Script:
Welcome to the Atlanta District's Rural Transportation Improvement Program (or Rural TIP) Virtual Public meeting for the 2025-28 years!

My name is Adrian Walton and I'm the Advance Planning Engineer in the Atlanta District.

In this presentation, we'll go over the projects included in the upcoming 2025-28 Rural TIP.

Script:

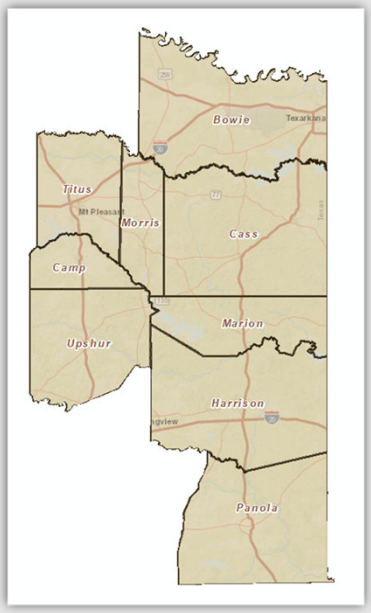
After a brief safety thought, we will go over which counties make up the Atlanta District and highlight the roads under the District's care. Next, we'll explain what the Rural TIP is and why is it important for you to participate in this virtual public meeting. Then, we'll explain how the projects included in the program are selected and classified in order to make the most of the program.

Once we've covered what the Rural TIP is and how projects are selected, we'll show you the projects the Atlanta District has included in the 2025-2028 program. And this will include both large and small projects.

We will also go over funding, answering the question "where does the money to pay for these projects come from? And how does it get distributed?". Finally, we'll outline the options you have for commenting on these projects and their priority.

November 7, 2000 was the last day that their was not at least 1 fatal accident on Texas roadways. That is a streak that is almost 24 years long that we are working to end! But we need your help to not only get this message out but also to change some driver habits! So, this message is a reminder that to End the Streak of deaths on Texas highways, drivers and passengers have to act responsibly by following a few simple driving habits and rules: wear seatbelts, drive the speed limit, put away the phone and other distractions, and never drive under the influence of alcohol or drugs. So please help us End The Streak and get this message out!

