

Public Meeting Comment Response Matrix – 114<sup>th</sup> Street Project in Lubbock 0905-06-118

Committer Number	Committer Name	Date Received	Source	Comment Topic	Response
1	Jess Ball	5/21/2021	Email	Consider use of bioswales to assist with drainage/runoff, even narrow ones. They provide nice aesthetics, plants can absorb some CO2, and they allow some excess water to soak back into the ground rather than just runoff.	Thank you for your comment. This project will be implementing a natural channel between Memphis Avenue and the playa lake to the east. Additionally, a rain garden is proposed to take stormwater runoff from the gutter and filter the water through plants and layers of soil, discharging cleaner water into the playa lake.
2	Kay Jackson	6/4/2021	Email	Why can't you widen it and fix the road all the way to the interstate. Is it because there aren't as many fancy houses just poor working people	Thank you for your comment. This project limit is from Quaker Avenue to Indiana Avenue. Any future improvements to the east toward US 87 are outside of this project scope.
3	Mike Schwertner	6/4/2021	Email	<p>It's great that Lubbock's 114th street is being improved. I frequently drive on this road and can attest first hand that it is definitely needed and overdue.</p> <p>However I totally disagree with only 5 lanes. Do it right and put 7 lanes like the majority of Lubbock's main roads. Do away with the wants of a few (the sidewalk areas) and cover the NEEDS. 7 lanes!!</p> <p>– Michael A. Schwertner 3607 102nd ST Lubbock, TX 79423</p>	Thank you for your comment. The City of Lubbock updated the Master Thoroughfare Plan in 2018 and at that time 114 <sup>th</sup> Street was categorized as a Minor Arterial which is a 5-lane roadway section. The development of this project design is in line with the updated Master Thoroughfare Plan.
4	Raymond Cross	6/7/2021	Email	Dear Mr Morris, my wife and I live on 106 th street near the soon to be expanded 114th street. The traffic has progressively gotten worse since we moved here last August. We will be very glad to have 114th widened to help with the growth in traffic from all the other expansion in the area. Our main concern is being able to get onto 114th from Memphis street. We have had great difficulty being able to see the oncoming traffic at that intersection and we would really like to recommend placing a stop light at that intersection. Thanks for your consideration of this matter.	Thank you for your comment. This project will include the addition of a traffic signal at 114 <sup>th</sup> Street and Memphis.

				Sincerely, Raymond Cross 3607 106th street, Lubbock Tx 79423	
5	TJ & Lynn Cloude	6/10/2021	Email	<p>Kevin Morris,</p> <p>Thank you so much for your efforts concerning the public input on the 114th Street 5 lane expansion project.</p> <p>The input we would like to offer is to accommodate cyclists on the roads.</p> <p>As homeowners within 3 miles of the HEB store, we would very much like to see considerations regarding the safety of cyclists and bikers who might commute back and forth to the stores within that area.</p> <p>Thank you so much for your time.</p> <p>Kindest regards,</p> <p>Lynn and TJ Cloude</p>	Thank you for your comment. This project proposes a shared use path along the south side of 114 <sup>th</sup> Street. This is a 10' wide path meant to accommodate pedestrians and cyclists.
6	<a href="#">myrna</a> [REDACTED]	6/17/2021	Email	<p>I use 114th street off of Indiana often. I dread when it is closed for changes. More important, however, I strongly feel the streets we have now are in dire need of upgrading. I am more familiar with the areas bordering 98th street and further north. There are so many spots that have holes and it is rare to see any areas where the lane strips have been painted. When I do it is remarkable how much easier and safer it is to drive.</p> <p>Safety for those driving on streets already built should have priority over new areas. They should never have been allowed to build there unless they were willing to pay for streets.</p>	<p>Thank you for your comment. This project will include a traffic control plan that keep the intersection of 114<sup>th</sup> Street and Indiana Avenue operational.</p> <p>Thank you for your other comments, they are outside the scope of this proposed project.</p>
