree appropriate. Further the RTP and TIP include financial summaries of the projects scheduled for implementation within their respective timeframes.

Title VI, Civil Rights Act of 1964

Title VI prohibits exclusion from participation in, denial of benefits of, and discrimination under federally assisted programs on grounds of race, color, or national origin. Title VI assurance regulations were also executed by each State prohibiting discrimination on the basis of sex or disability. (USC Title 23, Sec. 324 and USC Title 29, Sec. 794)

H-GAC MPO Response: Sections 2.05 Equal Employment Opportunity, 2.06 Affirmative Action, and 2.07 Sexual Harassment of the H-GAC Personnel Policies, adopted March 15, 2004, cite the MPO's compliance with the Title IV, Civil Rights Act of 1964.

Environmental Justice

In support of Title VI regulations, each Federal agency must identify and address, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority and low-income populations. State Highway agency responsibilities are to develop procedures for the collection of statistical data (race, color, religion, sex, and national origin) of participants in, and beneficiaries of State highway programs, i.e., relocatees, affected citizens and affected communities. Recipients of federally assisted programs shall keep documentation, for federal review, demonstrating extent to which members of target populations are beneficiaries of such programs. (EO 12898, 23 CFR 200.9 (b)(4), and 49 CFR 21.9 (b))

H-GAC MPO Response: In conjunction with the 2025 RTP development, regional and sub regional environmental and socioeconomic analyses were conducted, including Title VI & environmental Justice Accessibility. 1.) Summary of average travel times to jobs and other trip purposes by mode for low-income and minority travelers compared to others; 2.) Assessment of the social impacts of transportation projects in low-income and minority areas; and 3) the development of a Transit Need

Index to identify transit need in the region. (See 2004-05 UPWP Subtask 4.1: Development/Maintenance of the RTP). Staff has completed and begun implementing the methodology for the Title VI Environmental Justice element of the 2025 RTP.

Disadvantaged Business Enterprises in Planning Projects

The Disadvantaged Business Enterprise (DBE) program ensures equal opportunity in transportation contracting markets, addresses the effects of discrimination in transportation contracting, and promotes increased participation in Federally funded contracts by small, socially and economically disadvantaged businesses, including minority and women owned enterprises. The statute provides that at least 10% of the amounts made available for any Federal-aid highways, mass transit, and transportation research and technology program be expended with certified DBEs. (TEA-21, Pub. L. 105-178, Sec. 1101(b); CFR 49, Subtitle A, Part 26)

H-GAC MPO Response: In accordance with FTA/FHWA annual reporting requirements, H-GAC filed its annual 2004 DBE report with the TxDOT in a letter dated December 15, 2004 for fiscal year 2004. H-GAC exceeded its 2004 DBE goal of 15% with DBE participation of 73%, and will exceed its 2005 and 2006 goals of 15%. The H-GAC also has a DBE program adopted by the H-GAC Board of Directors in November 1990. This document is being updated and the MPO will be incorporating the Texas Unified Certification Program [TUCP] as its source for DBE certification.

Americans with Disabilities Act of 1990

Programs and activities funded with Federal dollars are prohibited from discrimination based on disability. Compliance with the applicable regulations is a condition of receiving Federal financial assistance from the Department of Transportation. (Pub. L. 101-336, 104 Stat. 327 as amended; 49 CFR Parts 27, 37 and 38)

H-GAC MPO Response: Section 2.08 of the H-GAC Personnel Policies, adopted May 16, 2001, cites the MPO's compliance with the American Disabilities Act of 1990. In addition, the H-GAC was instrumental in assuring its place of business, 3555 Timmons Lane, complies with all ADA requirements. Accessibility Consultants Incorporated performed a building property evaluation in March 1992. As of December 31, 2000, all noted discrepancies were corrected. As of December 31, 2001, ten additional handicapped spaces were added to the level 5 covered area of the parking garage. The most recent inspection was conducted in May 2004. All meetings, funded with Federal dollars or as part of doing business, are held only in ADA compliant facilities.

Restrictions On Influencing Certain Federal Activities

No appropriated funds may be expended by the recipient of a Federal contract, grant, loan, or cooperative agreement to pay any person for influencing a federal employee regarding the award of Federal contracts, grants, loans or cooperative agreements. (49 CFR, Part 20)

H-GAC MPO Response: Sections 3.04 Outside Activities, 3.05 Gifts and Gratuities, 3.06 Conflict of Interest, and 3.07 Political Activity of the H-GAC Personnel Policies, adopted March 15, 2004, cites the MPO's compliance with the Restrictions on Influencing certain Federal Activities.

Clean Air Act: Air Pollution Prevention & Control

All State and local transportation officials will take part in a 3-C planning process in non-attainment areas to determine which planning elements will be developed, adopted and implemented to maintain or improve the air quality for said area. In non-attainment areas that include more than one state, the affected states may jointly undertake and implement air quality planning procedures. Activities not conforming to approved plans will not be financially supported by the Federal government. Priority of funding will be given to those projects or programs that achieve and maintain national primary ambient air quality standards. (42 USC, Ch. 85, Sec's. 7408, 7410, 7504, 7505a 7511, 7512, 7506 (c) and (d) and 7604; 49 USC, Ch. 53, 23 USC, Sec. 134)

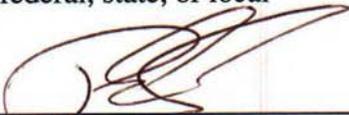

H-GAC MPO Response: UPWP Subtasks 1.3, 1.4, 2.1, 3.3, 4.1, 4.2, 4.3, 4.4, 5.1, 5.2, 5.3, 6.1, 6.2, and 6.3 address various aspects of the CAA requirements, including public outreach, SIP development, air quality conformity attainment, financial constraints, alternative modes of travel, and contributions to maintaining national primary ambient air quality standards.

DEBARMENT CERTIFICATION

(Negotiated Contracts)

- (1) The Houston-Galveston Area Council as CONTRACTOR certifies to the best of its knowledge and belief, that it and its principals:
- (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any federal debarment or agency;
 - (b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgement rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public* transaction or contract under a public transaction; violation of federal or state antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
 - (c) Are not presently indicted or otherwise criminally or civilly charged by a governmental entity* with commission of any of the offenses enumerated in paragraph (1) (b) of this certification; and
 - (d) Have not within a three-year period preceding this application/proposal had one or more public transactions* terminated for cause or default.
- (2) Where the CONTRACTOR is unable to certify to any of the statements in this certification, such CONTRACTOR shall attach an explanation will be attached to this certification.

*federal, state, or local

LOBBYING CERTIFICATION
for
Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies to the best of his or her knowledge and belief, that:

- (1) No federal appropriated funds have been paid or will be paid by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification, of any federal contract, grant, loan, or cooperative agreement.
- (2) If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
- (3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

Appendix B — Project Development

Project Development for the TIP

The TIP Project Development Guidelines, as approved by the Transportation Policy Council (TPC) on September 24, 2004, state:

- Added capacity¹ roadway projects must complete preliminary engineering and environmental work as a precondition to selection for construction in the TIP. Projects must have 70% of right of way acquired and/or statement explaining conditions for purchasing remaining right of way; and
- The Technical Advisory Committee (TAC) recommends that projects formally committed in the 2004-2006 TIP that were not let to contract in 2004 and 2005, will carry forward into the 2006-2008 TIP unless the sponsor cancels or delays the project. Newly funded STP projects in the TIP will be selected from the committed projects in the Appendix I of the 2004- 2006 TIP. A candidate pool for STP and CMAQ will created and documented in Appendix I of the 2006-02008 TIP. Should dollars become available the TPC will **select projects from these list for funding in the 2006-2008 TIP**. Those contingency STP projects that are not programmed will be considered commitments for TIP programming for the years 2009 of the next TIP. CMAQ must re-compete as they are selected based on emissions benefits; and
- Projects will not be considered if the federal requested amount is equal to or higher than half the expected funding for the effective funding category.
- Projects will be ranked according to the approved TPC methodology. Those projects that do not fit into exact scoring criteria will be scored on factors considered reasonable for the project type and grouped accordingly:
- The TPC will “select” projects (commensurate with expected federal funds) for funding into the TIP. The TPC can decide on the percentage of dollars towards specific categories of projects. The project lists in the 2006-2008 Appendix I were developed using target funding levels from the 2004-2006 TIP.
- The TPC is reviewing and can approve new policies for the monitoring of projects in the 2006-2008 TIP. These policies can include monitoring strategies and recommendations on projects not progressing in the TIP.
- General Guidelines for Threshold levels on delays in Project Implementation, include
 - Agreement Execution² within 2 months of receipt from TxDOT,
 - Completion of PE/EA and Feasibility Studies – To be completed by August 31st prior to the fiscal year funded in TIP.

¹ Added capacity projects are defined as projects that result in an increase in single-occupancy vehicle (SOV) travel including new roadway construction and roadway widenings.

² Please note that agreements not executed within 12 months of receipt from TxDOT will be removed from the TIP.