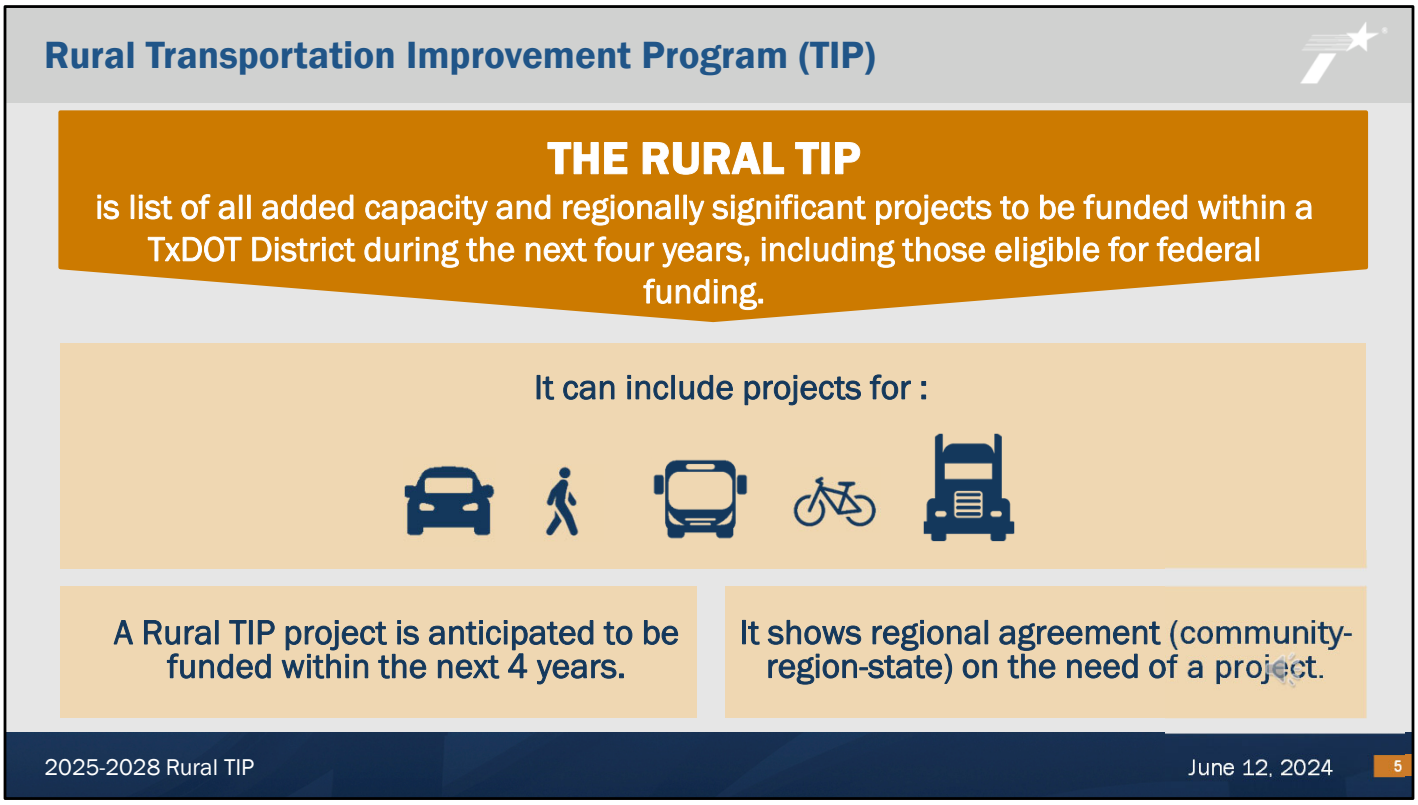
District Boundaries



Atlanta District

2025-2028 Rural TIP June 12, 2024 4

Script:
The Atlanta District includes all of the 9 counties shown in this map. Projects included in the 2025-2028 Rural TIP are located in *Bowie, Camp, Cass, Harrison, Marion, Morris, Panola, Titus, and Upshur counties.*



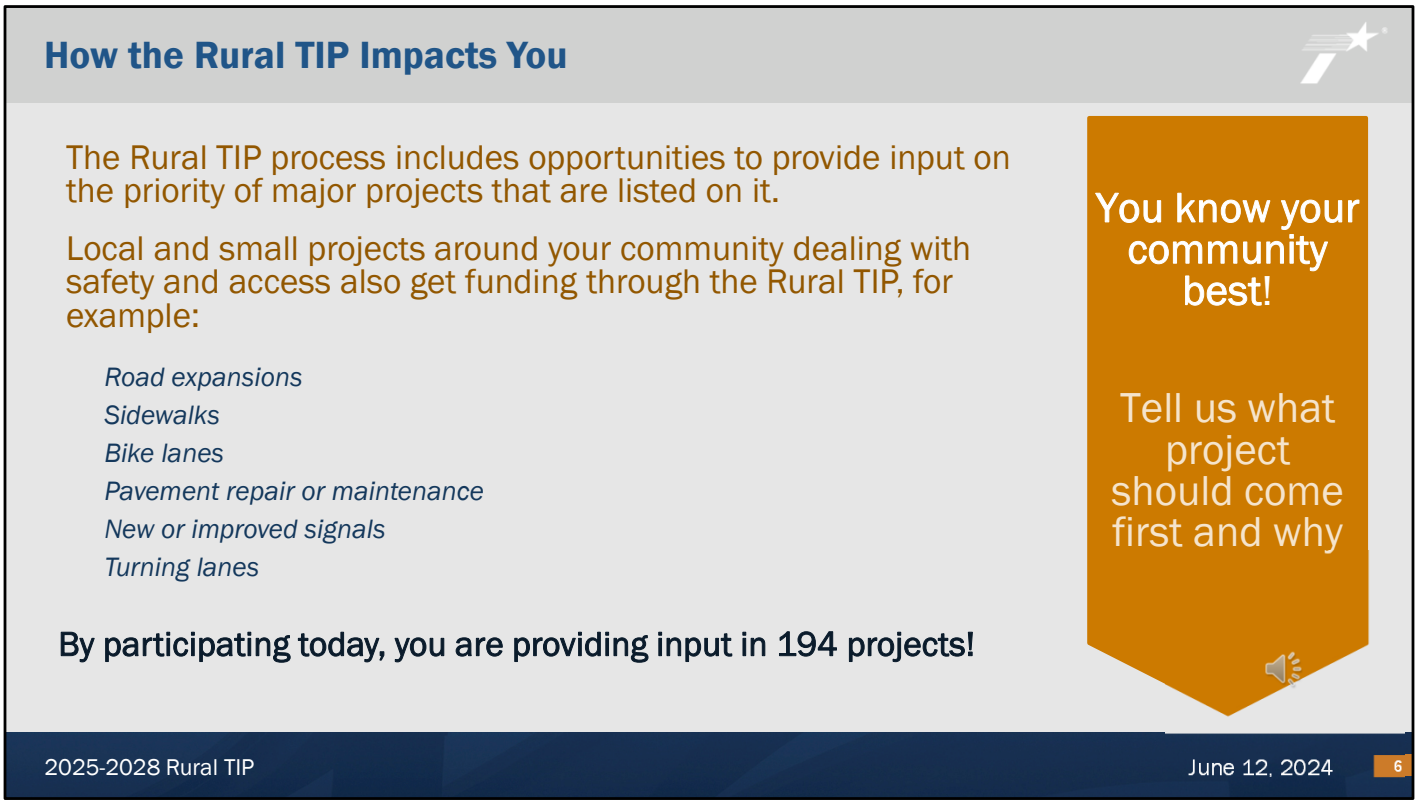
Script:

