

# US 82 Gap Fact Sheet

The Texas Department of Transportation (TxDOT) Wichita Falls District is proposing to widen and improve US 82 for approximately 3.98 miles from the Wichita/Archer County line to Farm-to-Market (FM) 369 in Wichita County, Texas. Intersection improvements would also be made at Old State Road and State Highway (SH) 258.

## Proposed Improvements:

- Project length would be approximately 3.98 miles.
- A 16-foot-wide continuous two-way left-turn lane would be added over the length of the project to improve safety and mobility along US 82. Existing 4-foot-wide shoulders would be widened to 10-feet.
- A new 200-foot long two-lane connector roadway would be constructed between Old State Road and US 82 approximately 700 feet west of the existing Old State Road intersection. The new connector road would remove the skew angle of the current intersection by forming a 90-degree angle at US 82. This would also provide some separation distance between the Old State Road and SH 258 intersections.
- The US 82 curve near the intersection of SH 258 would be enlarged so that all proposed widening would occur on the east side of US 82 through the curve. This shift in roadway alignment avoids impacts to the Kamay Y Station.
- A right-turn lane would be added for westbound US 82 to westbound SH 258.
- On the east end of the project, the five-lane roadway section would be extended approximately 850 feet east of where the four-lane roadway section currently ends. This would shift the transition to the four-lane freeway section 850 feet eastward.
- The US 82 eastbound exit ramp to FM 369 would be relocated approximately 1,700 feet to the east.
- Construction is anticipated to start in 2024. The estimated cost of construction is approximately \$15.4 million, excluding costs of right-of-way acquisition and utility relocations.