- Completion of Final Plans (PS&E) – 5 months prior to project letting.
- Due to the limited expected funding in the 2006-2008 TIP, the TAC has not recommended STP funding for PE/EA or Rehabilitation projects.
- Any project in the short range element of *Regional Transportation Plan 2025 RTP* (through 2013) may be programmed in the TIP for PE/EA if:
 - A local government/agency sponsor agrees to undertake the PE/EA with local funds; or
 - A local government/agency sponsor agrees to match available federal funds set aside for PE/EA.
- System upgrades, RCTSS, ATMS, interconnects, and other signalization system improvements are eligible for CMAQ funding. CMAQ funds will not be used for normal operations/maintenance projects or individual signalization projects in the TIP.
- For some accelerated construction projects (freeway widenings, etc.), associated signalization improvement projects may be considered for advancement to the Funded TIP.
- Air quality conformity exempt projects not included in the MTP Short Range listing may be considered for advancement to the Funded TIP.
- Construction of new projects not in a previous TIP may not be programmed in the first two years of a TIP until the completion of PE/EA. Projects which are undergoing PE/EA may be programmed in the third year of the TIP.

Other Issues

- Projects need to be reviewed in light of their regional significance. Some smaller dollar projects, although potentially beneficial to local governments, may not have regional benefits. Moreover, federal participation may greatly increase the cost of smaller projects. H-GAC could be of help in this area by pointing out the pros and cons of using federal money.
- Since there is a lower threshold on CMAQ projects, it would be beneficial to have two smaller projects combined over \$100,000 and ready to go to contract rather than having two small projects for \$50,000 each.
- Acquisition of right-of-way and utility adjustments are often factors, which can delay project implementation. Local governments need to stay informed regarding their potential financial responsibility for these elements of the project. The State Infrastructure Bank (SIB) low-interest loans may provide financial assistance for local governments attempting to meet their obligation for right of way and/or utility adjustments.
- The process for TxDOT approval of consultant selection and interlocal agreements with TxDOT needs to be streamlined. The impact this process can have on project implementation must also be stressed. Standard guidelines need to be distributed to those entities unfamiliar with this process. Therefore, the H-GAC/TxDOT Project Development Workshop should be held every year.
- TIP projects will be reviewed annually to reassess project readiness. Recommendations may be made to accelerate other construction projects based on extended delays to one or more TIP projects.
- The award of transit formula and discretionary funds is performed through a grant to transit providers. Typically, these grants allow for up to four years for project implementation. If required, PE/EA for

these projects is normally included with the grant funds for construction or acquisition. Therefore, the TIP programming rules regarding programming year and set-aside for PE/EA, will not be applied to transit formula and discretionary grants.

Project Readiness for the TIP

The TIP is the implementation device for the Regional Transportation Plan. It details an implementation schedule for the first three years worth of projects in the RTP. Candidate projects for inclusion in the TIP must be included in the 2025 RTP conformity determination and modeled in conformity year 2010 or must be “exempt” from the air quality conformity determination process. Candidate projects are sorted projects according to eligible funding categories Surface Transportation Program (STP-MM), Congestion Mitigation and Air Quality Program (CMAQ) or Section 5307 transit formula funds. Air quality/energy, bicycle, intermodal, TDM, access management, TSM, and transit projects are generally eligible for funding under the Congestion Mitigation and Air Quality Improvement (CMAQ) program.

One of the important criteria for selection as a TIP project is “readiness”. “Readiness” refers to the ability of a project to be ready for contract letting in the year in which it is programmed in the TIP. This is an important criterion for the TIP because projects that are not let in their programmed year must be re-programmed into a later fiscal year. TxDOT districts may not exceed their obligation authority for a given fiscal year. Therefore, re-programming a project into a later fiscal year impacts the ability to let other projects proceed to contract in that year. All candidate added capacity projects must provide documentation showing that PE/EA is substantially underway or completed.

The TIP selection process is an example of an evolving procedure. Since the inception of ISTEA and continuing under TEA-21, the TIP selection procedures have changed as the state and metropolitan planning organizations have developed a better understanding of the regulations and processes inherent in ISTEA. It has been the experience in this region that many projects selected for previous TIPs have not been ready to let to construction within the TIP timeframe.

Previous information mailed to project sponsors regarding TIP readiness criteria stated that “...four key factors are examined to determine project readiness: the basis for cost estimates, the completeness of environmental analyses, availability of right-of-way (ROW), and local government financial commitment.” It further states that projects “...not significantly developed in each of these areas are considered to be beyond the timeframe of the TIP.” Additional detail regarding each of these issues is provided below.

Cost Estimates

Cost estimates are important in determining readiness because they indicate the development status of projects. For example, if preliminary engineering is included in the cost estimate because it has not been completed, the project is not likely to be ready for implementation in the TIP timeframe. In general, projects that do not have well-developed cost estimates are not far enough along in the development process to be considered ready for implementation.

Environmental Analyses

All federal-aid projects must complete the National Environmental Protection Act (NEPA) process. A finding of no significant impacts (FONSI), a record of decision (ROD) or a categorical exclusion (CE) is

necessary before federal funds can be expended on a project. One of the first steps in the NEPA process is completion of an environmental assessment (EA). The EA basically "flags" potential environmental problems should any exist. It indicates if any additional permits or analyses are required for a proposed project. If the EA results in a FONSI, then the project may move forward. If the EA indicates the potential for significant environmental impacts, then generally an environmental impact statement (EIS) will be required.

Projects proposed for construction on new locations requiring land acquisition are especially vulnerable to the possibility of needing an environmental impact statement (EIS). In addition to new roadways, construction of park and ride lots, high occupancy vehicle lanes, and transit stations on new locations are likely to need an EIS. It may take several years to complete the required environmental analyses for these types of projects. Other types of projects, such as roadway widenings or grades separations within existing right-of-way are less likely to have significant environmental impacts. Consequently, completion of the environmental process prior to selection as TIP project is not expected to result in delays in implementation.

Right-of-Way

Because right-of-way acquisition is potentially litigious and time consuming, a significant amount of right-of-way should have already been acquired for projects that will require additional right-of-way. Significant is defined to mean that at least seventy percent of the necessary right-of-way has been acquired. If a project sponsor has agreements with landowners that would expedite the acquisition process, that information should be documented and submitted for consideration in the readiness determination.

Local Commitment

Project sponsors must submit documentation to provide the local matching funds required for federal-aid projects. Generally, a minimum of twenty percent of the remaining eligible costs associated with a project is required. Project sponsors may choose to commit to a greater percentage of the project cost. Previous project expenditures by project sponsors are not reimbursable. However, commitment of local funds in the form of previous expenditures effectively lowers the cost of the project and increases its cost-effectiveness.

Public Involvement / Environmental Justice

Project sponsors must submit documentation regarding the project(s) level of public involvement. Sponsors are encouraged to provide comments, minutes, and meeting schedules to document level of public outreach. Sponsors are also encouraged to list what sources of outreach were used, whether or not the meetings were held in a language other than English, and whether the meetings were held in transit accessible locations. Sponsors are also asked to document how minority and elderly communities were taken into consideration in the development of the project.

Other Factors Affecting Readiness

In addition to the factors listed above, certain administrative requirements must be met before a project

can be let to contract for construction. Project sponsors must develop a contract with the TxDOT, a process that may take a year to complete. The length of the contract development period effectively reduces the amount of time available to project sponsors to address the readiness criteria.

The Clean Air Act Amendments (CAAA) of 1990 states that no additional SOV capacity may be built in a nonattainment TMA unless the project complies with a congestion management system (CMS). A congestion management analysis (CMA) must be completed for projects that will result in significant increase in capacity for SOVs (i.e., adding general purpose lanes to an existing highway or constructing a new highway). The analysis must include an assessment of all reasonable travel demand reduction and operational management strategies for the corridor in which an added capacity project is proposed. It should be part of the environmental assessment for a proposed project. If it is not, then a separate CMA must be completed prior to programming the project. The requirement for a SOV justification has significant implications for project readiness.

Benefit/Cost Analysis

All projects submitted for evaluation are analyzed based on their federal cost benefit and through planning factor analysis. These two scores ranked from lowest to highest. Those with the highest score resulted in the highest benefit overall. In this calculation, 50 percent of the total score of the project is the federal cost benefit, while the remaining 50 percent is determined based on the projects impact on congestion, mobility, safety and regional significance.

STP (Roadway) Eligible Projects

This part of the project evaluation process outlines the methodology by which roadway projects are evaluated and ranked based on cost effectiveness. The procedure relies on estimated improvements in travel time of users of the proposed project and on the estimated cost of the project. Travel time, or vehicle hours of travel, is calculated on a link by link basis and totaled over the length of the project. Travel time savings are calculated as the difference between the travel times on the facility with and without the improvement, using modeled traffic volumes for years 2005 and 2015 on the existing plus committed (E+C) roadway network. Assuming a stream of benefits starting in 2005 and ending 2015, the net present value (NPV) of the benefits is obtained. The cost effectiveness, or the benefit/cost index, is then calculated as the product of the ratio of the annual average of the NPV to the annualized cost of the project and an indexing factor.

