

# SH 21 Intersection Improvements

## From 0.3 Mi W of FM 50 S to 1.5 Mi E of OSR

TxDOT's Bryan District is developing plans to improve the intersections at FM 50 South, FM 50 North and OSR along SH 21 in Burleson and Brazos Counties.

### Proposed Improvements

The proposed improvements would construct Restricted Crossing U-Turn (R-CUT) intersections to enhance safety and improve the operation of the intersections. These intersections simplify decision-making for drivers and minimize the potential for higher severity incidents, such as T-bone crashes. R-CUT intersections allow left turns into intersecting side roads and eliminate left turns for vehicles exiting the side roads. Vehicles wanting to make a left from a side road would take a right and then utilize a U-turn offset from the intersection to change direction. TxDOT does not anticipate any right-of-way acquisition for this project.

### Anticipated Schedule
