

Script:

Welcome to the Bryan District Rural Transportation Improvement Program Public meeting for the 2025- 2028 program!

My name is Lindsey Schroeder from the Bryan District and I will be your MC.

We are here today to go over the projects to be included in the upcoming 2025-2028 Rural Transportation Improvement Program or TIP.

Agenda

- 1 Safety Minute
- 2 Bryan District & its boundaries
- 3 The Rural Transportation Improvement Program (TIP)
- 4 How the Rural TIP Impacts You
- 5 How Projects are Selected for the Rural TIP
- 6 Projects by County
- 7 Funding
- 8 Next Steps

Script:

Today we will go over the counties in Bryan district and all the roads under the district's care. We will also review the basics of what is the Rural TIP? and why is it important for you to be here with us today. We will explain how the projects included in the program are selected and classified in order to make the most of the program.

Once you understand all of this, you will have the opportunity to review all the projects the Bryan District has included in the 2025-2028 program. Both the big projects and the small supporting projects.

We will also go over funding, answering questions on "where does the money to pay for these projects come from? and how it get distributed?".

Lastly, we will outline all the options you have to comment on these projects and their priority.

November 7, 2000 was the last deathless day on Texas roadways.

Help us end the streak of daily deaths, Texas!

#EndTheStreakTX

End the streak of daily deaths on Texas roadways.

Safety Never Stops!

Script:

First, I'd like to take a safety minute to talk about TxDOT's #EndTheStreakTX

There's been a death every day on Texas roads for 23 years straight — that's over 75,000 people. And that's a streak we want to break.

How can we end the streak? Most crashes and fatalities are due to impaired driving, distracted driving or failure to use seat belts. In other words, they're preventable. Ending the Streak is in your hands.

Here's what you can do:

- Buckle up: seat belts are your first line of defense.
- Drive the speed limit, or slower, depending on road or weather conditions.
- Never drive under the influence of alcohol or other drugs.
- Plan a sober ride home.
- When driving, put your phone away or set to "Do Not Disturb."

Here are some examples of what TxDOT is doing:

- We engineer roads to be more forgiving of driving behaviors.
- Roadside rumble strips alert drivers if they start moving off the road.
- We use median barriers to prevent head-on collisions.
- We use technology like flashing LED signs and radar sensors to prevent wrong-way collisions.
- We run driver education campaigns to give drivers safety reminders.

Let's "End The Streak" together!

Show your support for safer driving in Texas by reminding your fellow Texans of our shared responsibility. Use #EndTheStreakTX on your Facebook, Twitter, Instagram and other social media accounts. And remember, we're all on these roads together!

District Boundaries

BRYAN DISTRICT

2025-2028 Rural TIP

May 31, 2024

4

Script:

The Bryan District includes all of the counties shown in the map. Projects included in the 2025-2028 Rural TIP are located in Brazos, Burleson, Grimes, Freestone, Leon, Madison, Milam, Robertson, Walker, and Washington Counties.

THE RURAL TIP

is list of all added capacity and regionally significant projects to be funded within a TxDOT District during the next four years, including those eligible for federal funding.

It can include projects for :

A Rural TIP project is anticipated to be funded within the next 4 years.

It shows regional agreement (community-region-state) on the need of a project.

Script:

The Rural Transportation Improvement Program is a list of local projects to be funded in a TxDOT District over the next 4 years. This means that all projects included in the list are expected to be underway within 4 years following its approval. These are the changes you can expect to go to contract in the near future!

It is multimodal; which means that it can include projects relating to highways, bicycle and pedestrian facilities, transit services, and freight projects as well as the preliminary studies used to define those projects.

Rural TIP is meant to show regional agreement on the need and priority of a transportation project, so all parties involved can be sure they are making the best investment for the community. It is also expected to be consistent with the projects and objectives included in the regional Long Range Transportation Plans, to ensure that all agencies are working towards the same goal.

The Rural TIP is a part of the Statewide Transportation Improvement Program (STIP). Because the program rules are established by Federal law, no project can receive federal funding unless it is listed in the Rural TIP!

How the Rural TIP Impacts You

The Rural TIP process includes opportunities to provide input on the priority of major projects that are listed on it.