The facility type and classification of the proposed project are evaluated against existing roadways in the area with the same characteristics. The estimated speed is also determined by area comparison analysis for volume to capacity ratios on similar facilities in the project region.

New location roadway projects are evaluated using a methodology that is virtually the same as for widening projects there are a few basic assumptions made. However, since there are no traffic volumes or speeds on facilities prior to their existence, staff uses a proxy approach to obtaining the necessary data. As with the widening methodology, staff assumes that the volumes in the year of analysis would be the same both the “before” and “after” scenarios. Hypothetical speeds for facilities “before” improvements are obtained from a matrix of typical speeds for certain congestion levels and area types.

CMAQ Eligible Projects

Projects eligible for CMAQ funding must demonstrate air quality benefits due to emissions reductions. The emissions reductions are calculated based upon travel timesavings, reduced idling times and or reduction in vehicle miles of travel (VMT) attributable to the project. All air quality emissions are calculated using Texas mobile source emissions reductions strategies (MoSERS) and emissions factors from MOBILE6.

Scoring Criteria Overview for the 2006-2008 TIP

BENEFIT/COST	50%
PLANNING FACTORS	50%

Roadway Improvement Planning Factors

CONGESTION RELIEF	25 PTS	Relieves Bottleneck, Fills Gap, ITS Component, Access Management
REGIONAL IMPACT	25 PTS	NHS, Major Corridor, Environmental Justice, Economic Development, Connects To Intermodal Terminal,
MOBILITY	25 PTS	Ped/Bike, Land-Use, Multimodal, Promotes Goods Movement
SAFETY	25 PTS	Evacuation Route, High Crash Risk, Access Management Improvements Addressing Safety

Traffic Operations and Management Planning Factors

INSTITUTIONAL COORDINATION	5 PTS	Coordination with other entities and stakeholders.
SYSTEM REDUNDANCY	5 PTS	Backup Procedures Present In The Case Of System Failure
PERFORMANCE MEASURES	20 PTS	Reducing Traffic Congestion, Maintain/Preserve Existing System, Improve Travel Options, Air Quality Compliance, Integrated/Effective System, Safety Planning
MAINTENANCE COSTS/STAFF RESOURCES	15 PTS	Addresses Recurring Costs, Confirms Financial Commitment From Sponsor, Training Plan
HOMELAND SECURITY	30 PTS	Infrastructure Security, Interagency Coordination, Leveraging Transportation And Safety Funding
SYSTEM MIGRATION AND EXPANDABILITY	15 PTS	Use/Enhancement Of Existing Communication & Data Networks
INTEGRATION AND INFORMATION SHARING	10 PTS	Market Package Compliance And Level Of Integration

Bicycle and Pedestrian Planning Factors

LAND-USE	25 PTS	Multi-Modal, Fills Gaps, Provides Community & Commercial Benefits
COORDINATION	25 PTS	Inclusion In Regional/Local Bike/Ped Plan Or Other Local Plans
CONVENIENCE	25 PTS	Access To Points Of Interest, Provisions For Disabled, Signage, Support Facilities (i.e. Bike Racks)
ACCOMMODATIONS	25 PTS	ADA Compliance, Meet Required Path/Lane Widths

Transit Planning Factors

COORDINATION	15 PTS	Planning With Agencies Maintaining Roadways, Coordination With Connecting Transit Services
ALTERNATIVE MODES/CONNECTIONS	10 PTS	Planning With Agencies Maintaining Roadways, Coordination With Connecting Transit Services
DETRIMENT TO OTHER SERVICE	-15 PTS	Point Loss If Project Negatively Affects Other Services
NEW AND INNOVATIVE SERVICE	10 PTS	Determine The Usefulness & Originality Of Service
TIED TO ITS	25 PTS	Contains ITS Component
COMPLETE FINANCIAL PLAN	20 PTS	Financial Strategy Required For Continuation Of Service At The End Of 3-Year Eligibility (CMAQ Funding Only)
LETTERS OF SUPPORT	20 PTS	Letters of support by local area residence, businesses, or other parties.

Unified Transportation Program

Funding Categories

This page left blank intentionally.

Appendix C — Unified Transportation Program Funding Categories

NO.	CATEGORY NAME	PROGRAMMING AUTHORITY	SUMMARY/RESTRICTIONS
	ABBREVIATION	USUAL FUNDING	
1	Preventative Maintenance & Rehabilitation	Texas Transportation Commission allocation by formula. Allocation program to TxDOT Districts. Projects selected by Districts	Preventive maintenance and rehabilitation of the existing state highway system. The rehabilitation funds may be used for rehabilitation of the Interstate Highway System main lanes, frontage roads, structures, signs, pavement markings, striping, etc. The Transportation Planning and Programming Division may approve the use of rehabilitation funds for the construction of interchanges and high occupancy vehicle (HOV) lanes on the Interstate Highway System. Rehabilitation funds may not be used for the construction of new single occupancy vehicle (SOV) lanes.
	PREV-M	Federal 90% State 10% Or Federal 80% State 20% Or State 100%	
2	Metropolitan Area (TMA) Corridor Projects	Texas Transportation Commission approval. Project-specific Corridors selected statewide based on criteria to be determined. Projects scheduled by consensus of districts	Mobility and added capacity projects on major state highway system corridors which serve the mobility needs of the Metropolitan Areas (TMA) Metropolitan Planning Organizations (MPOs).
	METRO-TMA	Federal 80% State 20% Or State 100%	
3	Urban Area (Non TMA) Corridor Projects	Texas Transportation Commission approval. Project-specific Corridors selected statewide based on criteria to be determined. Projects scheduled by consensus of districts	Mobility and added capacity projects on major state highway system corridors which serve the mobility needs of the Urban Areas (non-TMA) MPOs.
	URB-NON TMA	Federal 80% State 20% Or State 100%	
4	Statewide Connectivity Corridor Projects	Texas Transportation Commission approval. Project-specific Corridors selected statewide based on criteria to be determined. Projects scheduled by consensus of districts	Mobility and added capacity projects on major state highway system corridors which serve the mobility needs of statewide connectivity between urban areas and corridors which serve mobility needs throughout the state. Composed of a highway connectivity network which includes: <ul style="list-style-type: none"> • the Texas Trunk System • the National Highway System (NHS) • and connections from Texas Trunk System or NHS to major ports on international borders or Texas water ports
	ST-WIDE	Federal 80% State 20% Or State 100%	

NO.	CATEGORY NAME	PROGRAMMING AUTHORITY	SUMMARY/RESTRICTIONS
	ABBREVIATION	USUAL FUNDING	
5	Congestion Mitigation Air Quality Improvement	Texas Transportation Commission allocation. Allocation based on percent of population in non-attainment areas. Allocation program to districts. Projects selected by MPO in consultation with TxDOT and TCEQ.	Addresses attainment of national ambient air quality standard in the non-attainment areas (currently Dallas-Fort Worth, Houston, Beaumont and El Paso). Funds cannot be used to add capacity for single occupancy vehicles.
	CMAQ	Federal 80% State 20% Or Federal 80% Local 20%	
6	Structures Replacement & Rehabilitation	Texas Transportation Commission approval. Project-specific. Selected statewide based on Texas Eligible Bridge Selection System (TEBSS) and evaluated statewide for cost-benefit by the Bridge Division.	Replacement or rehabilitation of eligible bridges on and off the state highway system (functionally obsolete or structurally deficient). Replacement of existing highway-railroad grade crossings, and the rehabilitation or replacement of deficient railroad underpasses on the state highway system. Specific locations evaluated by cost-benefits derived index (benefits such as improved traffic flow, accident/fatality reduction). These funds may be used for preventive maintenance activities on bridges-requires commission approval.
	BRIDGE	Federal 80% State 20% Or Federal 80% State 10% Local 10% Or State 100%	
7	Metropolitan Mobility/Rehabilitation	Texas Transportation Commission allocation. Allocation based on population. Allocation program to districts. Projects selected by MPO in consultation with TxDOT.	Transportation needs within metropolitan area boundaries with populations of 200,000 or greater. Projects selected by Metropolitan Planning Organizations (MPOs).
	STP-MM	Federal 80% State 20% Or Federal 80% Local 20% Or State 100%	
8	Safety Federal Hazard Elimination Program	Texas Transportation Commission allocation. Statewide allocation program. Selected statewide by federally mandated safety indices. Projects are selected by the Traffic Operations Division.	Safety related projects - on and off state highway system. Projects are evaluated using three years of accident data, and ranked by Safety Improvement Index. Installation of automatic railroad warning devices at hazardous railroad crossings on and off state highway system, selected from statewide inventory list which is prioritized by index (# of trains per day, train speed, ADT, type of existing warning device, train-involved accidents within prior five years, etc.).
	SAFE	Federal 90% State 10% or State 100%	
8	Safety Federal Railroad Signal Safety Program	Texas Transportation Commission allocation. Statewide allocation program. Selected statewide from prioritized listing. Projects are selected by the Traffic Operations Division.	Installation of automatic railroad warning devices at hazardous railroad crossings on and off state highway system, selected from statewide inventory list which is prioritized by index (# of trains per day, train speed, ADT, type of existing warning device, train-involved accidents within prior five years, etc.).
	SAFE	Federal 90% State 10% or State 100%	

