SPUR 170

From east of I-35W to Intermodal Parkway

Texas Department of Transportation

PROJECT OVERVIEW

Highway/limits: Spur 170 from east of I-35W to Intermodal Parkway in Tarrant County, Texas

Project ID: 0902-90-166

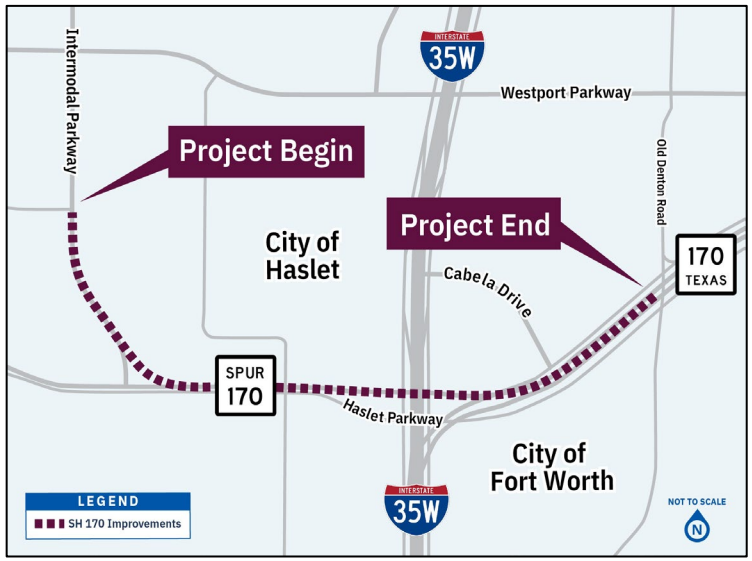
Project length: approximately 2.4 miles

Description: The proposed project would construct a new elevated bridge approximately 1.4 miles long that would connect the new Spur 170 from the mainlanes east of I-35W to Intermodal Parkway, with associated roadway on either side, for a total project length of about 2.4 miles. The Spur 170 bridge would consist of one 14-foot lane with shoulders in both directions.

The proposed project would improve regional connectivity and enhance mobility for existing and future traffic by providing direct access for SH 170 traffic (including truck traffic) heading to the Intermodal Port and the Perot Field Fort Worth Alliance Airport, while reducing traffic on city streets.

Estimated construction cost: about $115 M

Additional right of way required: approximately 10 acres



Map of project area.

ANTICIPATED PROJECT TIMELINE

(Approximate and subject to change.)

Summer 2024	Summer 2026	Spring 2027	Summer 2028	Spring 2029
• First public meeting	• Second public meeting	• Environmental clearance and schematic design approval	• Complete right-of-way acquisition and begin utility adjustments	• Construction begins