The Rural Transportation Improvement Program is a list of local projects to be funded in a TxDOT District over the next 4 years. This means that all projects included in the list are expected to be underway within 4 years following its approval.

The program includes multimodal projects which are projects relating to highway improvements, bicycle and pedestrian facilities, transit services, and freight projects. Projects may also include the preliminary studies used to define these types of projects.

The Rural TIP is meant to show regional agreement on the need and priority for transportation projects so that all parties involved can be sure they are making the best investment for their respective communities. It is also expected to be consistent with the projects and objectives included in the Regional Long Range Transportation Plan, to ensure that all agencies are working towards the same goal.

The Rural TIP is a part of the Statewide Transportation Improvement Program (STIP). As a result of the program rules being established by Federal law, no project can receive federal funding unless it is listed in the Rural Transportation Improvement Program!



Script:
You may ask, why is my participation in the Rural TIP program important? It is important for you to participate because funding secured by this process is intended to address your communities' most immediate needs. By providing comments on the priority of the projects included, you are helping us identify regional priorities.

By reviewing the entire program in a single meeting, you are: 1) making a regional impact, 2) helping us be more intentional with your money, and 3) ensuring that we are investing where we should.

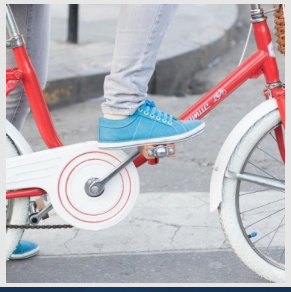
How Projects are Selected for the Rural TIP

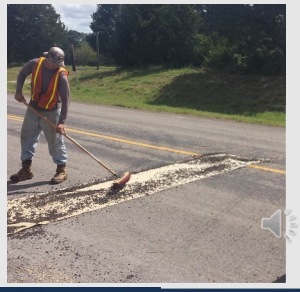
Projects are identified and selected by evaluating existing and future needs based on:

current conditions and projections, statewide and regional plans, public input regarding transportation priorities

^ This would be you, right now!