NO.	CATEGORY NAME	PROGRAMMING AUTHORITY	SUMMARY/RESTRICTIONS
	ABBREVIATION	USUAL FUNDING	
8	Safety Safety Bond Program	Texas Transportation Commission allocation. Statewide allocation program. Selected statewide.	Allocations for the safety bond program are approved by the commission, with the program managed as an allocation program on a statewide basis.
	SAFE	Federal 90% State 10% or State 100%	
9	Transportation Enhancements	Texas Transportation Commission selection and approval. Project specific approved by separate minute order.	Projects above and beyond what normally is expected for transportation enhancements – 12 general activities as outlined in TEA-21. Projects recommended by local government entities; reviewed and recommended by committee; selected by Texas Transportation Commission as outlined in 43 TAC §11.204(c).
	ENH	Federal 80% State 20% Or Federal 80% Local 20%	
9	Transportation Enhancements Safety Rest Area Program	Texas Transportation Commission allocation. Statewide allocation program selected statewide by the Maintenance Division	Funds to be used to renovate, build, and relocate safety rest areas along the state highway system. Small amount of program funds used for Safety Rest Area repairs. Other federal-aid or state funds may be used for non-qualifying repair activities.
	ENH	Federal 90% State 10% or State 100%	
10	Miscellaneous Supplemental Transportation Projects- State Park Roads	Texas Transportation Commission statewide allocation program. Projects selected by Texas Parks and Wildlife Department (TPWD).	Construction and rehabilitation of roadways within or adjacent to state parks, fish hatcheries, etc. subject to Memorandum of Agreement between TxDOT and TPWD. Locations selected and prioritized by TPWD.
	MISC	State 100%	
10	Miscellaneous Supplemental Transportation Projects- Railroad Grade Crossing Replanking Program	Texas Transportation Commission statewide allocation program. Selection based on conditions of riding surface.	Replacement of rough railroad crossing surfaces on the state highway system (approximately 140 installations per year statewide). Project selection based on conditions of the riding surface (highway, railroad and drainage) and cost per vehicle using the crossing.
	MISC	State 100%	
10	Miscellaneous Supplemental Transportation Projects- Railroad Signal Maintenance Program	Texas Transportation Commission statewide allocation program. Contributions to maintain signals.	Contributions to each railroad company based on number of state highway system crossings and type of automatic devices present at each crossing.
	MISC	State 100%	
10	Miscellaneous Supplemental Transportation Projects- Construction Landscape Programs	Texas Transportation Commission allocation by formula. Allocation program to districts. Projects selected by district	New landscape development and establishment projects such as typical right-of-way landscape development and establishment, aesthetic improvement (primarily in urban areas), rest area/picnic area landscape development, and erosion control and environmental mitigation activities on the state highway system.
	MISC	State 100%	
10	Miscellaneous Supplemental Transportation Projects- Landscape Cost Sharing Programs	Statewide allocation program	Program allows the department to negotiate and execute joint landscape development projects through partnerships with local governments and support from civic associations, private businesses and developers for the aesthetic improvement of our state transportation system.
	MISC	State 100%	

NO.	CATEGORY NAME	PROGRAMMING AUTHORITY	SUMMARY/RESTRICTIONS
	ABBREVIATION	USUAL FUNDING	
10	Miscellaneous Supplemental Transportation Projects- Curb Ramp Program	Statewide allocation program	The program addresses construction or replacement of handicap accessible wheelchair ramps at on-system intersections
	MISC	State 100%	
10	Miscellaneous Supplemental Transportation Projects- Green Ribbon Landscape Improvement Program	Statewide allocation program to the districts with air quality non-attainment or near non-attainment counties.	Program allows the department to address new landscape development and establishment projects within districts that have air quality non-attainment or near non-attainment counties (projects to plant trees and shrubs to help mitigate the effects of air pollution).
	MISC	State 100%	
10	Miscellaneous Supplemental Transportation Projects- (Federal)	Texas Transportation Commission approval to participate. Federal allocations.	Federal programs such as Forest Highways, Indian Reservation Highways, Federal Lands Highways, and Ferry Boat Discretionary.
	MISC	Federal 100% or Federal 80% State 20%	
11	District Discretionary	Texas Transportation Commission allocation by formula. Allocation program to districts. Projects selected by districts. Minimum \$2.5 million allocation to each district in compliance with 78(R), HB1 VII Rider 29.	Projects selected at district's discretion.
	ST DIST DISC	Federal 80% State 20% or Federal 80% Local 20% Or State 100%	
12	Strategic Priority	Texas Transportation Commission selection. Project specific.	Texas Transportation Commission selected projects which promote economic development, provide system continuity with adjoining states and Mexico, increase efficiency on military deployment routes, or address other strategic needs as determined by the commission.
	STRAT	Federal 80% State 20% Or State 100%

Resolution

NO. 0509-RTP

APPROVING THE 2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) FOR THE HOUSTON-GALVESTON TRANSPORTATION MANAGEMENT AREA:

WHEREAS, the joint Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) Regulations for the development, content and processing of a cooperatively developed Transportation Improvement Program (TIP) were published in the June 30, 1981 Federal Register; and

WHEREAS, the Transportation Equity Act for the 21st Century (TEA-21) was enacted on June 9, 1998 and authorizes the Federal surface transportation programs for highways, highway safety, and transit for the 6-year period 1998-2003; and

WHEREAS, the TEA-21 Restoration Act, enacted on July 22, 1998, provided technical corrections to the original law; and

WHEREAS, Title III, Section 3005 of TEA-21 establishes requirements for metropolitan planning organizations for the development of Transportation Improvement Programs (TIPs); and

WHEREAS, the Transportation Policy Council (TPC) as the Policy Board for the Metropolitan Planning Organization (MPO), has adopted procedures for the selection and prioritization of projects, and has considered the funding flexibility requirements of TEA-21, and provided opportunity for public comment; and

WHEREAS, the Transportation Policy Council approves the use of statewide CSJ's in the 2006 -2008 TIP consistent with the guidance of the Federal Highway Administration (FHWA); and

WHEREAS, the 2006 – 2008 Transportation Improvement Program includes statewide project groupings developed in accordance with the Metropolitan Planning regulations and in cooperation with the Texas Department of Transportation; and

WHEREAS, the 2006 -2008 Transportation Improvement Program includes individual projects eligible for statewide project groupings for informational purposes only; and

WHEREAS, the 2006-2008 Transportation Improvement Program financial summary tables have been developed to ensure that projects to be completed under the statewide project groupings are constrained to available funding (categories) at a statewide or applicable level;

WHEREAS, the 2006-2008 Transportation Improvement Program (TIP) must demonstrate its contribution to emissions reductions which will reduce the frequency and severity of violations of the federal ozone standard, and must demonstrate financial commitment and capacity to implement the proposed program of projects; and

WHEREAS, the 2006-2008 Transportation Improvement Program (TIP) has been developed by the Houston-Galveston Area Council, in its capacity as the Metropolitan Planning Organization (MPO), and in cooperation with state and local officials, local transit operators and grant recipients authorized under various titles of the TEA-21; and

WHEREAS, 2025 Regional Transportation Plan Update (RTP), the long-range transportation plan for the Houston-Galveston Transportation Management Area (TMA), was adopted in April, 2005 by the Transportation Policy Council; and

WHEREAS, the 2006-2008 Transportation Improvement Program (TIP) was developed from, and is consistent with 2025 Regional Transportation Plan (RTP) and its finding of conformance with the State Implementation Plan (SIP).

NOW, THEREFORE, BE IT RESOLVED BY THE TRANSPORTATION POLICY COUNCIL FOR THE HOUSTON-GALVESTON TRANSPORTATION MANAGEMENT AREA, THAT THE 2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM IS HEREBY ADOPTED.

BE IT FURTHER RESOLVED, that the MPO staff is authorized to submit the approved list of projects to the Texas Department of Transportation (TxDOT).

PASSED AND APPROVED this 22nd day of April 2005, at a regularly called meeting of the Transportation Policy Council for the Houston-Galveston Transportation Management Area.

APPROVED:

Robert Eckels, Chairman
Transportation Policy Council

ATTEST:

Tom Reid, Secretary
Transportation Policy Council

Resolution

NO. 0510-RTP

CERTIFYING THAT THE 2025 REGIONAL TRANSPORTATION PLAN AND THE 2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM ARE IN CONFORMITY WITH THE CLEAN AIR ACT OF 1990, AS AMENDED, AND THE TRANSPORTATION EQUITY ACT FOR THE 21ST CENTURY (TEA-21) OF 1998.

