The project is located along US 287 from Boyce Road to Cooke Road and includes constructing new two-lane northbound and southbound US 287 frontage roads with one six-foot sidewalk on the southbound side and ten-foot shared-use path for bicyclists and pedestrians on the northbound side, new access ramps, and new grade separated interchanges. The project is approximately 1.4 miles long. The existing right of way is 250 feet and the proposed right of way ranges between 297 and 324 feet.

The proposed project would, subject to final design considerations, require additional right of way and potentially displace one non-residential structure. Relocation assistance is available for displaced persons and businesses. Information about the TxDOT Relocation Assistance Program and services and benefits for those displaced and other affected property owners, as well as information about the tentative schedule for right-of-way acquisition and construction, can be obtained from the TxDOT district office by calling (214) 320-6675.

The proposed project may involve construction in wetlands. The proposed project would involve an action in a floodplain.

Any environmental documentation or studies, any maps and drawings showing the project location and design, tentative construction schedules, and other information regarding the proposed project are on file and available for inspection Monday through Friday between the hours of 8 a.m. and 5 p.m. at the TxDOT Dallas District Office, 4777 East U.S. Highway 80, Mesquite, TX 75150, (214) 320-4431.
