

PROJECT DEVELOPMENT TIMELINE

- Planning and Scoping:** January 2022 to June 2023
- Plan Development and Environmental Technical Reports/Documentation:** January 2022 to July 2024
- Construction:** To Be Determined
- Open to Traffic:** To Be Determined

PROJECT OVERVIEW

District/County: Abilene and San Angelo Districts, Howard and Glasscock Counties

Highway/Limits: 2 miles north of Glasscock County line to 0.45 mile south of Howard County line

Length: Approximately 2.45 miles

Approximate Construction Cost (Frontage Roads Only):

\$16,000,000 (Howard County) and \$7,000,000 (Glasscock County)

CSJs: 0069-01-061 and 0069-02-030

Estimated Letting Date Range: FY 2027-2032

PROJECT DESCRIPTION:

TxDOT is studying potential improvements to US 87 to provide an integrated transportation facility which matches the existing four-lane divided highway sections north and south of the project limits. The potential improvements align with the goals of the 2020 Ports-To-Plains Corridor Interstate Feasibility Study and would improve connectivity, mobility and promote safety.

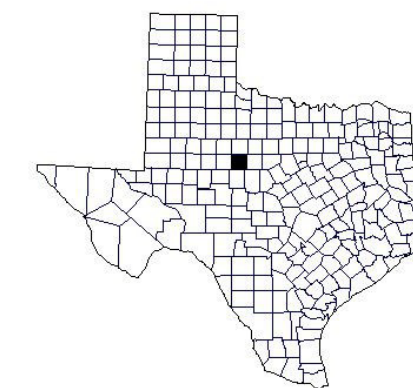

PLANNED IMPROVEMENTS

A range of preliminary alternatives is being considered. These include:

- the construction of a concrete traffic barrier in the median to divide directions of travel.
- the construction of a four-lane divided roadway, frontage roads, and diamond interchanges with turnarounds at intersections. Most of the proposed right-of-way would be needed from the east side of US 87.
- the construction of a four-lane divided roadway, frontage roads, and diamond interchanges with turnarounds at intersections. Most of the proposed right-of-way would be needed from the west side of US 87.
- the no build alternative (project would not be constructed).

PROJECT FUNDING

The proposed project is listed in TxDOT's 2023 Unified Transportation Program and partial construction funding authorized under Category 4: Statewide Connectivity Corridor Projects. Additional construction funding is needed with source(s) to be determined.
