

FM 1314 Access Management Study (SH 242 to SL 494)

What is this Project About?

The Texas Department of Transportation (TxDOT) Houston District is conducting an Access Management Study for the 12-mile segment of Farm-To-Market (FM) 1314 from State Highway (SH) 242 to State Loop (SL) 494 in Montgomery County. Within these limits, FM 1314 is a north-south corridor that has experienced increasing traffic due to area growth in residential and commercial development.

The FM 1314 study segment carries approximately 20,500 to 36,400 vehicles per day. The crash risk increases gradually from the north to the south. The southern section has a crash rate significantly higher compared to similar roads across the state. The FM 1314 corridor has experienced increasing traffic due to growth in residential and commercial development. The corridor is a major thoroughfare and serves several communities. The roadway is divided by SH 99/Grand Parkway.

Project Location Map

Study Purpose

The purpose of FM 1314 Access Management Study is to provide vehicular access to land development in a manner that preserves the safety and efficiency of the transportation system. The FM 1314 study aims to identify short-, medium-, and long-term transportation improvements to improve safety and mobility, traffic flow, reduce motorist delay, and support existing and future development.

Benefits

The proposed improvements would:

- Improve safety through reduced crashes
- Improve traffic operations by better planning how vehicles move through the corridor
- Reduce congestion by improving travel time
- Improve accessibility by enhancing multimodal connectivity
- Preserve and enhance economic opportunities along the corridor

How do I Provide Feedback and Ask Questions?

- **Submit your comments tonight:** Fill out a comment form and place in the comment box
 - **Email your comments:**