WHEREAS, it has become necessary to certify that the 2025 Regional Transportation Plan and the 2006-2008 Transportation Improvement Program were found to be in conformity for VOC and NO_x motor vehicle emissions budget contained in *Revisions to the State Implementation Plan for the Control of Ozone Air Pollution, Houston/Galveston/Brazoria Ozone Nonattainment Area*; and

WHEREAS, the 2025 Regional Transportation Plan (RTP) and the 2006-2008 Transportation Improvement Program (TIP) have met the requirements set forth in the Conformity State Implementation Plan issued jointly by the U.S. Department of Transportation and the Environmental Protection Agency (EPA); and

WHEREAS, vehicle emissions estimates resulting from the implementation of the transportation facility and service improvements recommended in the 2025 Regional Transportation Plan and the 2006-2008 Transportation Improvement Program provide for expeditious implementation of transportation control measures in its applicable implementation plan; and

WHEREAS, the 2025 Regional Transportation Plan and the 2006-2008 Transportation Improvement Program contribute to annual emissions reductions consistent with Sections 182 (b)(1) and 187 (a)(7) of the Clean Air Act, as amended; and

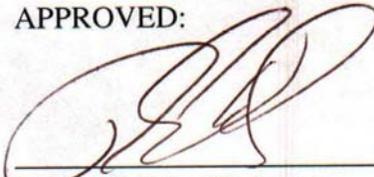

WHEREAS, implementation of the transportation facilities and services recommended in the 2025 Regional Transportation Plan Update and the 2006-2008 Transportation Improvement Program would result in lower total vehicle emissions than the 1990 base year emissions and the motor vehicles emissions budget (MVEB); and

WHEREAS, approval of these proposed revisions is conditional upon completion of the Public Comment Period without significant public opposition.

NOW THEREFORE, be it resolved by the Transportation Policy Council for the Houston-Galveston Transportation Management Area that the 2025 Regional Transportation Plan and the 2006-2008 Transportation Improvement Program are in conformity with the 1990 U.S. Clean Air Act as amended, and the Transportation Equity Act for the 21st Century (TEA-21) of 1998.

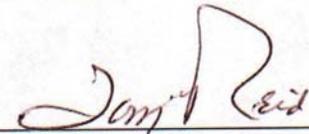

PASSED AND APPROVED this 22nd day of April 2005 at a regularly scheduled meeting of the Transportation Policy Council for the Houston-Galveston Transportation Management Area.

APPROVED:

Robert Eckels, Chairman
Transportation Policy Council

ATTEST:

Tom Reid, Secretary
Transportation Policy Council

3-C	Continuing, Comprehensive, & Coordinated - 3-C planning process as required by TxDOT
AADT	Annual Average Daily Traffic
AASHTO	American Association of State Highway and Transportation Officials
ADA	Americans with Disabilities Act
ADT	Average Daily Traffic
AE	Annual Element
AERCO	Area Emissions Reduction Credit Organization
APO	Average Passenger Occupancy
APTA	American Public Transportation Association
AQC	Air Quality Compliance
AQCRs	Air Quality Control Regions
AQMA	Air Quality Maintenance Area - Areas noted by the EPA that have a potential for, or that presently exceed, the National Ambient Air Quality Standards
ATOM 2	A modified version of the Atomistic Model--Disaggregate Trip Distribution Model of the TTDP
AVL	Authorized Vehicle Lane
AVO	Average Vehicle Occupancy
BMS	Bridge Management System
BRINSAP	Bridge Inventory, Inspection, and Appraisal Program
CAA	Clean Air Act (and its related amendments)
CAGR	Compound Annual Growth Rate
CBD	Central Business District
CDP	Census Designated Places
CEI	Cost Effectiveness Index
CFR	Code of Federal Regulations
CIP	Capital Improvement Program
CMA	Congestion Mitigation Analysis (formerly known as SOV Analysis)
CMAQ	Congestion Mitigation Air Quality
CMS	Congestion Management System
CMSA	Consolidated Metropolitan Statistical Area - The Houston-Galveston-Brazoria CMSA consists of the Houston PMSA (Fort Bend, Harris, Liberty, Montgomery, and Waller Counties), the Galveston-Texas City PMSA (Galveston County), and the Brazoria PMSA (Brazoria County)
CNG	Compressed Natural Gas
CO	Carbon Monoxide
COG	Council of Government
CRP	Consolidated Road Program
CT	Census Tract
CTR	Center for Transportation Research, University of Texas at Austin
D-10	Division of Transportation Planning, TxDOT
D-11	Division of Public Transportation, TxDOT
D-2	Division of Aviation, TxDOT
DEIS	Draft Environmental Impact Statement
DEMO	Demonstration grant - funding of an experimental program
DIME	Dual Independent Map Encoding - A technique of creating a geographic base file (replaced by TIGER files)
DOT	Department of Transportation
EA	Environmental Assessment

EIS	Environmental Impact Statement
EPA	Environmental Protection Agency
FAA	Federal Aviation Administration
FAHPM	Federal Aid Highway Program Manual (replaced by FAPG)
FAI	Federal Air Interstate System
FAP	Federal Aid Primary System
FAPG	Federal Aid Policy Guide (Replaces FHPM)
FAS	Federal Aid Secondary System
FAU	Federal Aid Urban System
FCFF	Federal Clean Fuel Fleet
FHWA	Federal Highway Administration
FMA	Federal Maritime Administration
FMVCP	Federal Motor Vehicle Control Program
FONSI	Finding of No Significant Impact
FRA	Federal Railroad Administration
FTA	Federal Transit Administration (formerly UMTA)
GCSPR	Gulf Coast State Planning Region
GIS	Geographic Information Systems
GSU	Geographic Statistical Unit
HAOS	Houston Area Oxidant Study
HC	Hydrocarbons
H-GAC	Houston-Galveston Area Council
H-GRTS	Houston-Galveston Regional Transportation Study - Part of TxDOT, Houston District
HOV	High Occupancy Vehicle
HPMS	Highway Performance Monitoring System
HPR	Highway Planning and Research
HRT	Heavy Rail Transit
HUD	U.S. Department of Housing and Urban Development
I/M	Inspection/Maintenance Program (of vehicular emission controls)
IH	Interstate Highway

Public Comments

This page left blank intentionally.

Appendix G — Public Comments

Public Involvement Process for 2006–2008 TIP

The TIP public input process included separate public input meetings and educational workshops throughout the TIP development process. During the development of the 2006-2008 TIP, H-GAC hosted an open house showcase of projects providing an opportunity for the public to meet with area project sponsors (cities, counties, etc) to discuss local projects in greater detail. Sponsors provided a variety of display boards, maps, and project information to educate the public on area projects. This successful event was held during the development of the draft TIP as an opportunity to gather public comments on proposed candidate projects.

Educational workshops were also held during the development of the TIP to educate the public on the project submittal and selection process. These workshops provided detailed information on how project sponsors submit projects and how projects are evaluated and ranked. These workshops provided the public an opportunity to learn the project selection process as well as provide input on the methodology as it was being developed.

Appropriate public notices, news releases, e-mail lists and press releases stating the meeting time and locations were used to outreach and inform the public to the area meetings. The public notices were published in the Houston Chronicle as well as local papers when appropriate. In cooperation with METRO, the regions largest transit provider, the showcase event was also advertised on all transit routes.

In addition to public meetings, e-mail, and notices, the use of the H-GAC website was available with updated information throughout the TIP development process. The website includes a webpage for the development of the 2006-2008 TIP. This section contains the Draft 2006-2008 TIP documents, as well as information on the TIP Subcommittee, development timeline, frequently asked questions, project scoring methodology and links to contact H-GAC staff or make public comments. Project submittal information was made available to the public for their review and comment throughout the project selection process.

Table G-1 lists the public meetings and workshops held during the development of the TIP as well as meetings conducted during the formal comment period prior to Transportation Policy Council adoption.

TABLE G-1
TIP Public Meetings for the 2006-2008 TIP

Date	Location / County	Type of Event	Attendees
12/16/2003	H-GAC/Harris	Public Meeting	0
03/15/2004	H-GAC/Harris	Project Selection Workshop	33
04/22/2004	H-GAC/Harris	TIP Workshop	48
06/24/2004	Baytown/Harris	City Council	25*
07/07/2004	Galveston City Hall/Galveston	Public Meeting	20*
08/10/2004	Independence Heights/Harris	Super Neighborhood	25*
09/14/2004	H-GAC/Harris	Public Meeting	101
03/09/2005	North Harris Montgomery Community College/Montgomery	Public Meeting (formal comment period)	1
03/16/2005	Pearland City Hall/Brazoria	Public Meeting (formal comment period)	14
03/23/2005	Sugar Land City Hall/Fort Bend	Public Meeting (formal comment period)	15
03/29/2005	Scarborough High School/Harris	Public Meeting (formal comment period)	800 +
03/30/2005	H-GAC/Harris County	Public Meeting (formal comment period)	21

Public Involvement Impact

Comments from the public during the development process were taken into consideration by the Transportation Policy Council and the subcommittees in the selection of projects. For those candidate projects having large public support or opposition, special sponsor presentations were made to the Transportation Policy Council. Both project sponsor information and public comments were used in the final selection of contingency projects.

Overview of Formal Public Comment Period Input

Public comments during the formal comment period included project specific and general construction concerns.

