

# FARWELL-TEXICO BRIDGE PROJECT

## NEW PROPOSED DESIGN INFORMATION

### ROADWAY AND BRIDGE

- The proposed Texico Elevated Bridge would allow for travelers to enter or exit inside the Westbound and Eastbound travel lanes of US 60.
- The proposed elevated bridge would allow the traveling public to access the south side of Texico, NM as well as provide direct access onto US 70/84 in Farwell, TX.
- Serving as a relief route, the new roadway would be a 4-lane undivided surface.

### DRAINAGE

- Drainage areas are being considered and will not be proposed on a design till a route has been selected and further developed.

### RIGHT-OF-WAY

- Right-of-way acquisitions would be required in both Texas and New Mexico.
- Displacements are proposed but minimal.
- There is a proposal to provide an access point for 1st Street in Farwell, Texas onto the new reliever route roadway.
- There is no proposed acquisition or displacements for the North side of US 70/84 in Farwell, Texas.
- Acquisitions of right-of-way proposed would be limited within the pink boundary on the schematic.

## TRAFFIC AND DRAINAGE

- Traffic signals and stop signs will be placed where warranted and after a route has been selected.
- US 60 would have free-flow movement as Stateline’s surface railroad crossing would be eliminated.
- The ramps and bridge structure would tie into the existing roadway and no displacements or acquisition would be proposed east of College Street.
- Speed limits are considered and will be identified during a projects preliminary design phase later in the process.

## RAILROAD

- BNSF is aware of the revisions and has participated in stakeholder meetings with both agencies.
- Three existing railroad crossings would be removed with this Texico Elevated Bridge design.
  - S. Curry Road C.
  - S. College St.
  - New Mexico and Texas Stateline
