

Right of Way Procurement Workshop Series September 2021 Questions and Answers

No.	Question	Answer
1	Is this [BonFire] system a third party provided software as a service? If so, where can we find the privacy and data protection statement for this service?	<p>Yes, BonFire is a third party software as a service.</p> <p>Following is the link to the BonFire <i>Privacy Policy</i>: https://gobonfire.com/privacy-policy/</p>
2	How can I get connected with ROW work as an appraiser?	<p>Go to the the following TxDOT website and subscribe to receive updates about upcoming right of way business opportunities: https://www.txdot.gov/business/opportunities/contracts.html</p>
3	If [vendor] previously created a Bonfire account for another agency or client do we need an account for TxDOT?	<p>No, you do not need an additional account specific to TxDOT; however, you must register to access the TxDOT Procurement Portal.</p> <p>Follow the link to login or create a new user account at https://txdot.bonfirehub.com/. There is a HELP button as a question mark in the lower left corner if you need assistance.</p> <p>Reminder: Google Chrome is the recommended browser for accessing the Bonfire portal.</p>
4	If a vendor signed up with another state agency outside of TxDOT do they need a separate account for TXDOT and specifically ROW?	<p>No, a separate account for TxDOT nor specific to ROW is needed. Accounts can be leveraged over multiple Bonfire organizations. When a user signs into a new client portal such as TxDOT, they will be prompted to update their account with any vendor customizations that are unique to the organization. From a technical perspective, the Vendor Account is a universal account. Once a user signs into a specific client portal, Bonfire copies the data from the universal vendor record into the Client's Vendor Management for tracking purposes.</p>