- A comment was received opposing the selection of Strawberry Road. This project was recently selected by the Transportation Policy Council for the contingency list located in Appendix I of the 2006-2008 TIP. This contingency list of projects is not funded, rather is a list of projects to be funded when dollars become available. The concern is that the project is not regionally significant and will inconvenience the local residents. Secondly, that environmental justice was not taken into consideration during the development of the project only after it had been developed.
- A comment was received regarding the concern of noise during roadway construction activities. It was recommended that a zone be developed around neighborhoods providing a buffer between the homeowners and the road construction to minimize the noise.

Appendix H

Air Quality Conformity

This page left blank intentionally.

Appendix H — Air Quality Conformity

Executive Summary*

Milestones

On June 4, 2002, the Federal Highway Administration certified that the Houston-Galveston area's 2002 *Metropolitan Transportation Plan (MTP) Update* and the 2002 – 2004 *Transportation Improvement Program (TIP)* conformed with the requirements of the State Implementation Plan for the Houston-Galveston ozone nonattainment area. The June 4, 2002 conformity finding was established with the *Revisions to the State Implementation Plan for the Control of Ozone Air Pollution, Post-1999 Rate-of-Progress and Attainment Demonstration for the Houston-Galveston Ozone Nonattainment Area State Implementation Plan (SIP)* (hereafter referred to as the December 2000 SIP) that was submitted to the U.S. Environmental Protection Agency (EPA) by the Texas Natural Resources Conservation Commission (TNRCC) on December 20, 2000

In November 2004, the Texas Commission on Environmental Quality (TCEQ, the agency formerly known as TNRCC) submitted the Rate-of Progress portion of the *Revisions to the State Implementation Plan for the Control of Ozone Air Pollution, Houston/Galveston/Brazoria Ozone Nonattainment Area* (hereafter referred to as the “*Mid-Course Review SIP*”) to the EPA. The TCEQ submitted the Attainment Demonstration portion of the Mid-Course Review SIP to EPA on December XX, 2004. The on-road portion of the Mid-Course Review differs from the December 2000 SIP in several significant aspects: MOBILE6 was used, the latest demographics were used, the Inspection and Maintenance (I/M) programs for rural counties were removed, and temperature/humidity corrections were applied to vehicle categories. As a consequence, 2007 Attainment Demonstration budgets for on-road mobile emissions are at 175.49 tons per day of nitrogen oxides (NO_x), and 89.74 tpd for volatile organic compounds (VOC). The Mid-Course Review SIP also establishes new Rate-of-Progress emissions budgets for 2005 and 2007. The submission of these new budgets requires a conformity determination of the 2025 *Regional Transportation Plan* and the 2006-2008 *Transportation Improvement Program* to the new MVEBs established in the Mid-Course Review SIP. Conformity must be determined by June 4, 2005 or the RTP and the TIP will lapse.

Conformity Requirements

The Clean Air Act Amendments of 1990 (CAAA) require transportation plans, programs, and projects in nonattainment areas, which are funded or approved by the Federal Highway Administration (FHWA) or Federal Transit Administration (FTA), to conform to the SIP. This ensures that transportation plans, programs, and projects do not produce new air quality violations, worsen existing violations, or delay timely attainment of the National Ambient Air Quality Standards (NAAQS).

* Executive Summary taken from the *DRAFT Conformity Determination for the 2025 Regional Transportation Plan*.

Additional requirements that apply include:

- Use of the latest planning assumptions
- Analysis based upon the latest emission estimation model available
- Interagency consultation as well as a public involvement process must be conducted during the analysis
- Timely implementation of Transportation Control Measures (TCMs)
- The RTP and the TIP must be consistent with the MVEBs established in the applicable SIP
- The RTP and the TIP must include all regionally significant projects expected in the nonattainment area

Regional Inventory

H-GAC conducts regional emission analyses of transportation plans and transportation improvement programs to ensure transportation activities are consistent with the air quality goals identified in the Mid-Course Review SIP. This conformity analysis of the Houston-Galveston-Brazoria nonattainment area accounts for emissions resulting from the nonattainment area's transportation plan, including all regionally significant projects, and the effects of emission control programs.

Motor Vehicle Emission Budgets

The budgets established in the Mid-Course Review SIP are as follows:

TABLE H-1
Mid-Course Review Motor Vehicle Emission Budgets

Rate-of-Progress		
Budget (tpd)		
Year	NOx	VOC
2005	257.3	104.2
2007	210.0	90.0
Attainment Demonstration		
Budget (tpd)		
Year	NOx	VOC
2007	186.13	89.99

Source: Mid-Course Review SIP, TCEQ

These motor vehicle emission budgets (MVEBs) represent the maximum allowable amount of emissions that may be produced by on-road sources as a result of the implementation of the RTP and TIP. These budgets are developed based on the emission inventories and photochemical modeling conducted for the development of the Mid-Course Review SIP and includes emission reduction benefits from federal and state control programs.

Conformity Tests

As specified by the Code of Federal Regulations (40 CFR §93.109[c] as amended by 62 FR 43807, Aug. 15, 1997) all ozone nonattainment areas designated moderate and above must pass a motor vehicle emissions budget test if an adequate or approved SIP budget exists. The Houston-Galveston-Brazoria area is designated as “Severe 17” under the 1-hour ozone rule. Due to this and the Mid-Course Review MVEBs, the budget test must be satisfied for conformity. This test is satisfied when emissions of the ozone pollutant’s precursors (VOC and NOx) for each analysis year are less than or equal to the MVEBs established in the SIP. For the ROP test, each year with an MVEB must be modeled. Thus the ROP analysis will consist of the years 2005 and 2007. For the Attainment Demonstration test, the regional emission analysis may be performed for any years within the timeframe of the transportation plan, provided they are not more than ten years apart, and include the attainment year (2007) and plan horizon year (2025). To meet this requirement analysis, years 2007, 2015, and 2025 were selected. Finally, as allowed in Phase-1 of the 8-hour ozone rule (INSERT RULE HERE), if an adequate 1-hour Attainment Demonstration budget is in place, that budget can be used for purposes of conformity as an alternate emissions test for the 8-hour attainment year. Since the Houston-Galveston-Brazoria area has been designated as “Moderate” for the 8-hour standard with an attainment year of 2010, the year 2010 will be included in the analysis.

Modeling

Two modeling suites were used in this process. The Travel Demand Modeling at H-GAC uses the EMME/2 model, with a special post-mode choice speed model. On the emissions side, the TTI suite of emissions software is used in conjunction with the latest version of EPA’s MOBILE6 model to replicate the on-road modeling performed in the SIP. The data used in this conformity analysis is consistent with what was used in the SIP, except where more recent planning assumptions have been developed.

Conformity Analysis Results

The results of this conformity determination show that the *2025 Regional Transportation Plan* and the *2006 - 2006 Transportation Improvement Program* for the Houston-Galveston Transportation Management Area meet the requirements of the SIP for the Houston-Galveston Ozone Nonattainment Area, as submitted December XX, 2004, according to the Clean Air Act (42 U.S.C. 7504, 7506 (c) and (d)), as amended on November 15, 1990, and the final conformity rule (40 CFR Parts 51 and 93).

TABLE H-2
Conformity Analysis Summary

Analysis Year	VOC Emissions (tons/day)	VOC Budget (tons/day)	NOx Emissions (tons/day)	NOx Budget (tons/day)
1990 Baseline	321.7	--	391.1	--
2005 ROP	104.199	104.2	243.74	257.3
2007 ROP	89.66	90.0	199.51	210.0
2007 AD	88.09	89.99	177.31	186.13
2015 AD	50.82	89.99	75.82	186.13
2025 AD	40.44	89.99	38.25	186.13
2010 (8-hour Alternate Emissions Test)	71.88	89.99	136.77	186.13

