

Help Shape Future Public Engagement

When community members participate in decision-making, TxDOT can develop plans and projects that better meet the needs of the people we are serving.

Transportation agencies around the country are partnering with the National Cooperative Highway Research Program (NCHRP) to measure the effectiveness of their public involvement activities.

Key toolkit features

The Public Involvement Effectiveness Measurement toolkit includes the following:

Public survey anonymously collects community input on engagement effectiveness and demographics

Agency survey measures agency perceptions of engagement effectiveness

Agencies can compare the results to identify any gaps and adapt future public involvement activities.

We want to hear from you! Tell us how we're doing. Your feedback helps us:

Learn what is working well and areas to improve engagement

Build relationships with communities, including people traditionally underrepresented in transportation planning

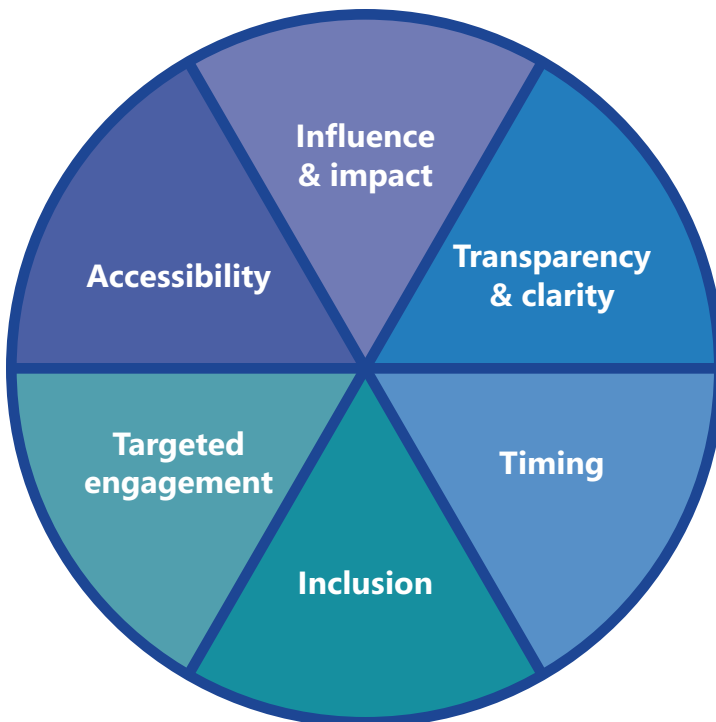

Focus engagement efforts to involve people affected by change in decision-making

Track progress over time

Indicators of effective public involvement

Influence & impact

- Do you understand how public input will influence project decisions?

Transparency & clarity

- Do you understand the project and trust the decision-making process?

Timing

- Did you have enough time to provide input?

Inclusion

- Did the process represent and include those affected?

Targeted engagement

- Was engagement in the locations relevant to people affected by the project?

Accessibility

- Were there multiple methods for public participation?
