Frequently Asked Questions for ITS Technical Qualification

1. Where can I find projects that require ITS technically qualified bidders?

If the proposal of a project includes special provision 002-001 (2014 SP002-007), then the project requires ITS technically qualified bidders.

2. Will the contractor be required to furnish equipment from the same vendor who was referred to in the Vendor reference statements?

No, the contractor will not be required to furnish equipment from the same vendor who was referenced in the qualification documentation.

3. Is ITS technical qualification the only requirement for bidding TxDOT construction jobs?

No. This technical qualification is in addition to all other bidder qualification requirements set forth by the Construction Division. Please refer to [contractor prequalification](#) for more details.

4. Will the bidder be required to be qualified under all ITS categories of work in order to bid on a particular project?

The bidder will be required to be qualified under the categories of work that apply to the particular project. The applicable categories of work are listed in the "Important Notice to Contractors" Special Provision in the contract.

5. Who is eligible to provide project references?

The project references should be the owner or end user of the system (e.g., a transportation agency). The project references should be a third party.

6. What are the corresponding special provisions from 2014 to 2024?

	2014	2024
Standalone ITS project	SP002-007	SP002-001
Non-standalone ITS project	SP000-395	SP000-015
Category A (Pulling Fiber Optic Cable)	SP000-385	SP000-008
Category B (Splicing and Testing of Fiber Optic Cable)	SP000-386	SP000-009
