WHY IMPROVEMENTS ARE NEEDED

The cities of Cibolo and Schertz have experienced historic growth over the last decade. This growth has led to the need for expanding and updating existing infrastructure. Road improvements are needed to enhance safety and mobility, including addressing the increased traffic and adding options for pedestrians and bicyclists along the project area.

PROJECT OVERVIEW

TxDOT is improving FM 1103 from I-35 to Rodeo Way in Comal and Guadalupe counties in order to increase mobility, enhance safety, and reduce congestion. The project will:

Expand FM 1103 from a two-lane roadway to a four-lane roadway with a center turn lane.

Add six-foot sidewalks in each direction.

Add five-foot bike lanes in each direction.

The construction cost is \$39 million.
