

# SH 35 at SH 361/Spur 202 Interchange

TxDOT Corpus Christi District

San Patricio County, Texas

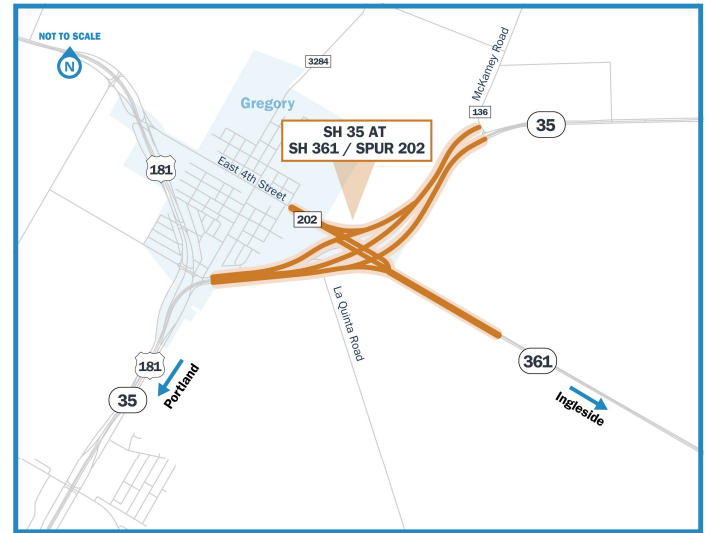

CSJ: 0180-06-118, 0180-10-082, 0180-11-016

## Project Overview

TxDOT is proposing to construct an elevated Single Point Urban Interchange (SPUI) to connect SH 35, SH 361, and Spur 202 located in Gregory.

### Proposed improvements include:

- Adding continuous flow for those turning right
- Eliminating two railroad crossings at ground level
- Providing wider turning lanes
- Reconstructing ramps
- Extending frontage roads

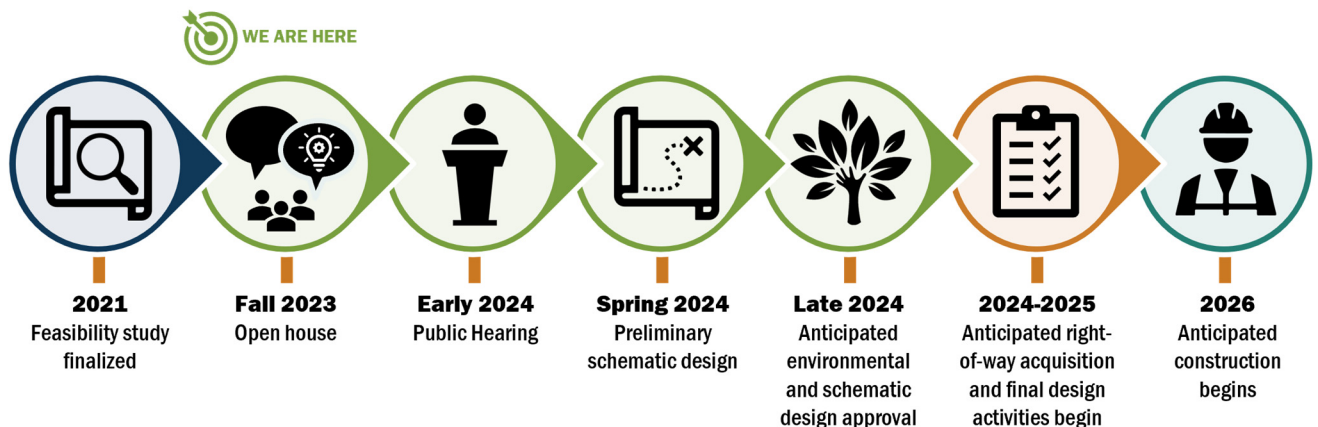

A **Single Point Urban Interchange (SPUI)** is an innovative intersection design where a single traffic signal at the center of the interchange controls all left turns. This allows drivers to make opposing left turns at the same time which improves the efficiency of the intersection.

A SPUI would provide flexibility for all movements in each direction for current conditions and for future development. Data analysis in the 2021 feasibility study indicated that a SPUI was a preferred option for safety, mobility, and operational efficiency.

## Anticipated Project Timeline

*\*This timeline is approximate and subject to change.*

Advancement to right-of-way acquisition, utility adjustments, detailed design, and project construction is contingent upon the results of the environmental process and funding availability.

## What are TxDOT's goals?

- Identify a long-term solution that will:
- ✓ Improve safety
  - ✓ Reduce traffic congestion
  - ✓ Reduce delays at railroad crossings
  - ✓ Improve connectivity to SH 35 for hurricane evacuation
