Public Involvement Materials Toolkit

OCTOBER 2024

Rev. 11.2024

This is a living PowerPoint toolkit that will be updated as needed. This PDF portfolio of TxDOT Public Involvement Toolkit templates includes a Table of Contents with clickable links that take you directly to each set of outreach materials. Alternatively, you may browse through the complete portfolio.

To select a template, simply click the orange "Download" button at the top of the appropriate page.

Within each individual template you will find all header options, additional instructions, and guidelines for use.

- If a download link does not work in this document, please check the version number and download the newest version.
- All templates are set up with placeholder text and images that should be replaced with your content.
- A non-printing instruction page is included at the beginning of each file for reference.
- All content in the templates is configurable, but please make every effort to maintain consistency with the original template layout.
- If further customization is needed, contact Creative Services-Design in the Communications Division for assistance.

ENV's [Public Involvement Handbook](#) contains TxDOT's requirements for conducting public involvement in connection with the environmental review process under NEPA and TxDOT's state environmental review rules. This Toolkit does not supersede or otherwise alter ENV's Public Involvement Handbook, but can be used in conjunction with ENV's Public Involvement Handbook to conduct environmental review-related outreach.

Environmental constraints are key areas that we need to assess and avoid, if possible, when building roadway improvements. TxDOT would avoid or minimize and mitigate impacts to the greatest extent feasible. Please see the environmental constraints map exhibit.