For Example:





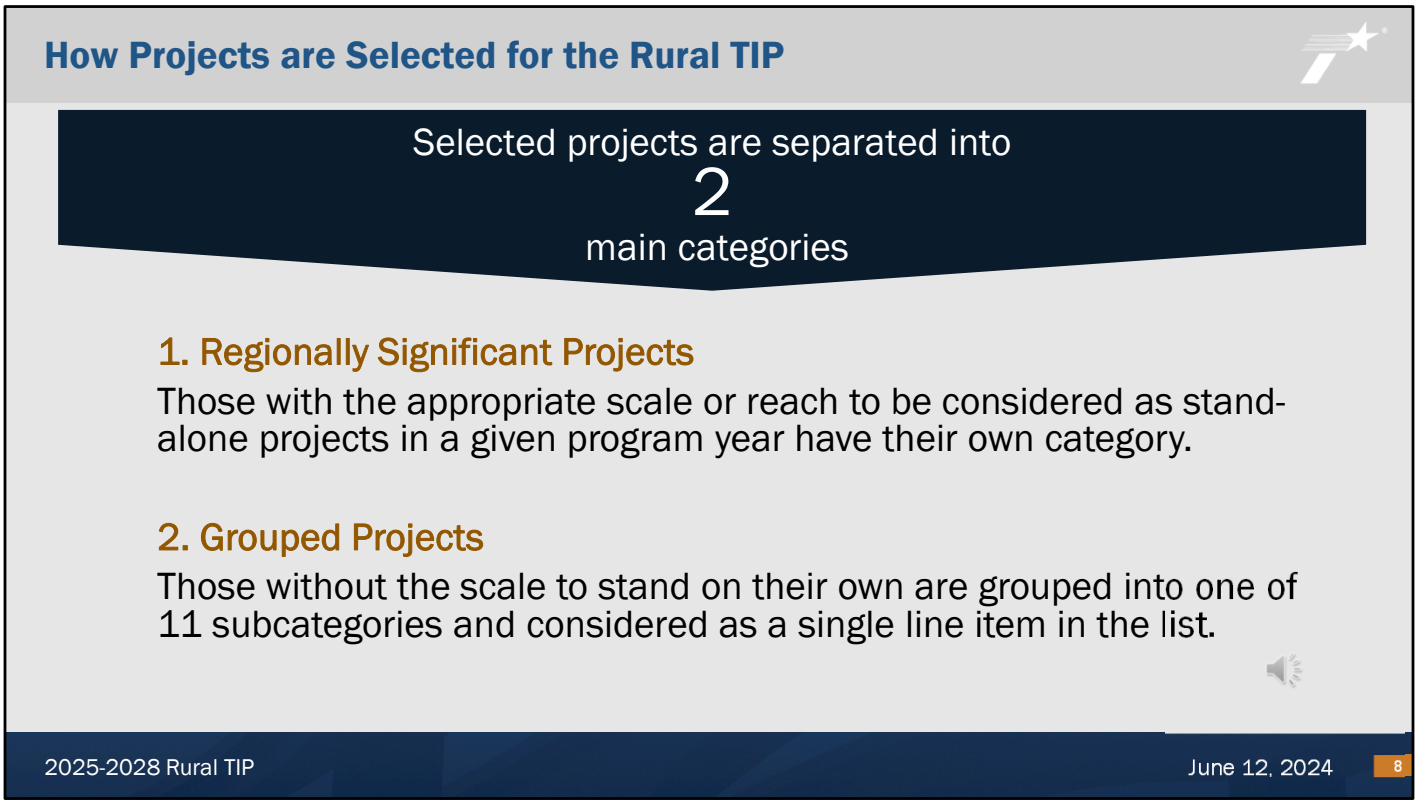
2025-2028 Rural TIP June 12, 2024 7

Script:

Let's go over how projects are selected for the Rural TIP. Rural Transportation Organizations, Metropolitan Planning Organizations and local governments are responsible for helping to identify and select projects on the state transportation system and other national roadways within their boundaries in coordination with TxDOT. This includes Interstates, State and US Highways as well as Farm-to-Market roads.

The projects you review today should be responsive to local needs!