VOC Emissions Summary

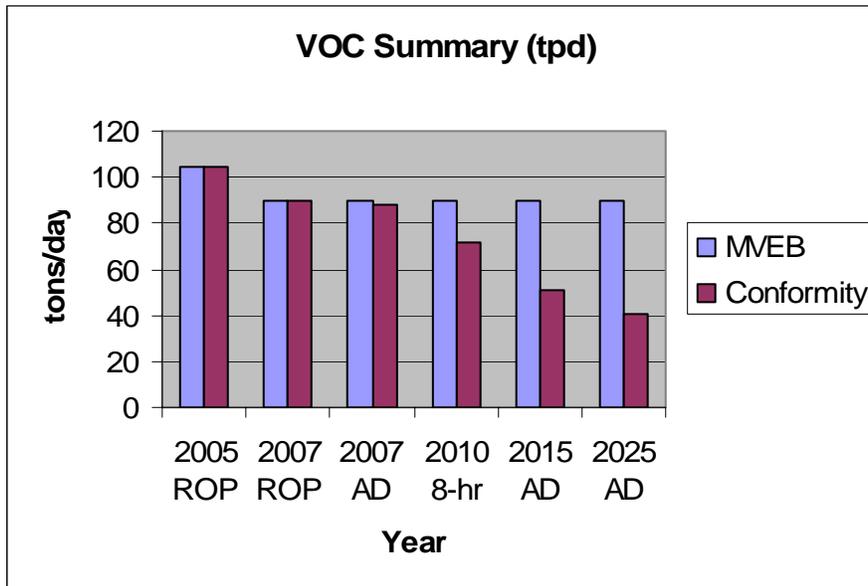

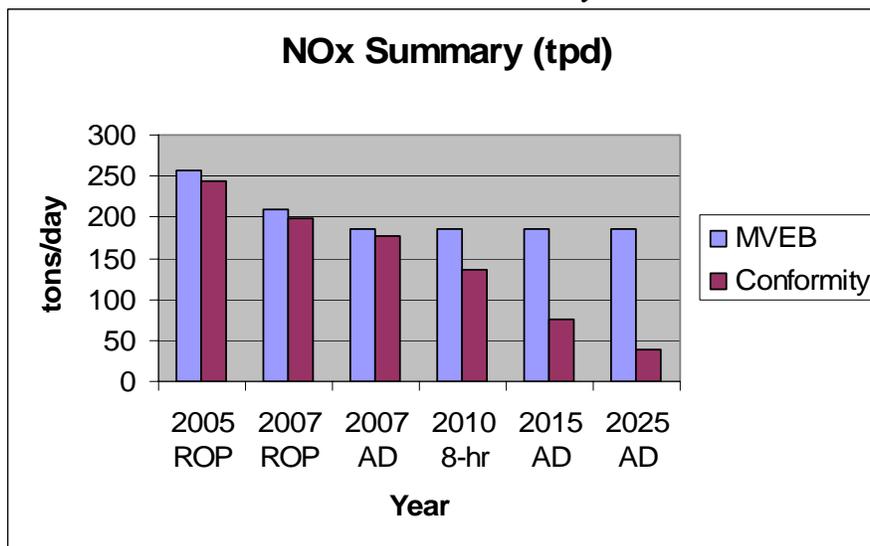

FIGURE H-2
NOx Emissions Summary

Background Information on Conformity

More information on what conformity is and the regulations that apply to it can be found at: <http://www.fhwa.dot.gov/environment/conform.htm>.

This conformity determination involved a pre-analysis review discussion with the review agencies (Section 7) and a public comment period (Section 8).

Organization of this Appendix

Appendix H of the 2006-2008 TIP contains the project listing for all of the Congestion Mitigation Air Quality (CMAQ-Category 5) projects funded for the TIP and those CMAQ funded projects designated as contingency projects. This project listing is separated by District then sorted by the street name, and project limits. The details of each project are explained in **Table H-3**.

TABLE H-3
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
APPENDIX H ORGANIZATION

Fiscal Year	The program/fiscal year where the project is estimated to let to contract.
District	The district where the project is located.
County	The county where the project is located.
CSJ Number	Control Section Job Number is a number given to projects that are implemented by TxDOT.
Notes	Specific notes regarding the project. e.g., if the project is a TCM SIP Commitment, 3-year construction cycle, carryover from 2004-2006 Appendix I etc.
Let Date	Estimated date for project to be let to contract.
MPO ID	Sequential number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
Project Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
Street/Highway	Street/Highway where project is located. If project is not located on a specific street then VA or N/A is listed for street.
Limits From	Beginning limit of the project.
Limits To	Ending limit of the project.
Project Description	Scope of work or description of project as submitted by the sponsor.
Length	Length of the project in miles.
VOC	VOC emissions for the project in kg/day
NOx	NOx emissions for the project in kg/day
CO	VOC emissions for the project in kg/day
Fund Cat	The funding category or categories the project is funded in. See Appendix C for detailed descriptions of funding categories.
CMAQ Cost	Amount programmed in CMAQ funds for the project. Usually 80% of which is Federal and 20% is local match funds.
Latest Est Cost	Latest estimated cost of project.
Federal Cost	Federal funds programmed for project. (from Authorized Amount)
State Cost	State funds programmed for project. (from Authorized Amount)
Local Cost	Local funds programmed for project. (from Authorized Amount)
Authorized Amount	Amount programmed for the project.

Appendix I — STP-Metro Mobility and CMAQ Contingency Projects

Recognizing the importance of early project development the Transportation Policy Council approved the projects in the following list for advancement into the authorized TIP when funding becomes available. This list gives some assurance to project sponsors of the commitment by the policy council. Sponsors are encouraged to continue to develop their projects in preparation for implementation.

Additional funding can become available through a variety of situations such as a programmed project being delayed or with the approval of the transportation bill. At this time the policy council is continuing discussions on further commitment to these projects beyond the 2006-2008 TIP, as well as potential adjustments to the amount of federal support listed.

These projects were scored and ranked using methodology detailed in Appendix B. When decisions have been made regarding funding, projects will be selected in the order shown. The order of funding could vary depending on readiness and amount of funding available. Those projects selected to advance into the funded section of the TIP will be subject to public involvement requirements.

Organization of this Appendix

Appendix I of the 2006-2008 TIP contains the candidate projects selected for the TIP when funds become available. These projects are separated into funding category and then grouped by type of project. The projects are then ordered by rank and score. The details of each project are explained in **Table I-1**.

TABLE I-1
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
APPENDIX I ORGANIZATION

County	The county where the project is located.
Street	Street/Highway where project is located. If project is not located on a specific street then VA or N/A is listed for street.
From Limit	Beginning limit of the project.
Project Description	Scope of work or description of project as submitted by the sponsor.
Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
To Limit	Ending limit of the project.
MPO Proj ID	Sequential number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
CSJ Number	Control Section Job Number is a number given to projects that are implemented by TxDOT.
Est Let Date	Estimated date for project to be let to contract.
Total Cost	Estimated cost of project. Excluding ROW costs.
Federal Request	Federal funds requested for project.
Estimated Allocation	Remaining estimated allocation

Appendix J — Statewide Programs

Statewide Programs

In cooperation with the Federal Highway Administration, TxDOT developed statewide programs identified by statewide CSJs to maximize the provisions for grouping projects that are not determined to be regionally significant in one line item, as allowed for in Title 23 USC Section 135 Statewide Planning. A table of the eligible funding categories and corresponding statewide CSJs can be found in **Table J-1**.

The use of statewide CSJs for these categories will provide a more efficient method of programming and letting projects, and decrease the necessity for TIP/STIP revisions. It is important to note that non-attainment areas will not have any added capacity projects, phases of added capacity projects, or CMAQ projects funded under statewide CSJs. It is important to note that due to the use or reference of statewide CSJs, some TxDOT districts list only a few projects individually, and therefore show a zero dollar amount on their corresponding financial summary.

TABLE J-1
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
STATEWIDE CSJs

CSJ	STATEWIDE PROGRAM	DEFINITION
5000-00-915 5000-00-916	Bicycle and Pedestrian	Construction or rehabilitation of bicycle and pedestrian lanes, paths and facilities.
5000-00-950	PE – Preliminary Engineering	Preliminary Engineering for any project that is not added capacity in a non-attainment area. Includes activities which do not involve or lead directly to construction such as planning and technical studies, grants for training and research programs.
5000-00-952 5000-00-957 5000-00-958	Preventive Maintenance and Rehabilitation	Projects to include pavement repair to preserve existing pavement so that it may achieve its designed loading. Includes seal coats, overlays, resurfacing, restoration and rehabilitation done with existing ROW. Also includes modernization of a highway by reconstruction, adding shoulders or adding auxiliary lanes (e.g., parking, weaving, turning, climbing, non-added capacity).
5000-00-953	Bridge Replacement and Rehabilitation	Projects to replace and/or rehabilitate functionally obsolete or structurally deficient bridges.
5000-00-954	Railroad Grade Separations	Projects to construct or replace existing highway-railroad grade crossings and to rehabilitate and/or replace deficient railroad underpasses, resulting in no added capacity.
5000-00-956	Landscaping	Project consisting of typical right-of-way landscape development, establishment and aesthetic improvements to include any associated erosion control and environmental mitigation activities.
5800-00-915	Intelligent Transportation Systems Deployment	Highway traffic operation improvement projects including the installation of ramp metering control devices, variable message signs, traffic monitoring equipment and projects in the Federal ITS/IVHS programs.
5800-00-950	Safety	Projects to include the construction or replacement/rehabilitation of guard rails, median barriers, crash cushions, pavement markings, skid treatments, medians, lighting improvements, railroad/highway crossing warning devices, fencing, intersection improvements (e.g., turn lanes), signalization projects and interchange modifications. Also includes projects funded via the Federal Hazard Elimination Program and the Federal Railroad Signal Safety Program.

Organization of this Appendix

Appendix J of the 2006-2008 TIP contains the project listing that identifies individual projects for the Statewide Programs in the TIP. This project listing is separated by each statewide program then sorted by the street name/highway name then the project limits. The details of each project are explained in **Table J-2**.

