

Finding of No Significant Impact for a FHWA Project

Proposed Action: FM 70/SH 286 Passing Lanes

Project Limits: FM 70 from SH 286 to US 77, and SH 286 from South of FM 2444 to FM 70

City: Corpus Christi

County: Nueces

State: Texas

TxDOT CSJ(s): 0326-01-067, 0326-01-061, and 1558-03-030

In accordance with 23 CFR Section 771.119 and Section 771.121, the Texas Department of Transportation (TxDOT) has determined that FM 70/SH 286 Passing Lanes will not have a significant impact on the human or natural environment.

This Finding of No Significant Impact (FONSI) for the Preferred Alternative is based on the final Environmental Assessment (EA) dated November 2022 and the entire project record. This decision documents the selection of Build Alternative, presented in the final EA as the Preferred Alternative, which is described as:

The proposed project would widen the existing FM 70 and SH 286 roadways to add 12-foot-wide intermittent passing lanes and 10-foot wide shoulders for approximately 25 miles. The intersection of FM 70 and SH 286 would be improved by adding a right turn lane from southbound SH 286 to westbound FM 70. In the eastbound direction the proposed project would add passing lanes in five areas along FM 70. In the westbound direction the proposed project would add passing lanes in four areas along FM 70. Along SH 286, the proposed project would add one passing lane in both the northbound and southbound direction. There are 11 total proposed passing lanes. Passing lanes would be 12 foot wide. Additionally, drainage improvements to address flooding issues on the existing roadway are proposed throughout the project length. The proposed drainage would remain an open ditch system, and would retain nine bridge class culverts, add three slab span bridges, and retain the two concrete beam bridges. The proposed ROW width would be increased to approximately 150 feet.

A Notice of Availability of the draft EA was issued on May 5, 2022.

A Notice Affording Opportunity for a Public Hearing was published on May 5, 2022.

No changes to the draft EA were made as a result of comments received on the draft EA during the posted comment period or from comments made at the public hearing.

Public Hearing Opportunity Documentation has been prepared and is available for review on request.

The final EA, and reports contained in the file of record have been independently evaluated by TxDOT and determined to adequately and accurately discuss the need, purpose, alternatives, environmental issues, impacts of the proposed project, and appropriate mitigation measures. These documents provide sufficient evidence and analysis for determining that preparation of an Environmental Impact Statement is not required. These documents are incorporated by reference into this decisional document.

Based upon TxDOT's review and consideration of the analysis and evaluation contained in the EA for this project, and after careful consideration of all social, economic, and environmental factors, including input from the public involvement process, TxDOT hereby issues this Finding of No Significant Impact for the FM 70/SH 286 Passing Lanes project on FM 70 from SH 286 to US 77, and SH 286 from South of FM 2444 to FM 70.

Finding of No Significant Impact for a FHWA Project

TxDOT will ensure adherence and completion of all project commitments described in the final EA November 2022 Section 8. TxDOT will ensure that any and all local, state, or federal permit requirements and conditions are met and otherwise complied with.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and the Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.
