

# I-35 Intersection Improvement Projects – Aquarena Springs Drive and Hopkins Street FACT SHEET

## Why Improvements are Needed

SH 80 (Aquarena Springs Drive) and Loop 82 (Hopkins Street) serve as major corridors for motorists driving in San Marcos and connecting to I-35. Improvements to these intersections are necessary to increase safety and relieve congestion.

## Project Purpose

The purpose of these intersection improvement projects is to improve safety and relieve congestion by improving left-turn movements, adding medians, and building sidewalks.

This project includes:

- Reconstructing intersections to reduce congestion
- Constructing raised medians to improve safety
- Constructing pedestrian improvements

## Construction Details and Timeline

Construction is anticipated to begin in winter 2013 and will take about nine months to complete both intersection improvement projects. The intersection at I-35 and Aquarena Springs Drive will be under construction first. Construction at I-35 and Hopkins Street will start once the Aquarena Springs Drive project is complete.

The estimated construction cost for both intersection improvements is \$6 million. The contractor is Dan Williams Company of Austin.