TABLE J-2
2006-2008 TRANSPORTATION IMPROVEMENT PROGRAM
APPENDIX ORGANIZATION

Fiscal Year	The program/fiscal year where the project is estimated to let to contract.
District	The district where the project is located.
County	The county where the project is located.
CSJ Number	Control Section Job Number is a number given to projects that are implemented by TxDOT.
Notes	Specific notes regarding the project. e.g., if the project is a TCM SIP Commitment, 3-year construction cycle, carryover from 2004-2006 Appendix I etc.
Let Date	Estimated date for project to be let to contract.
MPO ID	Sequential number given to all projects used for identification by H-GAC that corresponds to the GIS and modeling networks and RTP.
Project Sponsor	Sponsor Agency usually the agency submitting project and providing matching funds.
Street/Highway	Street/Highway where project is located. If project is not located on a specific street then VA or N/A is listed for street.
Limits From	Beginning limit of the project.
Limits To	Ending limit of the project.
Project Description	Scope of work or description of project as submitted by the sponsor.
Statewide CSJ	CSJ number for the statewide programs.
Phases	This is the code(s) to indicate the project's phase(s) in the TIP/STIP. C=Construction, E=Preliminary Engineering, R=Right-of-way and T=Transfer of Funds
Length	Length of the project in miles.
Funding Category	The funding category or categories the project is funded in. See Appendix C for detailed descriptions of funding categories.
Latest Est Cost	Latest estimated cost of project.
Federal Cost	Federal funds programmed for project. (from Authorized Amount)
State Cost	State funds programmed for project. (from Authorized Amount)
Local Cost	Local funds programmed for project. (from Authorized Amount)
Authorized Amount	Amount programmed for the project.

Introduction

The Houston-Galveston Area Council (H-GAC) has been designated by the Governor of Texas as the MPO for transportation planning in the metropolitan area of the Houston-Galveston Transportation Management Area. The metropolitan area includes Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, and Waller Counties. Under the Intermodal Transportation Efficiency Act (ISTEA), this eight-county area has also been designated as a Transportation Management Area (TMA).

Transportation Policy Council (TPC)

Metropolitan Planning Organizations (MPOs) are responsible, in cooperation with the State, for developing transportation plans and programs for urbanized areas. With the passage of the Intermodal Surface Transportation Efficiency Act by Congress in 1991, the roles and responsibilities of MPOs were greatly changed. To reflect the enhanced role of the Transportation Planning Committee in selecting and programming transportation projects, the Transportation Policy Council (TPC) was formed in 1992. The TPC serves as the Policy Board for the MPO. It is also responsible for approving region-wide transportation plans and programs, assuming that they have been developed in a continuing, cooperative, and comprehensive manner that considers all modes of transportation. The Houston-Galveston Area Council provides staff support to the TPC who in turn provides policy guidance on transportation issues to the Houston-Galveston Area Council Board of Directors.

Membership on the TPC consists of chief elected officials and their designated alternates from the five major cities and each of the eight counties within the TMA. Counties and cities not having voting members are represented by members appointed by the H-GAC Board of Directors. The Texas Department of Transportation (TxDOT) and the Metropolitan Transit Authority of Harris County (METRO) also each have a representative on the TPC. Three additional positions were added in January of 1999. Two of these positions are for Smaller Cities (in Brazoria County and Harris County) and one for Other Transportation Interests.

Technical Advisory Committee (TAC)

Due to increasing policy and technical responsibilities, the TPC created a standing Technical Advisory Committee (TAC) in late 1992 to assist with technical advice and analysis of transportation plans and projects. The TAC also assists with technical aspects related to the development of the Metropolitan Transportation Plan (MTP), the Transportation Improvement Program (TIP), the Regional Bicycle and Pedestrian Plan, the Major Investment Study (MIS) Guidelines, and other transportation programs.

Membership on the TAC is comprised of technical staff professionals, or as appropriate, citizens who have technical expertise in developing transportation plans, in implementing transportation projects, or in related fields. TAC representatives from various modes of transportation and from special interests groups affected by transportation planning exist to assure that transportation planning decisions are considered in their broadest context.

Bylaws Committee

This committee is responsible for making recommendations for updates to the established TPC bylaws that relate to the TAC. This committee will make recommendations concerning the TAC bylaws as issues arise. Upon approval of the TAC, the recommendations will then be forwarded to the TPC for approval into the bylaws. Membership of the committee is comprised of members of the TAC as appointed by the Chairman of the TAC.

TIP Subcommittee

The TIP subcommittee is responsible for providing guidance to planning staff in the development of the TIP. This subcommittee will propose guidelines for the ranking of candidate projects for the TIP, as well as provide guidance for major TIP amendments and funding decisions. The subcommittee will review staff recommendations and will approve recommendations for the action of the TAC. Membership of the TIP subcommittee is comprised of a core group of the TAC members as appointed by the TAC. However, all members of the TAC, primary and alternate, may participate in the subcommittee.

Operations Taskforce

The Operations Task Force is responsible for the development of a conceptual regional plan for traffic operations projects. The task force will develop guidelines for determining the project readiness of transportation operations projects. Using these established guidelines, the task force will be involved in TIP project selection to better incorporate a regionally developed traffic operations system. Operations Task Force members are nominated and appointed by the TAC and are representative of the various stakeholders involved with Intelligent Transportation Systems (ITS). This shall include technically qualified professionals; local, county and state agency engineers and planners; as well as members of the TAC knowledgeable in ITS standards.

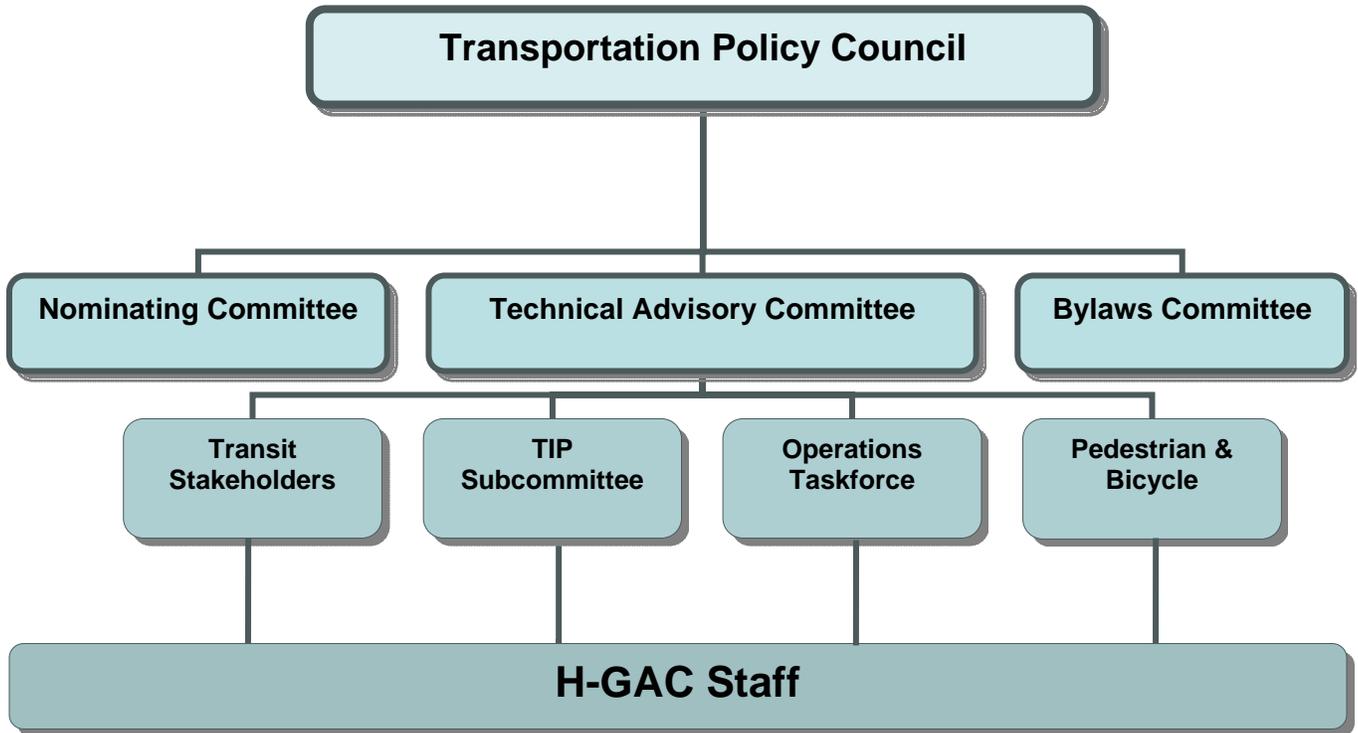

Pedestrian and Bicycle Subcommittee

The Pedestrian and Bicycle Subcommittee is responsible for the consideration of pedestrian/bicycle travel, safety, and education within the region's transportation planning and design process. Committee members are various stakeholders involved with pedestrian and bicycle issues. This shall include advocacy, safety, user groups, local, county and state agency engineers and planners as well as interested citizens.

Transit Stakeholders Subcommittee

The Transit Stakeholders Subcommittee provides guidance to MPO staff in the development of the transit element of the TIP. The subcommittee will assist in the selection of TIP projects and provide guidance on other transit related issues. Recommendations are made for approval of the TAC. Transit Stakeholders membership includes volunteers from each of the implementing transit agencies in the TMA as well as other transit professionals. Transit professionals include consultants and other persons with experience in the development or implementation of transit programs. All members of the TAC are welcome to attend and can participate in the development of recommendations to the TAC.