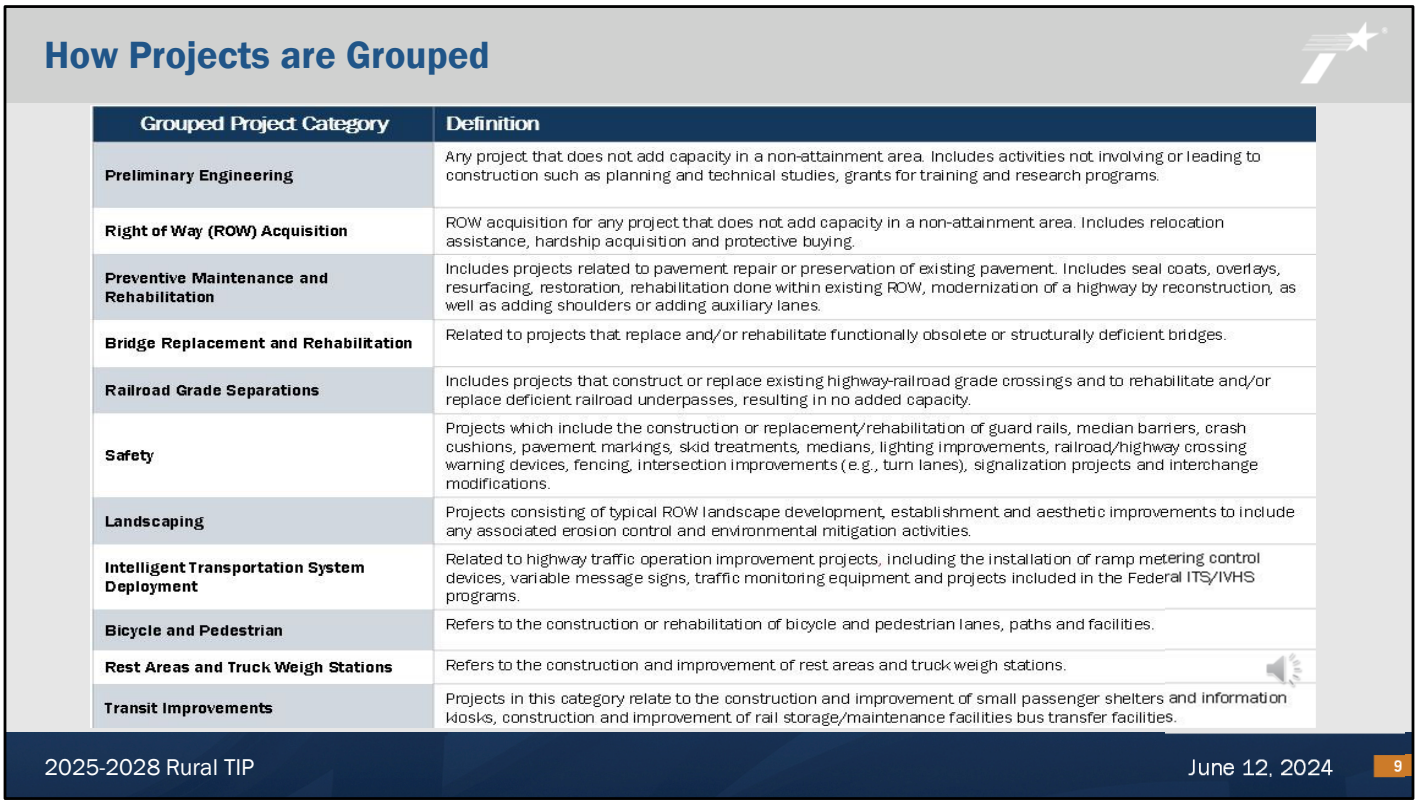
It is our responsibility to provide you with the opportunity to provide input on which projects are being developed.



Script:
Once projects have been defined, they are evaluated according to their scale and classified according to the funding they require as well as their potential impact.

Big projects are categorized as Regionally Significant Projects and are included as stand-alone projects.

To simplify this budgeting and planning process, smaller projects are lumped together into 11 separate subcategories, refered to as Grouped Projects. Grouped projects include things like landscaping, safety lighting, or new bicycle and pedestrian facilities. This grouping practice simplifies the federal funding of smaller projects. *i.e., the pavement repair of an FM road.*



Script:

Let's look more closely at the groups. The 11 subcategories for grouped projects are those without the size to stand on their own. They include Preliminary Engineering, Right of Way, Preventative Maintenance and Rehabilitation, Railroad Grade Separations, Safety, Landscaping, Intelligent Transportation System Deployment, Bicycle and Pedestrian, Rest Areas and Truck Weigh Stations, and Transit Improvements.

