Project Overview

Project Details

SH 16

From West Jett Road to Stacey Road

- **PROJECT LENGTH:**
Approximately 3.6 miles
- **COUNTY:** Bexar
- **PURPOSE:** Improve safety and operations along the corridor
- **PROPOSED IMPROVEMENTS:**
 - Close median crossovers and install unsignalized U-turn lanes
- **RIGHT OF WAY:** No additional right of way would be needed

Project Purpose

What are the issues?

- **Numerous crashes and severe and fatal crashes**
- **Conflicting turning movements at median openings**
- **Higher speed roadway with side streets**

What are we trying to do?

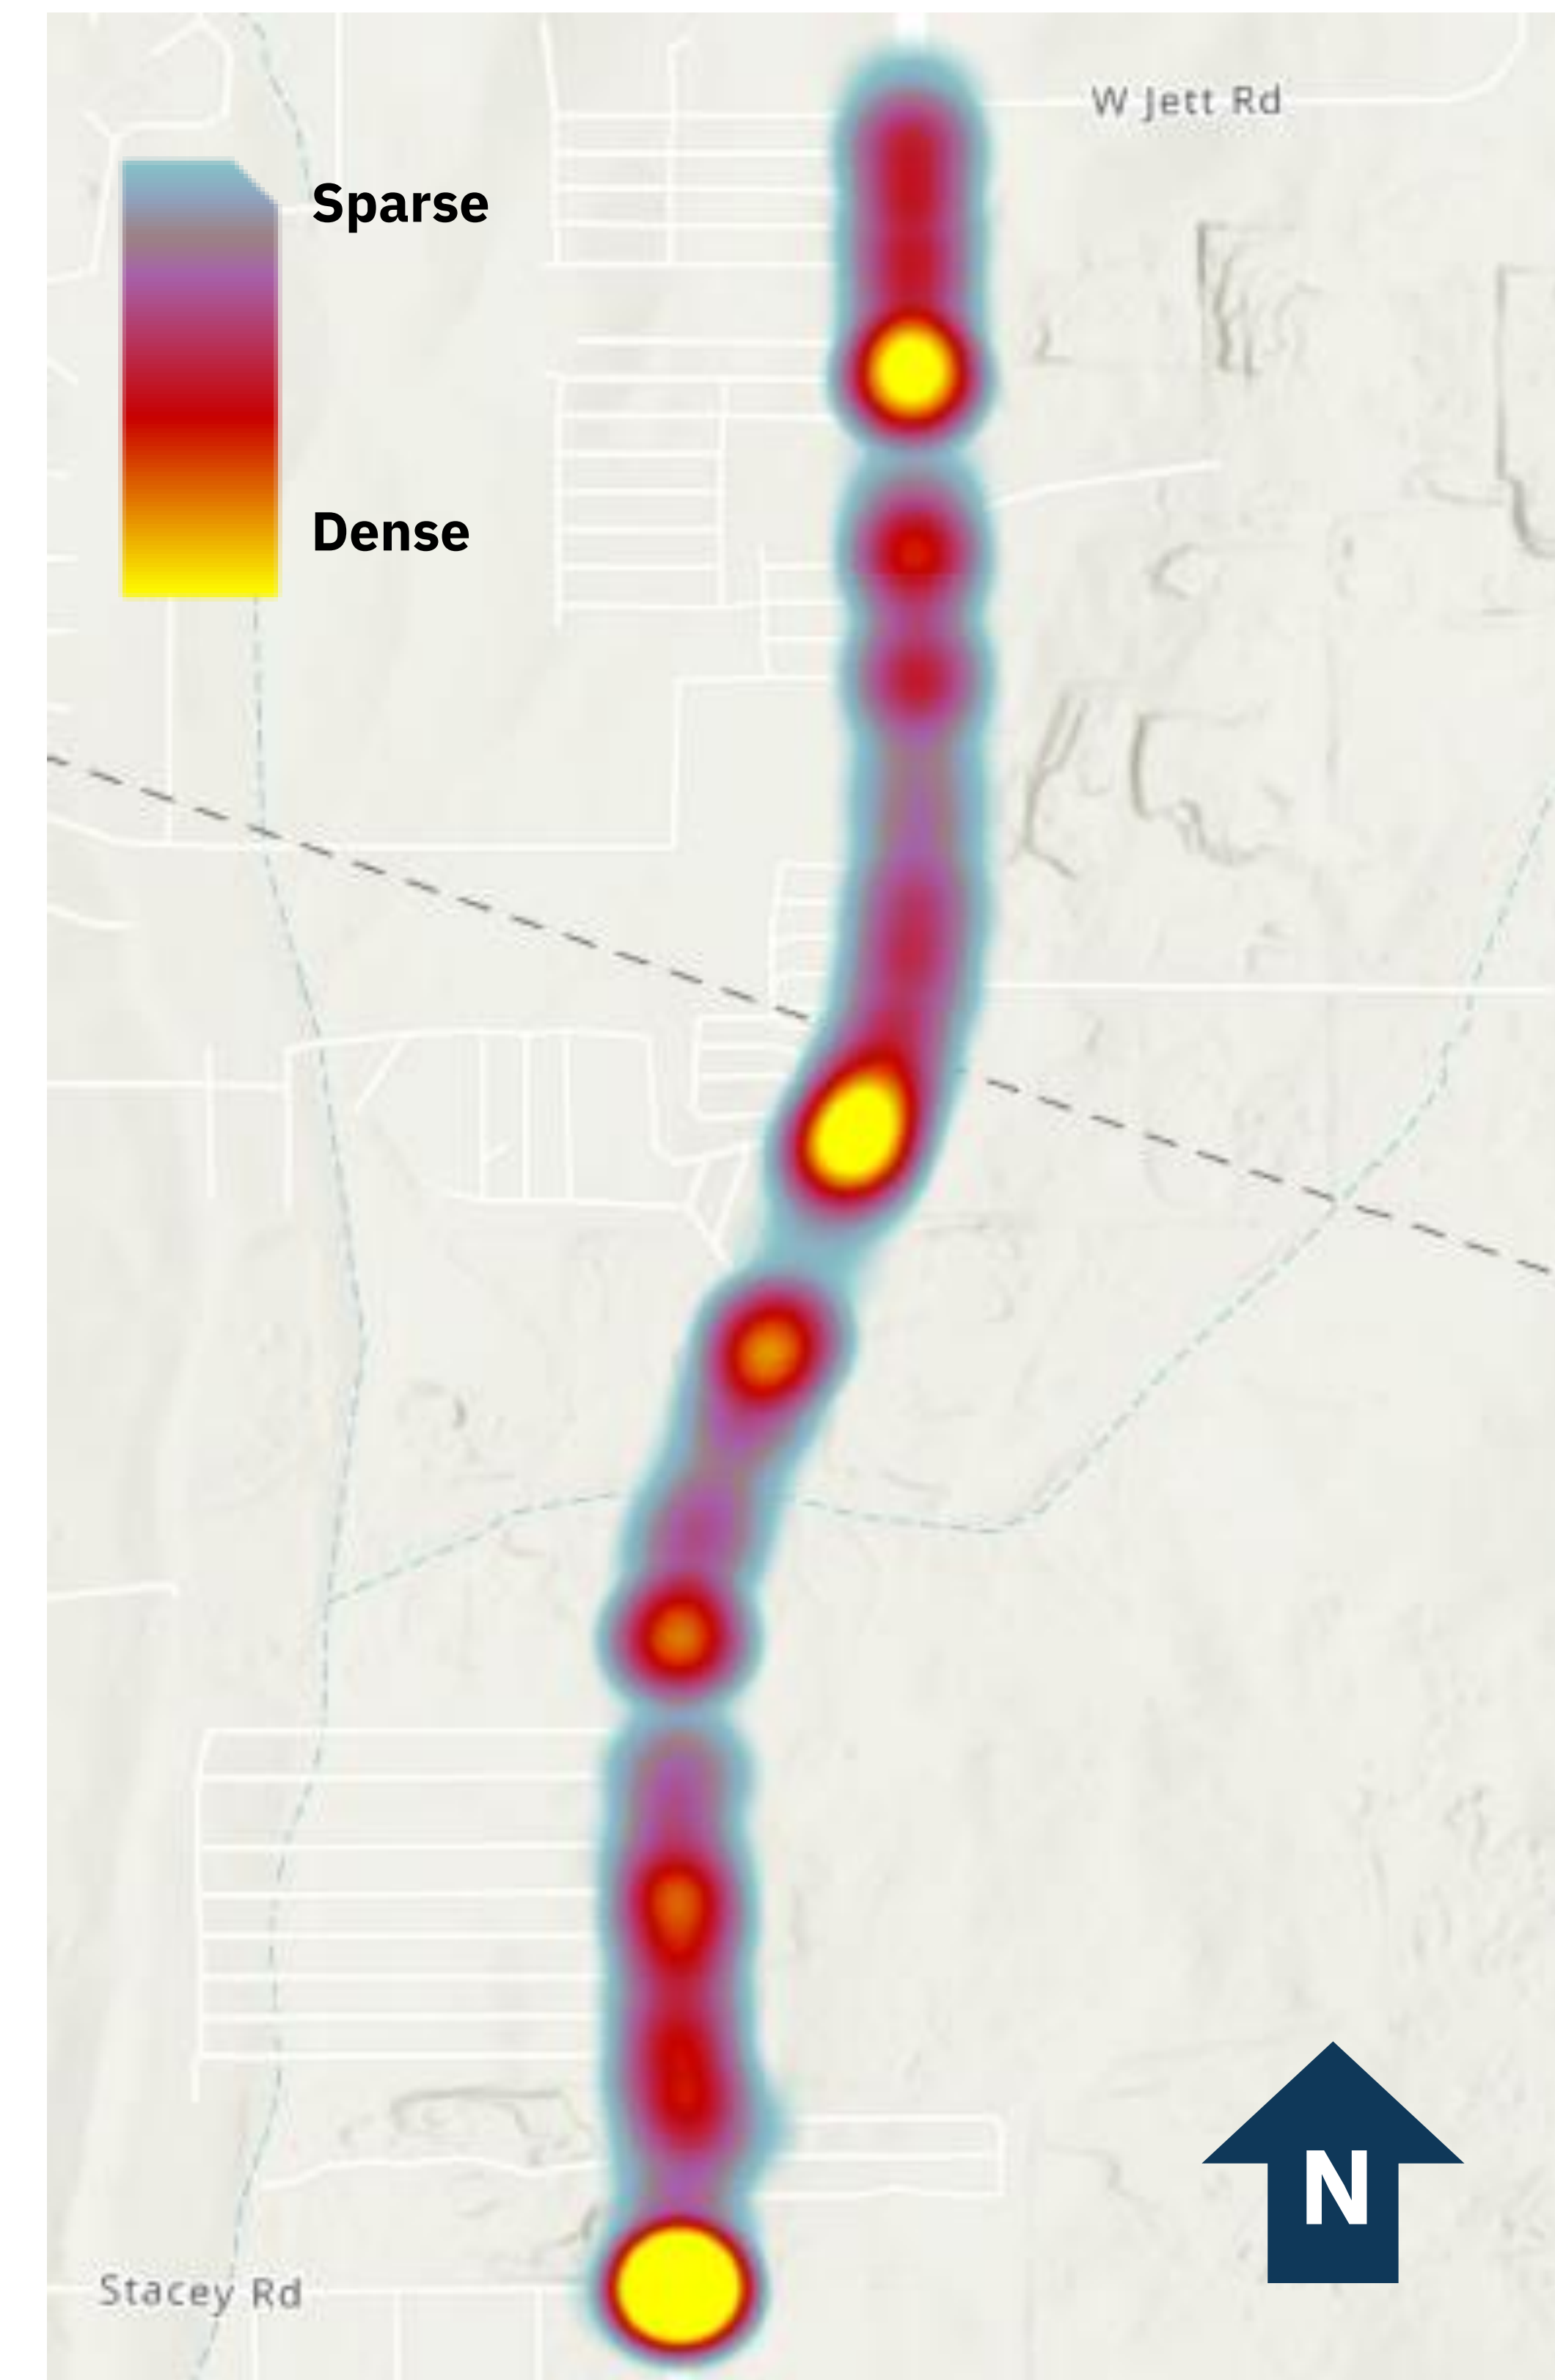

- **Improve safety**
- **Control turning movements to reduce delay**
- **Reduce injury and fatal crashes**

Why and Where to Consider a Restricted Crossing U-Turn

- ✓ Play critical role in the safety and operation of a roadway
- ✓ Rural multi-lane divided highways with wide streets
- ✓ High crash locations or where it is desirable to limit left turns to improve safety
 - Clear safety benefit

What is a Restricted Crossing U-Turn (RCUT)?

An intersection design that restricts left turns at intersections but allows the movement to occur at a new U-turn location on either side. Traffic from incoming and outgoing side streets must turn right first and then make a U-turn at the RCUT location. Acceleration and deceleration lanes are provided at these locations.