Local and small projects around your community dealing with safety and access also get funding through the Rural TIP, for example:

Road expansions

Sidewalks

Bike lanes

Pavement repair or maintenance

New or improved signals

Turning lanes

By participating today, you are providing input in [number of projects included in this Rural TIP] projects!

**You know your
community
best!**

**Tell us what
project
should come
first and why**

Script:

It is important for you to participate because funding secured by this process is intended to address your communities' most immediate needs. By providing comments on the priority of the projects included, you are helping us identify regional priorities. By reviewing the entire program in a single meeting you are: 1) having a regional impact, 2) helping us be more effective with your money, and 3) ensuring that we are investing where we should.

How Projects are Selected for the Rural TIP

Projects are identified and selected by evaluating existing and future needs based on:

current conditions and projections, statewide and regional plans, public input regarding transportation priorities

^ This would be you, right now!

For Example:

Script:

Rural Transportation Organizations, Metropolitan Planning Organizations and local governments are responsible for selecting projects within their boundaries

TxDOT, through the District office, is responsible for selecting of all projects relating to the State Transportation System and other National roadways. This includes Interstates, State and US Highways but most importantly this can also include the Farm-to-Market and Ranch-to-Market roads you use every day. The projects you will review today should respond to local needs!

It is our responsibility to provide you with the opportunity to provide input on which projects should be advanced.

Selected projects are separated into

2

main categories

1. Regionally Significant Projects

Those with the appropriate scale or reach to be considered as stand-alone projects in a given program year have their own category.

2. Grouped Projects

Those without the scale to stand on their own are grouped into one of 12 subcategories and considered as a single line item in the list.

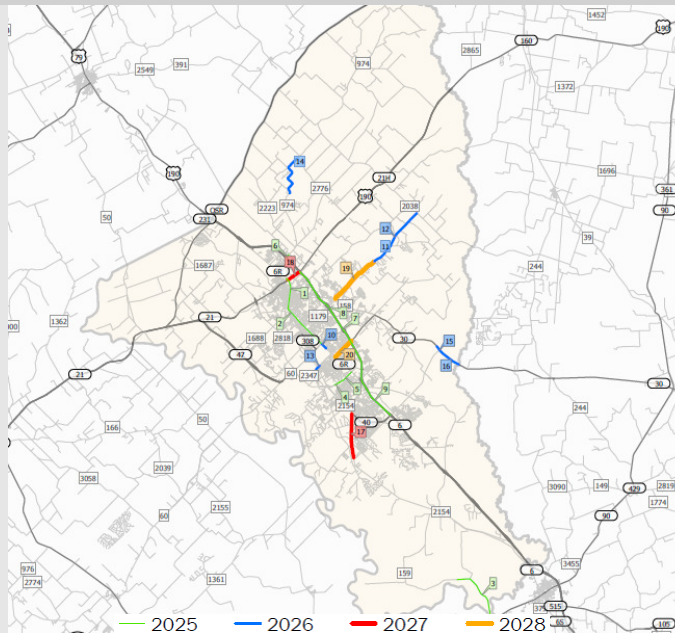

Script:

Once projects have been defined, they are evaluated according to their scale and classified according to the funding they require as well as their potential impact.

Big projects are categorized as Regionally Significant Projects and are included as stand-alone items. For example, *A new bridge over a river*

To simplify this budgeting and planning process, smaller projects are lumped together into 12 separate subcategories, refer to as Grouped Projects. Grouped projects include things like landscaping, safety lights, or new bicycle and pedestrian facilities. This grouping practice facilitates the federal funding of smaller projects. *For example, the pavement repair of an FM road.*

Go over each project.

The Rural TIP is a list of projects that functions as a budgeting tool for our District.

Funds can come from:

Federal Government

Through the Federal Highway and Transit Administrations

TxDOT

Through its Unified Transportation Program funding categories

Local governments

Who may be required to provide matching funds for federal monies

Script:

The Rural TIP functions as a budget list for the District. Like the budget of a household, the Rural TIP has to be realistic about the amount of money available to covers all the needs. Frequently we identify more improvements than we have money to implement. This means prioritizing according to those items that are most necessary.