If you would like to review these groups more closely, please be aware that this presentation will be posted on our website after this meeting.

2025-2028 Rural TIP June 12, 2024 29

Script:
This table is a list of the grouped projects included in the 2025-2028 Rural TIP for Upshur County.

Script:
The Rural TIP functions as a project budget list for the District. As such it is fiscally constrained. Like the budget of a household, the Rural TIP has to be realistic about the amount of money available to cover the needs. Frequently we identify more improvements than we have money to implement. This means prioritizing according to those items that are of highest importance.

We've discussed the list of projects but where is the money coming from? Funds can come from 3 main sources:

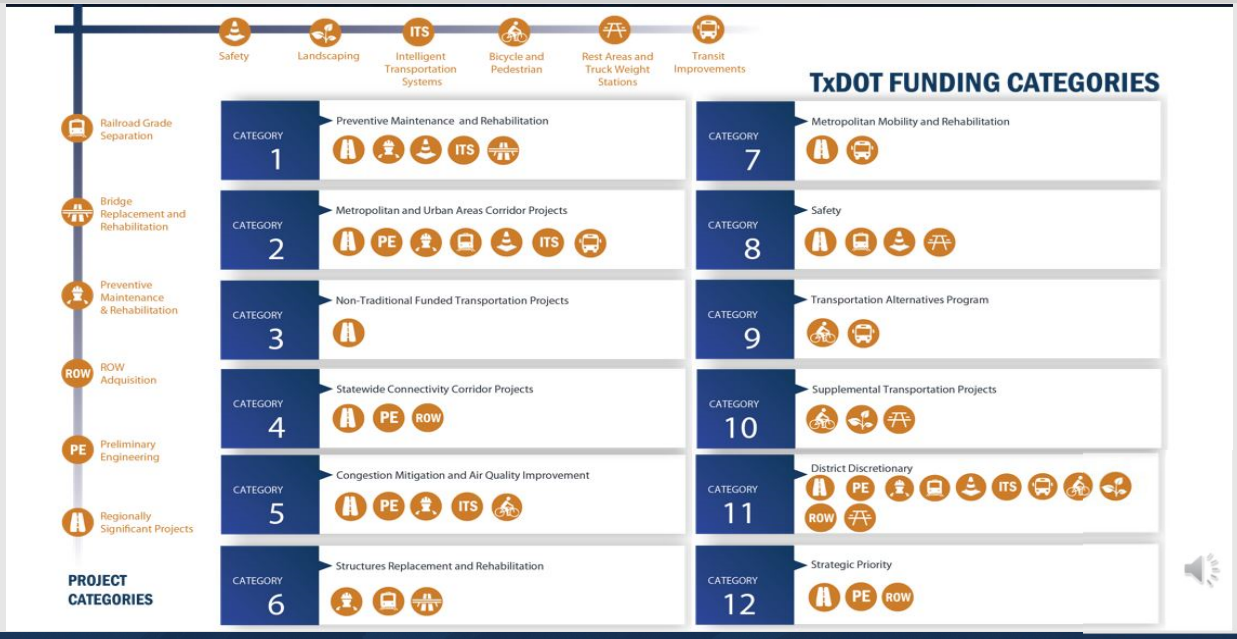
1) The Federal Government, through the establishment of the Moving Ahead for Progress in the 21st Century Act or MAP-21. These funds are allocated through the processes established by the Federal Highway and Transit Administrations.

2) TxDOT, like the Federal Government also allocates a budget for these projects through the Unified Transportation Program's 12 funding categories.

And 3) the local governments.

