

I-30 AT FM 3419 BRIDGE REPLACEMENT PROJECT

ATLANTA DISTRICT

PROJECT OVERVIEW

Highway/Limits: I-30 at FM 3419

Project ID: CSJ: 0610-07-115

Project Area: Approximately 0.48 miles

ESTIMATED PROJECT MILESTONES*

Preliminary Design Alternatives: June 2020

Public Meeting: June 2022

Environmental Clearance: June 2023

Right of Way Acquisition: 2023-2024

Utility Adjustments: 2023-2024

Finalize Plans/Begin Construction: September 2026

*DATES ARE SUBJECT TO CHANGE

Description: The bridge replacement at the crossover of FM 3419 includes removal of the current main lane bridge and construction of a new structure. It would consist of one 12-foot mainlane in each direction, a 16-foot flush median, two 10-foot shoulders, and 5-foot sidewalks in each direction. The new bridge would also accommodate the freight corridor clearance of 18.5 feet over I-30. This project would also realign the west side frontage roads to improve the tie-in to FM 3419, and new intersections would also be included with the bridge replacement. The new roadway would be designed to enhance safety and improve mobility for motorists by providing adequate sight distance at the frontage road intersections both north and south of I-30.

Right of Way: The proposed project would, subject to final design considerations, require additional right of way. No displacement of residences or non-residential structures would occur.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S. Code Section 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.