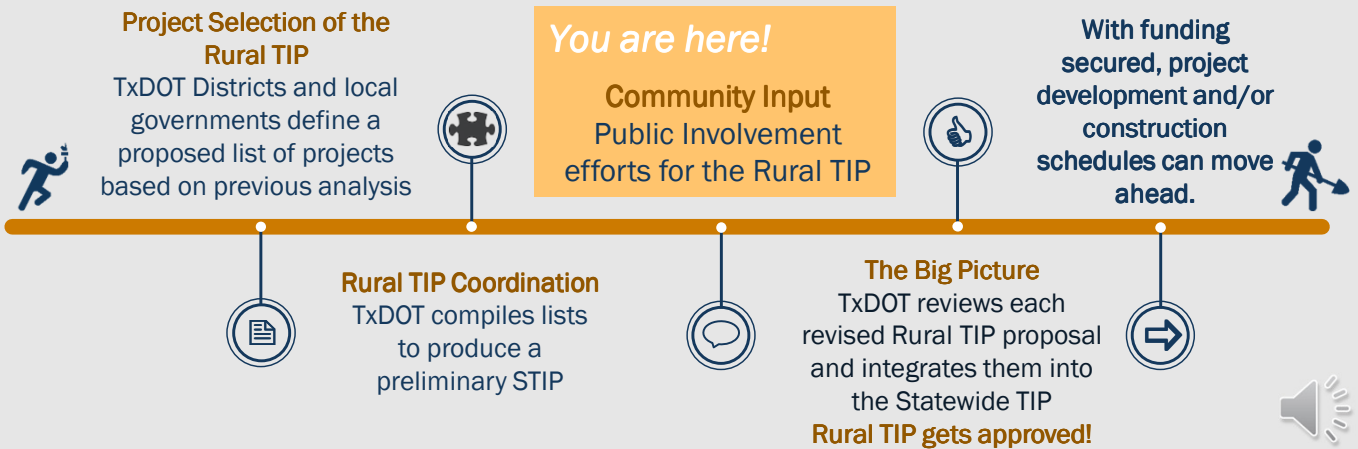

We've discussed the list but where is the money coming from? Funds can come from 3 main sources:

- 1) The Federal Government, through the establishment of the Infrastructure Investment and Jobs Act (IIJA), the federal government allocates these funds through the processes established by the Federal Highway and Transit Administrations.
- 2) TxDOT, like the Federal Government also allocates a section our budget for these projects through the Unified Transportation Program's 12 funding categories.

And 3) the local governments. Once the need has been identified and the amount of federal monies has been defined, the Rural TIP helps local governments assess the funding requirements to match those of the federal and state government and their capacity to meet them.

In the Rural TIP Process

Script:

Now, after you review and comment on these projects, what is next? The timeline above illustrates the Rural TIP process and where we are right now. Once your comments have been collected and considered, if necessary, the Bryan District will provide TxDOT with a revised Rural TIP for approval and integration into the Statewide document.

The Statewide Transportation Improvement Program is built from the Rural TIP of all of the 25 Districts in the State as well as the Transportation programs from all the MPOs. The timeline above shows where in the Rural TIP process fits into this larger effort. Once the STIP is approved by the Federal government everyone's projects are funded and become one step closer to getting constructed.

How to provide comments:

1. Mail a comment to:

Texas Department of Transportation
Bryan District, Attn: Rural TIP
2591 North Earl Rudder Freeway
Bryan, Texas 77803

2. Or email a comment to:

BRY_RTIP@txdot.gov, Attention: Rural TIP.

Remember to submit your comments by **Monday, June 17, 2024** to be included in the official summary of this meeting

Script:

Now that you are familiar with the Program, we want to hear what you think. Go ahead and fill a comment card and mail it back to us at the address on the screen.

You can also email in your comments to: BRY_RTIP@txdot.gov

Comments must be postmarked or otherwise received by Monday, June 17, 2024. Please make sure to send your comments before that date.

If after today, you would like more information or have any other questions feel free to reach out or visit the District Webpage for updates.

Remember that you can share the project webpage which includes the meeting materials if you wish to discuss this information with your friends or family! Just remind them to make sure they send any comments in before Monday, June 17, 2024.