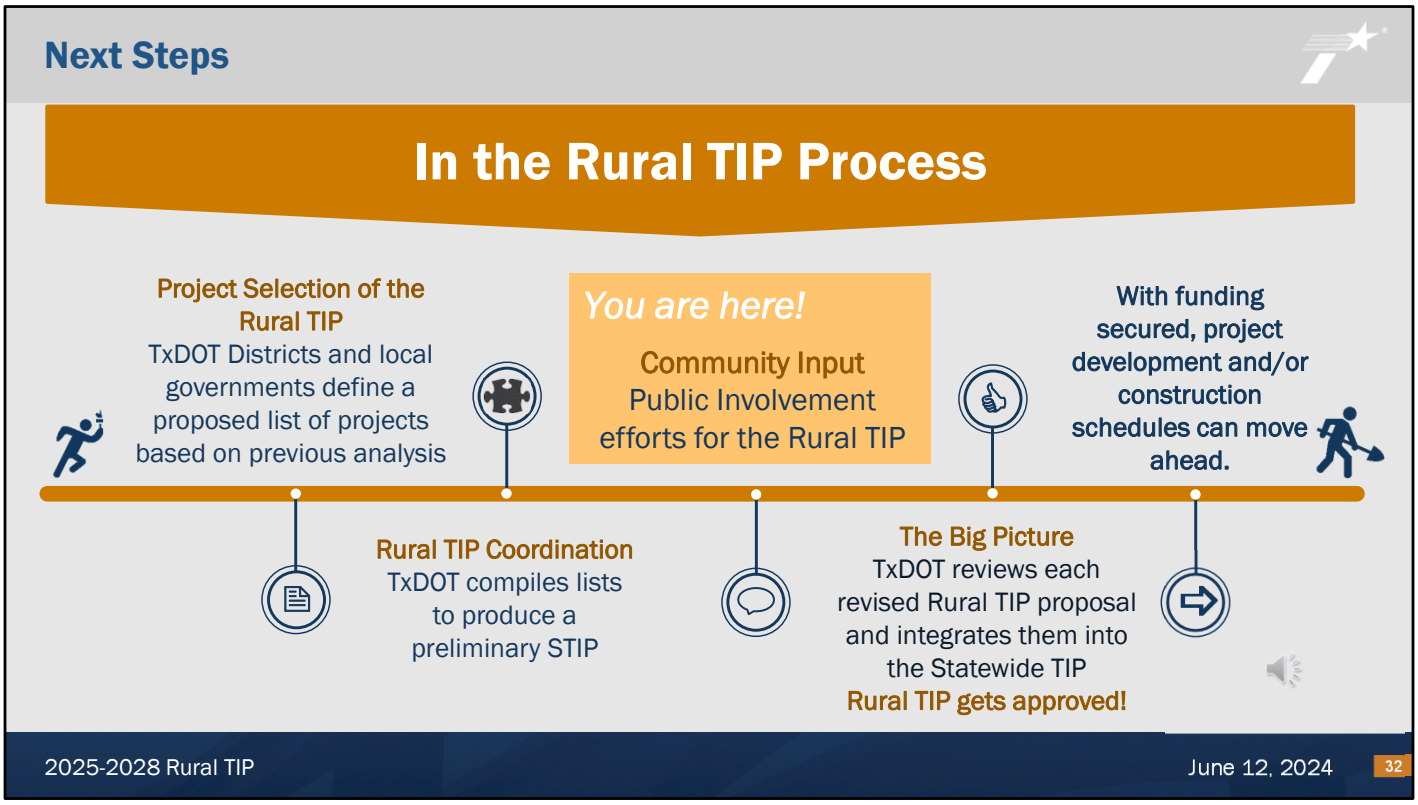
Once the need has been identified and the amount of federal monies has been defined, the Rural TIP helps local governments assess the matching funding requirements.

