

# FM 70/SH 286 Passing Lane Project

FM 70 from SH 286 to US 77 and SH 286 from south of FM 2444 to FM 70

## About the Project:

The Texas Department of Transportation is proposing to construct passing lanes and widen shoulders on Farm to Market (FM) 70 from the SH 286/FM 70 intersection to US 77 and SH 286 from south of FM 2444 to FM 70 in Nueces County, Texas.

The proposed project would construct intermittent passing lanes along both FM 70 and SH 286 as well as improvements to the FM 70 and SH 286 intersection, including a right turn lane from southbound SH 286 to westbound FM 70. The project extends for approximately 25 miles along both FM 70 and SH 286. The proposed project would add 12-foot passing lane sections throughout the project limits and widen shoulders to 10-feet. Drainage improvements would be made throughout the project limits, including regrading ditches and where appropriate, widening culverts and bridges.

## Additional Information:

TxDOT will perform environmental studies, surveying and mapping tasks needed to move the project forward. Proposed improvements will ultimately be based on traffic, local and regional access needs, safety, the avoidance and minimization of environmental impacts, and the consideration of community input.
