

# I-10 Traffic Pattern Changes and Closures Between Woodlake Parkway and Loop 1604: 9 p.m. Friday, July 26 – 5 a.m. Monday, July 29

All I-10 eastbound mainlanes will temporarily close Friday-Saturday night from FM 1516 to Loop 1604; all eastbound traffic will detour to the FM 1516 exit and frontage road during this time

One alternating eastbound mainlane will be closed throughout the weekend as crews install barriers for a traffic shift to new pavement in the median area from Woodlake Parkway to just west of Loop 1604

Southbound traffic on Loop 1604 will go west to FM 1516, turn around, and travel eastbound on the I-10 frontage road back to Loop 1604

Southbound Loop 1604 will be closed at I-10 throughout the weekend for drainage improvements

Eastbound I-10 motorists wishing to access FM 1516 during the ramp closure should exit at Loop 1604 and take the westbound frontage road back to FM 1516

Following the full mainlane closure, the FM 1516 exit ramp will be closed as crews extend it to the new concrete pavement in the median area