Projects & Funding



2025-2028 Rural TIP June 12, 2024 31

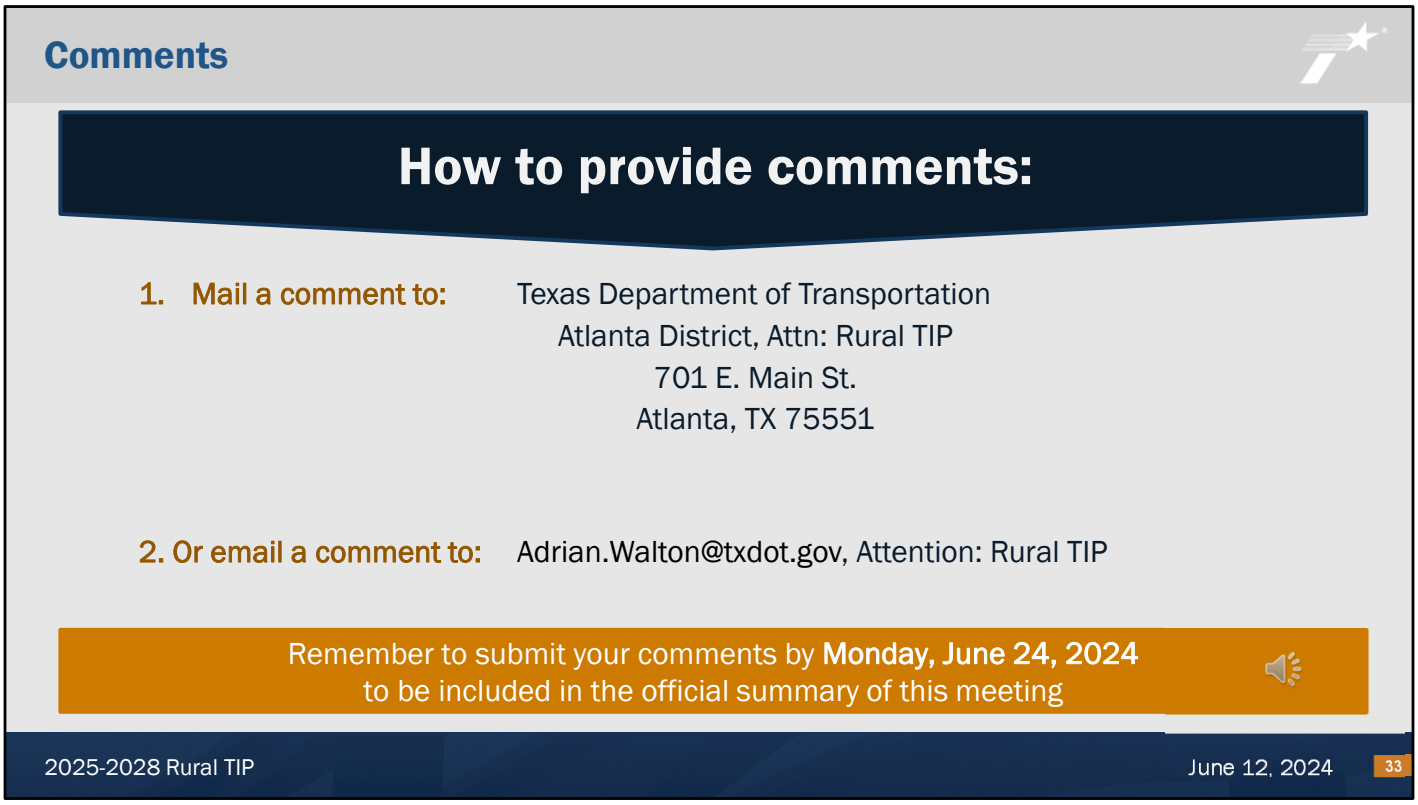
Script:
TxDOT's 12 funding categories assigned by the Unified Transportation Program are shown here. As a reminder this presentation will be posted on our website at www.TxDOT.gov after this meeting if you'd like to look more closely at these categories.



Script:
What's next? What happens now that you've reviewed and commented on these projects?

This timeline illustrates the Rural TIP process and where we are right now.

The Statewide Transportation Improvement Program (STIP) is built from the Rural TIPs of all of the 25 Districts in the State as well as the Transportation IMPROVEMENT programs from all the MPOs called TIPs. This timeline shows where we are in the Rural TIP process now and how this fits into the overall effort. Once the STIP is approved by the Federal government everyone's projects are CONSIDERED funded.



Script:
Now that you are familiar with the RTIP program and process, we want to hear what you think. Please fill out a comment card and mail it back to us at the address on the screen.

You can also email in your comments to: Adrian.Walton@txdot.gov

Comments must be postmarked or otherwise received by Monday, June 24, 2024.

If after today, you would like more information or have any other questions feel free to reach out to our District.

Remember that you can print out or share our website link if you wish to discuss this information with your friends or family! Just remind them to send comments by Monday, June 24, 2024.
